P.S. Free 2026 Nokia 4A0-113 dumps are available on Google Drive shared by Getcertkey: <https://drive.google.com/open?id=1u0wgY8fEY9048KrofV2mRvIn7g9pJtDE>

At present, our 4A0-113 exam guide gains popularity in the market. The quality of our 4A0-113 training material is excellent. After all, we have undergone about ten years' development. Never has our practice test let customers down. Although we also face many challenges and troubles, our company get over them successfully. If you are determined to learn some useful skills, our 4A0-113 Real Dumps will be your good assistant. Then you will seize the good chance rather than others.

Earning the Nokia 4A0-113 (Nokia OSPF Routing Protocol) Certification is highly beneficial for network engineers who are seeking to advance their career in the field of networking. Nokia OSPF Routing Protocol Exam certification validates the candidate's expertise in implementing and troubleshooting OSPF routing protocol, which is a highly sought-after skill in the industry. Additionally, this certification demonstrates the candidate's commitment to ongoing professional development and their dedication to staying up-to-date with the latest technologies and trends in the field of networking.

>> Actual 4A0-113 Test Answers <<

## Use Real 4A0-113 Dumps [2026] Guaranteed Success

Maybe you are busy with working every day without the help of our 4A0-113 learning materials. The heavy work leaves you with no time to attend to study. It doesn't matter. Our 4A0-113 learning materials can help you squeeze your time out and allow you to improve your knowledge and skills while having work experience. And there are three versions of our 4A0-113 Exam Questions for you to choose according to your interests and hobbies.

Candidates who pass the Nokia 4A0-113 Exam can prove their proficiency in OSPF routing protocol. Passing 4A0-113 exam demonstrates that the candidate has a deep understanding of OSPF and can apply this knowledge to configure, optimize, and troubleshoot OSPF networks. Nokia OSPF Routing Protocol Exam certification is highly valued in the networking industry, and it can lead to better job opportunities and higher salaries.

## Nokia OSPF Routing Protocol Exam Sample Questions (Q52-Q57):

### NEW QUESTION # 52

NSSA LSA packets are what type within an NSSA area, and are converted to what other type at the ABR?

- A. They are type 7 within the area and converted to type 5 at the ABR
- B. They are type 5 within the area and are not modified at the ABR
- C. They are type 7 within the area and are not modified at the ABR
- D. They are type 5 within the area and converted to type 3 at the ABR

**Answer: A**

#### NEW QUESTION # 53

Which of the following conditions will prevent an OSPF adjacency from reaching the full state? Choose three answers.

- A. MTU mismatch
- B. Area ID not the same
- C. Different metric set on each end of the link
- D. Router ID not defined
- E. Incorrect subnet mask
- F. System interface not included in OSPF

**Answer: A,B,E**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

From Nokia 7750 SR OS Routing Protocols Guide (OSPF Neighbor Formation Process):

A (Correct):

"An MTU mismatch will cause OSPF adjacency to stall in ExStart state."

B (Correct):

"Subnet mismatch prevents OSPF neighbor discovery as Hello packets are not accepted." D (Correct):

"Area ID mismatch results in dropped Hello packets and no adjacency."

Incorrect options:

C: If the system interface is not included, OSPF will not even attempt neighbor formation; this isn't an adjacency issue but rather a configuration issue.

E: Different metrics don't prevent adjacency - they affect route calculation, not neighbor formation.

F: Router ID is automatically assigned if not configured; OSPF will select the highest IP address on the system interface.

#### NEW QUESTION # 54

Exhibit

Given the two configurations shown, identify the two incorrect statements below: (Choose two)

- A. Metric values differ, but this does not prevent OSPF operation.
- B. The interface type settings differ, but OSPF will still operate correctly.
- C. Both routers will generate OSPF Hello packets.
- D. The system interface is missing in one configuration so OSPF will not operate correctly.

**Answer: B,D**

#### NEW QUESTION # 55

Which of the following commands can be used to display the number of SPF computations that have been performed on a router?

- A. show router ospf interface
- B. show router ospf area <area-id>
- C. show router ospf neighbor
- D. show router ospf status

**Answer: D**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

According to Nokia 7750 SR OS Routing Protocols Guide (OSPF Operational Commands, Chapter: Verifying OSPF):

"The 'show router ospf status' command provides global information about OSPF operation on the router, including the number of

SPF calculations performed." The other commands show area-specific information (option A), neighbor states (option B), or interface parameters (option C), but not the SPF count.  
Thus, correct answer is D.

-

### NEW QUESTION # 56

Which of the following statements regarding OSPF routing updates on a multi-access network segment is true?

- A. In multi-access networks, a DR and BDR are elected. The DR sends link-state advertisements describing the network.
- B. In multi-access networks, a DR and BDR are elected only if the subnet masks on the router interfaces are less than /30.
- C. In multi-access networks, a DR and BDR are elected only if there are more than two routers connected to the network segment.
- D. In multi-access networks, a DR and BDR are elected. To ensure resiliency, both the DR and BDR send link-state advertisements describing the network.

**Answer: A**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

From Nokia 7750 SR OS Routing Protocols Guide (OSPF DR/BDR Election and LSA Generation):

DR is responsible for generating Type 2 LSAs to describe the broadcast network.

BDR is only a standby and does not send LSAs unless promoted to DR.

DR/BDR election occurs regardless of the number of routers if the network type is broadcast.

Thus, correct answer: D.

### NEW QUESTION # 57
