GIAC Strategic Planning, Policy, and Leadership (GSTRT) Sample Questions (Q55-Q60):

NEW QUESTION # 55

Which of the following tools can help automate the enforcement of cybersecurity policies within an organization?

Response:

- A. Employee meetings
- B. Physical security audits
- C. Printed policy handbooks

- D. Policy management software

Answer: D

NEW QUESTION # 56

Your organization is facing a growing number of cyber threats, and you have been tasked with assessing the current security program to identify gaps and areas for improvement. After conducting a risk assessment, you find that the security program does not address recent developments in ransomware protection. What steps should you take to address this issue while aligning the program with the organization's values and risk tolerance?

Response:

- A. Update the security program by implementing ransomware-specific defenses such as frequent data backups, network segmentation, and employee training on phishing attacks
- B. Delay any updates to the program until a ransomware attack occurs
- C. Allocate the ransomware protection budget to other areas of security
- D. Ignore ransomware protection since it has not caused any recent incidents

Answer: A

NEW QUESTION # 57

What is the main goal of a threat intelligence program?

Response:

- A. To delay the implementation of new security controls
