

# 2026 PSPO-I: Professional Scrum Product Owner I–The Best Actual Test Pdf

---

## PSPO 1 Exam Study| 205 Questions| With Complete Solutions

In order to make investment decisions, the Product Owner is likely to look at the Total Cost of Ownership (TCO) of the product being built. What costs will a Product Owner take into account? correct answer: All investments required to conceive, develop, operate and maintain the product

What best describes the relationship of the Product Owner and the stakeholders? correct answer: The Product Owner actively asks for stakeholder input and expectations to process into the Product Backlog.

Learning turns into 'validated learning' when assumptions and goals can be assessed through results. What is a key way for a Product Owner to apply validated learning? correct answer: Release an Increment to the market to learn about the business assumptions built into the product.

When can the Product Backlog be updated? correct answer: At any time when done by the Product Owner or at the Product Owner's discretion

How important is it for a Product Owner to order Product Backlog items by value points? correct answer: It is a good practice, keeping in mind that market reception is the best measure of value.

## **Scrum Professional Scrum Product Owner I Sample Questions (Q37-Q42):**

### **NEW QUESTION # 37**

Who creates the Definition of Done?  
(choose the best answer)

- **A. The Scrum Team**
- B. The Product Owner
- C. The Scrum Master
- D. The Developers

**Answer: A**

Explanation:

The Definition of Done is a formal description of the state of the Increment when it meets the quality measures required for the product. The Definition of Done is created by the Scrum Team, not just the Developers. The Scrum Team must have a shared understanding of what it means for work to be complete, to ensure transparency. The Definition of Done is used to assess when work is complete on the product Increment. The Definition of Done may vary significantly per Scrum Team, depending on the context. The Definition of Done evolves over time and is updated whenever the Scrum Team learns more about the product and the environment in which it operates.

- **A. TRUE**
- B. FALSE

**Answer: A**

### NEW QUESTION # 40

There are 5 Pillars of Scrum and 3 Scrum Values.

- A. False
- B. True

**Answer: A**

### NEW QUESTION # 41

Who determines when it is appropriate to update the Sprint Backlog during a Sprint?  
(choose the best answer)

- A. The Product Owner.
- B. The Developers.
- C. The Project Manager.
- D. The Scrum Team.

**Answer: B**

Explanation:

Explanation

\* The Sprint Backlog is the set of Product Backlog items selected for the Sprint, plus a plan for delivering the product Increment and realizing the Sprint Goal. The Sprint Backlog is a highly visible, real-time picture of the work that the Developers plan to accomplish during the Sprint, and it belongs solely to the

\* Developers.

\* The Developers are accountable for creating a "Done" Increment that meets the Definition of Done each Sprint. The Developers are responsible for planning and executing the Sprint Backlog, designing and building the product functionality, testing and improving the product quality, and delivering a potentially releasable Increment. The Developers work closely with the Product Owner to understand and clarify the Product Backlog items, provide feedback and estimates, and suggest improvements and innovations.

\* The Developers are also responsible for updating the Sprint Backlog throughout the Sprint. The Sprint Backlog is a plan with enough detail that changes in progress can be understood in the Daily Scrum. The Developers modify the Sprint Backlog throughout the Sprint, and the Sprint Backlog emerges during the Sprint. This emergence occurs as the Developers work through the plan and learn more about the work needed to achieve the Sprint Goal.

\* As new work is required, the Developers add it to the Sprint Backlog. As work is performed or completed, the estimated remaining work is updated. When elements of the plan are deemed unnecessary, they are removed. Only the Developers can change its content and order during a Sprint.
