It highlights how to select, define, and apply metrics to evaluate the efficiency and effectiveness of IT services and processes.
Topic 3	<ul style="list-style-type: none">Value Stream Mapping: This section of the exam measures skills of Compliance Officers and covers the use of value stream mapping. It shows how identifying process inefficiencies and improving workflows can optimize the overall delivery of value.
Topic 4	<ul style="list-style-type: none">Risk Management: This section of the exam measures skills of IT Service Managers and provides an understanding of risk management in IT services. It focuses on helping organizations anticipate, minimize, and respond effectively to potential disruptions or losses.

ITIL4-DPI Exam Exercise | ITIL4-DPI Materials

Individuals who pass the ITIL 4 Strategist: Direct, Plan and Improve (DPI) (ITIL4-DPI) certification exam demonstrate to their employers and clients that they have the knowledge and skills necessary to succeed in the industry. Dumpkiller is aware that preparing with outdated ITIL 4 Strategist: Direct, Plan and Improve (DPI) (ITIL4-DPI) study material results in a loss of time and money.

ITIL 4 Strategist: Direct, Plan and Improve (DPI) Sample Questions (Q39-Q44):

NEW QUESTION # 39

A legacy financial system requires the user to manually enter the time and date of transactions to meet regulatory requirements. A recent internal audit has shown that these fields are often blank.

Which are TWO effective controls that could improve compliance?

- * Modify the application to automatically add the current date and time when a transaction is entered
- * Establish a communication plan to remind users of the importance of including the date and time on transactions
- * Develop a goals cascade so that all staff know their role in achieving company goals
- * Create a report showing non-compliant records and take appropriate action to correct them

- A. 2 and 3
- **B. 1 and 4**
- C. 1 and 2
- D. 3 and 4

Answer: B

Explanation:

In DPI, controls are mechanisms to ensure compliance and mitigate risks. Modifying the system to auto-capture date/time (1) is a preventive control, while reporting and correcting non-compliant records (4) is a detective control. Together, these are effective and practical. Communication plans (2) and goals cascades (3) improve awareness but do not guarantee compliance. DPI stresses that technical and reporting controls are stronger than relying on human reminders.

(Reference: ITIL 4 Strategist DPI, section on "Controls - preventive and detective mechanisms in governance")

NEW QUESTION # 40

An IT department is functioning as a service provider for the company it is a part of.

Which statement about this provider's governance is CORRECT?

- A. An internal service provider must use the service value system instead of governance
- **B. An internal service provider cannot govern itself unless it has specifically delegated the authority by the company's governing body**
- C. An internal service provider is not subject to governance because they are part of the same company
- D. An internal service provider's governance is limited to external factors such as regulations and legislation

Answer: B

Explanation:

DPI clarifies that governance always comes from the organization's governing body. Internal service providers do not operate independently; they must follow the governance structures of the parent organization. They may only self-govern if explicitly delegated authority. Option A is incorrect (governance covers internal and external). Option B is false-governance always applies. Option D is misleading; the SVS supports governance, not replaces it.

(Reference: ITIL 4 Strategist DPI, section on "Governance in internal and external service provider contexts")

NEW QUESTION # 41

A service provider has a small technical support team, who are based in a remote location and provide support to a critical service. The support group have a reputation for providing excellent service. Head office, who control budget decisions, are implementing an improvement project for the service.

What should the service provider do FIRST to identify the support team's involvement in the project?

- A. Initiate a discussion with the support group to understand their preferred method of communication
- B. Use the same method of communication as agreed with all project stakeholders
- C. Inform the support team that they will receive regular email updates
- D. Agree a method for involving the support team in financial decisions

Answer: A

Explanation:

DPI's OCM guidance emphasizes engaging stakeholders early and ensuring communication methods are tailored to their needs. By first discussing preferred communication methods with the remote support team (B), the organization ensures their active involvement and reduces the risk of disengagement. Option A is one-way communication. Option C is irrelevant (they don't make financial decisions). Option D assumes one-size-fits-all, which contradicts DPI's principle of stakeholder-specific communication. (Reference: ITIL 4 Strategist DPI, section on "OCM - stakeholder engagement and communication planning")

NEW QUESTION # 42

The manager of a team of highly skilled professionals often handles challenging problems personally in an effort to demonstrate expertise.

Which TWO are the MOST LIKELY consequences of this behaviour?

- * Decisions take longer
- * Employee morale improves
- * Decisions are made quickly
- * Employee morale suffers

- A. 2 and 3
- B. 1 and 4
- C. 1 and 2
- D. 3 and 4

Answer: B

Explanation:

DPI governance principles highlight that when managers centralize decisions and problem-solving, it creates bottlenecks (delays in decision-making) and reduces team empowerment, leading to lower morale. Thus, options 1 (decisions take longer) and 4 (employee morale suffers) are the consequences. The behaviour undermines delegation of authority and staff empowerment, which DPI stresses as essential for effective governance and oversight.

(Reference: ITIL 4 Strategist DPI, section on "Delegation of authority and empowerment of teams")

NEW QUESTION # 43

Which BEST describes the relationship between planning and risk?

- A. Planning should always consider risks and how to mitigate them
- B. Planning focuses on what needs to be accomplished, risk management is part of how work is to be performed
- C. Planning is a high-level function, risk management is a tactical activity
- D. Risk management is the exclusive domain of dedicated risk managers

Answer: A

Explanation:

In DPI, planning and risk management are inseparable. Every plan should consider uncertainties and include mitigation strategies. Option B captures this integration directly. Option A is misleading: both planning and risk management happen at all levels. Option C partially reflects the relationship but is incomplete. Option D contradicts DPI guidance: risk management is an organizational responsibility, not just for specialists.

(Reference: ITIL 4 Strategist DPI, section on "Integration of planning and risk management")

NEW QUESTION # 44

.....

Maybe on other web sites or books, you can also see the related training materials. But as long as you compare Dumpkiller's

product with theirs, you will find that our product has a broader coverage of the certification exam's outline. You can free download part of exam practice questions and answers about ITIL certification ITIL4-DPI exam from Dumpkiller website as a try to detect the quality of our products. Why Dumpkiller can provide the comprehensive and high-quality information uniquely? Because we have a professional team of IT experts. They continue to use their IT knowledge and rich experience to study the previous years exams of ITIL ITIL4-DPI and have developed practice questions and answers about ITIL ITIL4-DPI exam certification exam. So Dumpkiller's newest exam practice questions and answers about ITIL certification ITIL4-DPI exam are so popular among the candidates participating in the ITIL certification ITIL4-DPI exam.
