

Trusting Authorized NCP-CI-Azure Latest Test Questions in BraindumpsIT Is The Valid Way to Pass Nutanix Certified Professional - Cloud Integration - Azure (NCP-CI-Azure v6.7)

In order to meet the needs of all customers that pass their exam and get related certification, the experts of our company have designed the updating system for all customers. Our NCP-CI-Azure exam question will be constantly updated every day. Maybe most of people prefer to use the computer when they are study, but we have to admit that many people want to learn buy the paper, because they think that studying on the computer too much does harm to their eyes. NCP-CI-Azure Test Questions have the function of supporting printing in order to meet the need of customers.

Nutanix NCP-CI-Azure Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Deploying an NC2 on Azure Environment: This section assesses the skills of Nutanix Cloud Operators and focuses on deploying the cloud cluster within the Azure environment. Candidates will learn to configure cloud provider networking effectively, ensuring that all necessary resources are correctly set up for deployment.
Topic 2	<ul style="list-style-type: none">Configuring an NC2 on Azure Environment: This section evaluates the skills of IT Administrators and emphasizes modifying cloud networking security to protect resources. Candidates will configure Nutanix networking settings and troubleshoot connectivity issues to ensure seamless communication within the cloud environment.
Topic 3	<ul style="list-style-type: none">Planning an NC2 on Azure Deployment: This section of the exam measures the skills of IT Administrators and covers the preparation of the Azure cloud environment, including determining the appropriate Azure account and node types. It also involves subscribing to the NC2 service, which requires knowledge of authentication methods and organization naming conventions. Additionally, candidates must determine implementation requirements by evaluating deployment use cases and redundancy needs. Identifying networking requirements is crucial, focusing on connectivity options like VPN and CIDR ranges.

Topic 4	<ul style="list-style-type: none"> • Managing an NC2 on Azure Environment: This section relates to skills in identifying management tasks for nodes and clusters. Candidates will monitor cluster health and cloud resource performance, ensuring that all components function efficiently. Understanding these management tasks is vital for maintaining operational integrity in a hybrid cloud environment.

Quiz 2026 Nutanix Reliable NCP-CI-Azure Latest Test Questions

BraindumpsIT's NCP-CI-Azure exam training materials are proved to be effective by some professionals and examinees that have passed NCP-CI-Azure exam, BraindumpsIT's NCP-CI-Azure exam dumps are almost the same with real exam paper. It can help you pass NCP-CI-Azure certification exam. After you purchase our NCP-CI-Azure VCE Dumps, if you fail NCP-CI-Azure certification exam or there are any problems of NCP-CI-Azure test training materials, we will give a full refund to you. We believe that our BraindumpsIT's NCP-CI-Azure vce dumps will help you.

Nutanix Certified Professional - Cloud Integration - Azure (NCP-CI-Azure v6.7) Sample Questions (Q17-Q22):

NEW QUESTION # 17

An administrator is tasked with creating a new subnet for a group of VMs that require inbound internet access. Internal private addresses must be obscured to servers on the public internet. Which network is best suited for satisfying this requirement?

- A. Bastion based network
- B. Layer 2 Stretch network
- **C. NAT based network**
- D. No-NAT based network

Answer: C

Explanation:

* **NAT Based Network:** A NAT-based network is designed to provide inbound and outbound internet access while obscuring the internal private addresses. This setup uses Network Address Translation (NAT) to map internal IP addresses to a public IP address, ensuring that internal addresses are not exposed to the public internet.

* **Security and Connectivity:** NAT provides a layer of security by hiding internal IP addresses and allowing controlled access to external resources. This configuration is well-suited for VMs that need to communicate with servers on the public internet while maintaining the privacy of their internal network addresses.

- * Azure Virtual Network NAT Documentation
- * Nutanix Networking and Security Configuration Guide

NEW QUESTION # 18

An administrator needs the permission to create and manage multiple organizations and clusters in NC2, as well as manage user access for the entire company.

What role should be assigned to meet the minimum requirements of this task?

- A. Cluster Administrator
- **B. Customer Administrator**
- C. Organization Administrator
- D. Customer Security Administrator

Answer: B

Explanation:

* **Role Requirements:** The task involves creating and managing multiple organizations and clusters, along with managing user access across the company.

- * Role Capabilities: The "Customer Administrator" role is designed to provide extensive administrative capabilities, including:
 - * Creating and managing organizations.
 - * Managing clusters.
 - * Handling user access and permissions.
 - * Comparison of Roles:
 - * Cluster Administrator: Primarily focuses on managing individual clusters but does not encompass organization-wide administrative tasks.
 - * Customer Security Administrator: Focuses on security-related tasks and does not have broad administrative capabilities across organizations and clusters.
 - * Organization Administrator: Manages organizational settings but might not cover all aspects needed for multiple clusters and user access management.
 - * Conclusion: The "Customer Administrator" role meets all the requirements for managing organizations, clusters, and user access comprehensively.
- References:
- * Nutanix Role-Based Access Control Documentation

NEW QUESTION # 19

An administrator is deploying an NC2 cluster in Azure and observes on NC2 console that nodes will not progress and continue in a Booting state.

What is the most likely cause for the node not continuing to deploy?

- A. A private DNS server is being used that is not reachable.
- **B. The subscription has not been validated to be allowlisted by Microsoft.**
- C. The Azure account does not have an active subscription.
- D. An Azure Support case must first be submitted for allowlisting the Azure subscription.

Answer: B

Explanation:

Azure Subscription Validation: When deploying an NC2 cluster, the Azure subscription must be validated and allowlisted by Microsoft. This is a crucial step to ensure that the necessary permissions and configurations are set up for the deployment.

Booting State Issue: If the nodes are stuck in the Booting state, it often indicates that the subscription has not been properly validated and allowlisted. This prevents the deployment from progressing as required resources and permissions are not fully accessible.

Checking Allowlisting Status: Administrators should verify that their subscription has been allowlisted by contacting Azure support or checking the status through the Azure portal.

Resolution: Once the subscription is validated and allowlisted by Microsoft, the deployment should proceed without the nodes getting stuck in the Booting state.

NEW QUESTION # 20

An administrator is tasked to identify the firewall requirement and submit the port request to the requirement team before the clusters deployment.

Which requirement should the administrator ensure is implemented on the corporate firewall?

- **A. Allow bi-directional Internet Control Message Protocol (ICMP) traffic between the CVMs, Prism Element, and Prism Central.**
- B. ICMP and connectivity can be disabled between the CVMs, Prism Element, and Prism Central
- C. Allow uni-directional internet Control Message Protocol (ICMP) traffic between the CVMs, Prism Element, and Prism Central.
- D. ICMP can be disabled but the connectivity should be enabled between the CVMs, Prism Element, and Prism Central.

Answer: A

Explanation:

* ICMP Traffic: ICMP is essential for network diagnostics and troubleshooting, such as ping and traceroute, which help in monitoring the connectivity and health of the network.

* Bi-Directional Traffic: Allowing bi-directional ICMP traffic ensures that all nodes (CVMs, Prism Element, and Prism Central) can

both send and receive diagnostic messages, which is crucial for maintaining proper communication and network stability.

NEW QUESTION # 21

An administrator is seeking help with an ongoing NC2 issue. After reaching out to Nutanix support, the administrator is introduced to the NC2 specialist who can help troubleshoot the problem.

How can the administrator verify that the NC2 specialist has access to the necessary organizations?

- A. Provide the specialist with the administrator's login credentials.
- B. Add the specialist as an admin user to the organizations.
- C. Ensure the specialist is assigned the RBAC role with proper permissions.
- **D. Confirm the Support Authorization on the organization is set to Full Access.**

Answer: D

Explanation:

To verify that the NC2 specialist has access to the necessary organizations for troubleshooting the issue, the administrator should:

* Confirm that the Support Authorization on the organization is set to Full Access. This ensures that the NC2 specialist has the required permissions to access the necessary resources and perform the necessary actions to resolve the issue.

Providing login credentials or adding the specialist as an admin user is not recommended due to security and privacy concerns.

Ensuring the specialist is assigned the correct RBAC role is another valid approach but confirming the support authorization directly ensures they have the needed access.

NEW QUESTION # 22

.....

Nowadays, everyone lives so busy every day, and we believe that you are no exception. If you want to save your time, it will be the best choice for you to buy our NCP-CI-Azure study torrent. Because the greatest advantage of our study materials is the high effectiveness. As a powerful tool for a lot of workers to walk forward a higher self-improvement, BraindumpsIT continue to pursue our passion for advanced performance and human-centric technology. We aimed to help some candidates who have trouble in pass their NCP-CI-Azure Exam and only need few hours can grasp all content of the exam. In recent years, our test torrent has been well received and have reached 99% pass rate with all our dedication.
