

CDCP Examcollection Free Dumps & Discount CDCP Code

P.S. Free 2026 EXIN CDCP dumps are available on Google Drive shared by ActualTestsQuiz: https://drive.google.com/open?id=1GkGr_858q6dlmT7fg-Rlx7VrAhRQ5BCN

If you buy the CDCP practice materials within one year you can enjoy free updates. Being the most competitive and advantageous company in the market, our CDCP exam questions have helped tens of millions of exam candidates, realized their dreams all these years. What you can harvest is not only a certificate but of a successful future from now on just like our former clients. What are you waiting now? Just rush to buy our CDCP Study Guide!

EXIN CDCP Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Designing a Scalable Network Infrastructure: It covers ANSI• TIA-942 cabling hierarchy, network redundancy, structured Cabling System, and planning considerations.
Topic 2	<ul style="list-style-type: none">• Raised Floor• Suspended Ceiling: The topic discusses applicable standards, signal reference grid, and disability act and regulations.
Topic 3	<ul style="list-style-type: none">• Physical Security and Safety: Sub-topics are about physical security considerations and physical safety considerations.
Topic 4	<ul style="list-style-type: none">• Power Infrastructure: It focuses ATS and STS systems, redundancy levels and techniques, static and dynamic UPS systems, battery types, thermo-graphics, and renewable energy factor (REF).
Topic 5	<ul style="list-style-type: none">• Fire Safety• Protection: This topic gives an understanding of standards for fire suppression, detection systems, total flooding fire suppression techniques, and handheld extinguishers. Additionally, it covers Signage and safety.
Topic 6	<ul style="list-style-type: none">• Electro Magnetic Fields: The topic deals with effects of EMF on human health and equipment (H)EMP, standards, and EMF shielding solutions.
Topic 7	<ul style="list-style-type: none">• Light: This topic covers light fixture types and placement, emergency lighting, and emergency Power Supply (EPS).

PassLeader CDCP Practice Materials: Certified Data Centre Professional (CDCP) are a wise choice - ActualTestsQuiz

To choose our ActualTestsQuiz to is to choose success! ActualTestsQuiz provide you EXIN certification CDCP exam practice questions and answers, which enable you to pass the exam successfully. Simulation tests before the formal EXIN certification CDCP examination are necessary, and also very effective. If you choose ActualTestsQuiz, you can 100% pass the exam.

EXIN Certified Data Centre Professional (CDCP) Sample Questions (Q85-Q90):

NEW QUESTION # 85

When designing a data centre with a raised-floor setup, where should the air conditioners be placed?

- A. Close to the entrance door to create an air curtain to avoid hot comes into the computer room
- **B. Perpendicular to the hot aisle**
- C. Perpendicular to the cold aisle
- D. Perpendicular to the side of the rack

Answer: B

NEW QUESTION # 86

When having two non-synchronized power sources, the ATS / STS need to be of the type:

- A. Make before break.
- **B. Break before make.**
- C. Both make before break or break before make can be used.
- D. Both an ATS and STS can never handle two non-synchronized sources.

Answer: B

Explanation:

When having two non-synchronized power sources, the ATS / STS need to be of the type break before make, which means that the switch disconnects from one source before connecting to the other source. This prevents any short circuit, back feed, or phase mismatch that could occur if the two sources were connected simultaneously. Break before make switches are also known as open transition switches, because they create a brief interruption in the power supply during the switching process. This interruption is usually acceptable for most ICT equipment, as they have internal power supplies or batteries that can handle the transient. However, if the interruption is not acceptable, then the two power sources need to be synchronized before switching, which requires a make before break switch, also known as a closed transition switch. Make before break switches connect to the second source before disconnecting from the first source, which ensures a seamless transfer of power without any interruption. However, make before break switches require that the two sources have the same voltage, frequency, and phase, which can be achieved by using a synchronization module or a phase-locked loop.

NEW QUESTION # 87

By what are magnetic fields of the type 'H' or 'B' created?

- **A. Magnetic fields are created when an electric current flows; the greater the current, the stronger the magnetic field.**
- B. Magnetic fields are created by the magnetic flux of the earth which varies per month.
- C. Magnetic fields are created when there is a high level of common mode noise (CMN); the greater the common mode noise (CMN), the stronger the magnetic field.
- D. Magnetic fields are created by voltage; the greater the voltage, the stronger the magnetic field.

Answer: A

Explanation:

According to the CDCP Preparation Guide¹, magnetic fields of the type 'H' or 'B' are created when an electric current flows through a conductor, such as a wire or a coil. The magnetic field strength 'H' is proportional to the current 'I' and the number of turns 'N' of the coil, and inversely proportional to the length

'l' of the coil. The magnetic flux density 'B' is proportional to the magnetic field strength 'H' and the permeability " of the medium in which the magnetic field exists. The greater the current, the stronger the magnetic field and the magnetic flux density. The relationship between 'H', 'B', 'I', 'N', 'l', and " can be expressed by the following equations:

$$H = N I / l$$

$$B = \mu H$$

NEW QUESTION # 88

What is the minimum clearance space required below water sprinkler heads and nozzles of gas-based fire suppression systems?

- A. 120 cm / 47 inches
- B. 64 cm / 25 inches
- C. 46 cm / 18 inches
- D. 60 cm / 24 inches

Answer: C

Explanation:

The minimum clearance space required below water sprinkler heads and nozzles of gas-based fire suppression systems is 46 cm / 18 inches, according to the CDCP Preparation Guide¹ and OSHA regulation 29 CFR

1910.159 © (10)². This clearance space is necessary to ensure that the sprinkler spray or gas discharge can reach the fire and cover the protected area effectively. Any material or obstruction below this clearance space can interfere with the sprinkler or gas distribution and reduce the fire suppression performance. Therefore, building owners and managers should ensure that all storage and objects in the data centre are kept below this clearance space, and that the clearance space is maintained at all times.

NEW QUESTION # 89

Which formula is correct?

- A. Volt-Ampere = Watt * Power Factor
- B. Watt = Volt-Ampere * Power Factor
- C. Power Factor = Volt Ampere ' Watt
- D. Watt = Volt-Ampere / Power Factor

Answer: B

NEW QUESTION # 90

.....

In the past ten years, our company has never stopped improving the Certified Data Centre Professional (CDCP) exam cram. For a long time, we have invested much money to perfect our products. At the same time, we have introduced the most advanced technology and researchers to perfect our Certified Data Centre Professional (CDCP) exam questions. At present, the overall strength of our company is much stronger than before. We are the leader in the market and master the most advanced technology. In fact, our CDCP Test Guide has occupied large market shares because of our consistent renovating. We have built a powerful research center and owned a strong team. Up to now, we have got a lot of patents about the CDCP test guide. In the future, we will continuously invest more money on researching.
