

Cisco 300-740 Exam Questions - 100% Exam Passing Guarantee [2026]

2026 Latest Actual4Exams 300-740 PDF Dumps and 300-740 Exam Engine Free Share: <https://drive.google.com/open?id=1MoesivYOEwdJadF1YpWcl-pjtE5HjFqX>

It is hard to scrutinize the Designing and Implementing Secure Cloud Access for Users and Endpoints (300-740) exam, particularly assuming you have less time and the subjects are tremendous. You essentially have a baffled perspective toward it and some even consider not giving the Designing and Implementing Secure Cloud Access for Users and Endpoints exam since they can't concentrate exactly as expected. Cisco 300-740 Exam they need time to cover each point and this is unimaginable considering how they are left with only a piece of a month to give the Cisco 300-740 exam.

Cisco 300-740 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Cloud Security Architecture: This section of the exam measures the skills of Cloud Security Architects and covers the fundamental components of the Cisco Security Reference Architecture. It introduces the role of threat intelligence in identifying and mitigating risks, the use of security operations tools for monitoring and response, and the mechanisms of user and device protection. It also includes strategies for securing cloud and on-premise networks, as well as safeguarding applications, workloads, and data across environments.
Topic 2	<ul style="list-style-type: none">• SAFE Key Structure: This section of the exam measures skills of Network Security Designers and focuses on the SAFE framework's key structural elements. It includes understanding 'Places in the Network'—the different network zones—and defining 'Secure Domains' to organize security policy implementation effectively.
Topic 3	<ul style="list-style-type: none">• SAFE Architectural Framework: This section of the exam measures skills of Security Architects and explains the Cisco SAFE framework, a structured model for building secure networks. It emphasizes the importance of aligning business goals with architectural decisions to enhance protection across the enterprise.

Topic 4	<ul style="list-style-type: none"> • Network and Cloud Security: This section of the exam measures skills of Network Security Engineers and covers policy design for secure access to cloud and SaaS applications. It outlines techniques like URL filtering, app control, blocking specific protocols, and using firewalls and reverse proxies. The section also addresses security controls for remote users, including VPN-based and application-based access methods, as well as policy enforcement at the network edge.
Topic 5	<ul style="list-style-type: none"> • Visibility and Assurance: This section of the exam measures skills of Security Operations Center (SOC) Analysts and focuses on monitoring, diagnostics, and compliance. It explains the Cisco XDR solution, discusses visibility automation, and describes tools for traffic analysis and log management. The section also involves diagnosing application access issues, validating telemetry for behavior analysis, and verifying user access with tools like firewall logs, Duo, and Cisco Secure Workload.
Topic 6	<ul style="list-style-type: none"> • Integrated Architecture Use Cases: This section of the exam measures the skills of Cloud Solution Architects and covers key capabilities within an integrated cloud security architecture. It focuses on ensuring common identity across platforms, setting multicloud policies, integrating secure access service edge (SASE), and implementing zero-trust network access models for more resilient cloud environments.

The Best Accurate Trustable 300-740 Exam Guide Covers the Entire Syllabus of 300-740

With the Cisco 300-740 qualification certificate, you are qualified to do this professional job. Therefore, getting the test 300-740 certification is of vital importance to our future employment. And the Designing and Implementing Secure Cloud Access for Users and Endpoints 300-740 Study Tool can provide a good learning platform for users who want to get the test Designing and Implementing Secure Cloud Access for Users and Endpoints 300-740 certification in a short time.

Cisco Designing and Implementing Secure Cloud Access for Users and Endpoints Sample Questions (Q149-Q154):

NEW QUESTION # 149

Cloud security attack tactics often include:

- A. Enhancing cloud service offerings
- B. Exploiting misconfigured cloud storage
- C. Social media marketing strategies
- D. Physical security breaches

Answer: B

NEW QUESTION # 150

Refer to the exhibit. An engineer must enable access to Salesforce using Cisco Umbrella and Cisco Cloudlock. These actions were performed:

- * From Salesforce, add the Cloudlock IP address to the allow list
- * From Cloudlock, authorize Salesforce

However, Salesforce access via Cloudlock is still unauthorized. What should be done to meet the requirements?

- A. From the Salesforce admin page, grant network access to Cloudlock
- B. From the Cloudlock dashboard, grant network access to Salesforce.
- C. From the Cloudlock dashboard, grant API access to Salesforce.
- D. From the Salesforce admin page, grant API access to Cloudlock.

Answer: A

Explanation:

When integrating Cisco Cloudlock with SaaS platforms like Salesforce, two core authorizations are required: network access and API authorization. In the scenario, Cloudlock has been authorized in Salesforce, and its IP has been allow-listed. However, if access is still denied, the most likely cause is that Salesforce has not been configured to accept traffic from Cloudlock's IP range - a process handled from the Salesforce admin panel.

To resolve the issue, network access must be explicitly granted to Cloudlock from within Salesforce. This ensures that Salesforce accepts requests initiated by Cloudlock for monitoring and enforcement.

Application and Data Security, Pages 85-87.

Also supported by Cisco Cloudlock for Salesforce Deployment Guide.

NEW QUESTION # 151

Security audit reports are crucial for:

- A. Promoting a false sense of security
- B. Reducing the overall security budget
- C. Identifying compliance gaps and areas lacking sufficient security controls
- D. Eliminating the need for security policies

Answer: C

NEW QUESTION # 152

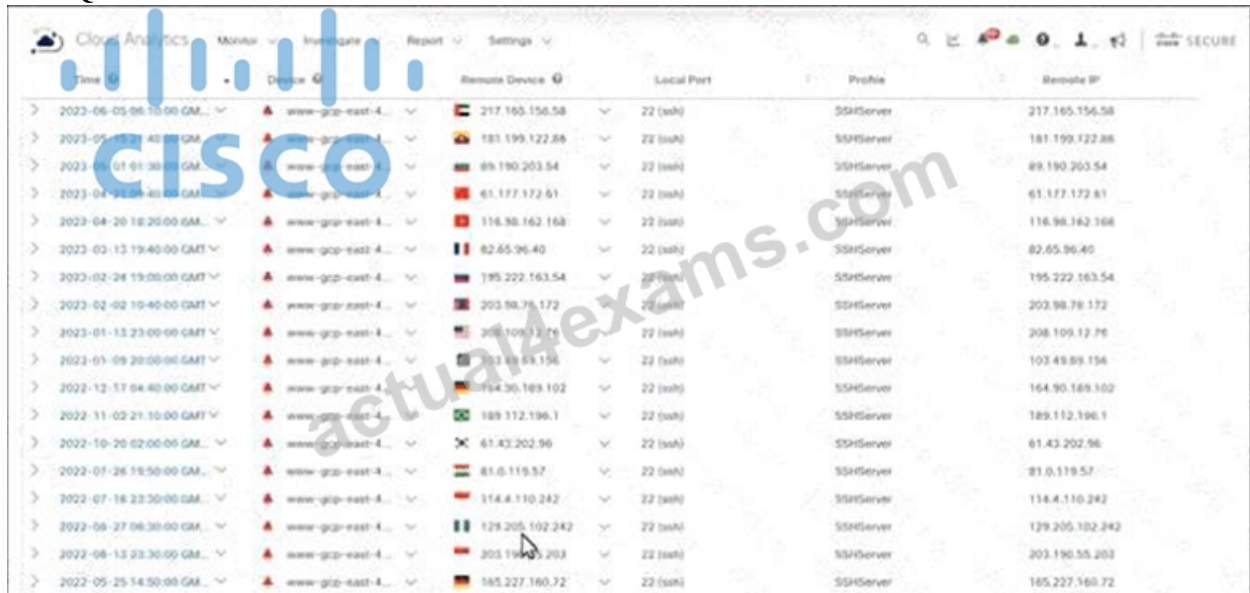

Which of the following is a feature of multifactor authentication (MFA)?

- A. Requires multiple forms of identification before granting access
- B. Only requires a password

- C. Can only be used on mobile devices
- D. Is less secure than single-factor authentication

Answer: A

NEW QUESTION # 153

Time	Device	Remote Device	Local Port	Profile	Remote IP
2022-06-05 06:10:00 GMT	www-gcp-east-4c	217.165.156.58	22 (ssh)	SSHServer	217.165.156.58

2022-05-25 14:50:00 GMT	www-gcp-east-4c	185.227.160.72	22 (ssh)	SSHServer	185.227.160.72

Refer to the exhibit. An engineer must analyze the Cisco Secure Cloud Analytics report. What is occurring?

- A. Persistent remote-control connections
- B. Memory exhaustion attempt toward port 22
- C. Geographically unusual remote access
- D. Distributed DDoS attack

Answer: C

Explanation:

The Secure Cloud Analytics alert log shows multiple SSH connections on port 22 from diverse and geographically distributed IP addresses targeting a single GCP instance (www-gcp-east-4c). According to the Cloud Analytics alert logic described in SCAZT (Section 6: Threat Response, Pages 113-116), this behavior indicates "Geographically Unusual Remote Access." It typically triggers when a host receives connections from countries not normally associated with the network's usage profile. This is often linked to reconnaissance or brute-force SSH attempts.
