Passing the Oracle 1z0-071 Exam and obtaining the certification demonstrates an individual's expertise in SQL programming language and their ability to manage Oracle databases effectively.

## Oracle Database SQL Sample Questions (Q316-Q321):

### NEW QUESTION # 316

Examine the description of the CUSTOMERS table:

You want to display details of all customers who reside in cities starting with the letter D followed by at least two character. Which query can be used?

- A. `SELECT * FROM customers WHERE city LIKE'D_';`
- B. `SELECT * FROM customers WHERE city LIKE'D %';`
- C. `SELECT * FROM customers WHERE city ='%D_';`
- **D. `SELECT * FROM customers WHERE city ='D_';`**

**Answer: D**

Explanation:

The LIKE operator is used in SQL to search for a specified pattern in a column. To find all customers residing in cities starting with 'D' followed by at least two characters, you need to use the LIKE operator with the appropriate wildcard pattern:

A. `SELECT * FROM customers WHERE city LIKE 'D_';` The underscore ( ) wildcard character in SQL represents a single character. The percent (%) wildcard character represents zero or more characters. So 'D%' will match any city starting with 'D' followed by at least one character (as there is one underscore).

Reference:

Oracle Database SQL Language Reference 12c, specifically the section on pattern matching with the LIKE condition.

### NEW QUESTION # 317

Evaluate the following statement.

Which statement is true regarding the evaluation of rows returned by the subquery in the INSERT statement?

- **A. They are evaluated by all the three WHEN clauses regardless of the results of the evaluation of any other WHEN clause.**
- B. The insert statement would give an error because the ELSE clause is not present for support in case none of WHEN clauses are true.
- C. They are evaluated by the first WHEN clause. If the condition is false, then the row would be evaluated by the subsequent WHEN clauses.
- D. They are evaluated by the first WHEN clause. If the condition is true, then the row would be evaluated by the subsequent WHEN clauses.

**Answer: A**

Explanation:

### NEW QUESTION # 318

Examine this SQL statement:

Which two are true?

- **A. The subquery is executed for every row in the employees table.**
- B. The subquery is not a correlated subquery.
- C. All existing rows in the EMPLOYEES table are deleted.
- **D. The subquery is executed before the DELETE statement is executed.**
- E. The DELETE statement executes successfully even if the subquery selects multiple rows.
