## EC-COUNCIL 712-50 Exam Cram, 712-50 Test Question

When you choose 712-50 valid study pdf, you will get a chance to participate in the simulated exam before you take your actual test. The contents of 712-50 exam torrent are compiled by our experts through several times of verification and confirmation. So the 712-50 questions & answers are valid and reliable to use. You can find all the key points in the 712-50 practice torrent. Besides, the 712-50 test engine training equipped with various self-assessment functions like exam history, result scores and time setting, etc.

## EC-COUNCIL EC-Council Certified CISO (CCISO) Sample Questions (Q160-Q165):

### NEW QUESTION # 160

What organizational structure combines the functional and project structures to create a hybrid of the two?

- A. Matrix
- B. Project
- C. Traditional
- D. Composite

**Answer: A**

### NEW QUESTION # 161

Which of the following is MOST beneficial in determining an appropriate balance between uncontrolled innovation and excessive

caution in an organization?

- A. Collaborate security projects
- B. Review project charters
- **C. Define the risk appetite**
- D. Determine budget constraints

**Answer: C**

Explanation:

\* Defining risk appetite provides clear guidance on how much risk is acceptable, helping balance innovation with caution.

\* It ensures that decisions around innovation and security align with the organization's overall risk tolerance.

Why Other Options Are Less Effective:

\* B. Determine budget constraints: Budget constraints are important but do not address the balance between innovation and caution.

\* C. Review project charters: Reviewing charters provides project-specific insights but does not address organizational risk strategy.

\* D. Collaborate security projects: Collaboration is helpful but not as foundational as defining risk appetite.

EC-Council CISO Reference: Understanding and articulating risk appetite is a core component of governance and strategic alignment in the CISO program.

### NEW QUESTION # 162

Which business stakeholder is accountable for the integrity of a new information system?

- A. Compliance Officer
- B. Project manager
- C. Board of directors
- **D. CISO**

**Answer: D**

Explanation:

Accountability for Information System Integrity:

The Chief Information Security Officer (CISO) is responsible for the overall security of information systems, including their integrity.

This accountability extends to implementing and overseeing policies, controls, and processes to safeguard systems.

Why Not Other Options:

\* Compliance Officer (B): Focuses on regulatory adherence but does not oversee system integrity directly.

\* Project Manager (C): Handles project execution but does not have overarching accountability for security.

\* Board of Directors (D): Provides strategic oversight but does not manage specific system integrity.

EC-Council CISO Framework:

The CISO's role is explicitly defined as ensuring the confidentiality, integrity, and availability (CIA triad) of systems, which includes accountability for their integrity.

### NEW QUESTION # 163

Scenario: Your program is developed around minimizing risk to information by focusing on people, technology, and operations.

An effective way to evaluate the effectiveness of an information security awareness program for end users, especially senior executives, is to conduct periodic:

- A. Scanning for viruses
- B. Password changes
- C. Baselineing of computer systems
- **D. Controlled spear phishing campaigns**

**Answer: D**

### NEW QUESTION # 164

Creating a secondary authentication process for network access would be an example of?

- A. Nonlinearities in physical security performance metrics
- **B. Defense in depth cost enumerated costs**

- C. Anti-virus for mobile devices
- D. System hardening and patching requirements

**Answer: B**

Explanation:

Layered Security Approach:

- \* Secondary authentication adds another layer of security, contributing to the Defense in Depth strategy.
- \* Enumerating costs ensures the layered approach is cost-effective and aligns with organizational budgets.

Why This is Correct:

- \* Secondary authentication strengthens access controls, a critical aspect of Defense in Depth.

Why Other Options Are Incorrect:

- \* A. Nonlinearities in metrics: Irrelevant to authentication processes.
- \* C. System hardening: Focuses on system configurations, not authentication.
- \* D. Anti-virus for mobile devices: Unrelated to authentication processes.

References: EC-Council highlights Defense in Depth strategies as essential for layered protection mechanisms like secondary authentication.

## NEW QUESTION # 165

.....

By adhering to the principle of “quality first, customer foremost”, and “mutual development and benefit”, our company will provide first class service for our customers. As a worldwide leader in offering the best 712-50 exam guide, we are committed to providing comprehensive service to the majority of consumers and strive for constructing an integrated service.
