Using our reliable exam product can prove a helping hand for you to become Amazon AWS-Solutions-Architect-Professional certified. Do not waste any more time because this AWS-Solutions-Architect-Professional exam dumps can be a turning point in your exam preparation journey. Remember that you cannot afford to suffer from AWS-Solutions-Architect-Professional Exam failure because the registration fee of the test is high and you will not want to spend this massive amount for the second attempt.

The AWS Certified Solutions Architect - Professional certification exam is intended for solution architects and design engineers who have at least two years of hands-on experience designing and deploying scalable and fault-tolerant systems on AWS. AWS Certified Solutions Architect - Professional certification exam covers a wide range of topics, including AWS services and their use cases, design patterns, architectural best practices, security and compliance, performance optimization, and cost optimization.

The AWS Certified Solutions Architect - Professional certification exam is designed for individuals who possess advanced technical skills and experience in designing distributed applications and systems on the Amazon Web Services (AWS) platform. AWS Certified Solutions Architect - Professional certification validates an individual's ability to architect and deploy secure and scalable applications on AWS, and demonstrate knowledge of best practices for building and designing cloud architectures.

AWS-Solutions-Architect-Professional Practice Test Pdf | AWS-Solutions-Architect-Professional Reasonable Exam Price

For candidates who are going to choose the AWS-Solutions-Architect-Professional training materials online, the quality must be one of the most important standards. With skilled experts to compile and verify, AWS-Solutions-Architect-Professional exam braindumps are high quality and accuracy, and you can use them at ease. In addition, AWS-Solutions-Architect-Professional exam materials are pass guarantee and money back guarantee. You can try free demo for AWS-Solutions-Architect-Professional Exam Materials, so that you can have a deeper understanding of what you are going to buy. We have online and offline chat service stuff, and if you have any questions for AWS-Solutions-Architect-Professional exam materials, you can consult us.

The AWS-Solutions-Architect-Professional Exam is a comprehensive test that covers a wide range of topics, including advanced networking, security, database architecture, cloud migration, and more. AWS-Solutions-Architect-Professional exam is designed to be challenging, and it requires a deep understanding of AWS services, as well as the ability to design and deploy complex systems in the cloud.

Amazon AWS Certified Solutions Architect - Professional Sample Questions

(Q260-Q265):

NEW QUESTION # 260

A solution architect is migrating an existing workload to AWS Fargate. The task can only run in a private subnet within the VPC where there is no direct connectivity from outside the system to the application. When the Fargate task is launched, the task fails with the following error:

How should the solution architect correct this error?

- A. Ensure the task is set to DISABLED for the auto-assign public IP setting when launching the task. Configure a NAT gateway in the public subnet in the VPC to route requests to the internet
- **B. Ensure the task is set to DISABLED for the auto-assign public IP setting when launching the task. Configure a NAT gateway in the private subnet in the VPC to route requests to the internet**
- C. Ensure the network mode is set to bridge in the Fargate task definition.
- D. Ensure the task is set to ENABLED for the auto-assign public IP setting when launching the task.

Answer: B

NEW QUESTION # 261

A Solutions Architect is designing a customer order processing application that will likely have high usage spikes.

What should the Architect do to ensure that customer orders are not lost before being written to an Amazon RDS database? (Choose two.)

- A. Scale the number of processing nodes based on pending order volume.
- B. Have a standby Amazon RDS instance in a separate Availability Zone.
- **C. Use Amazon CloudFront to deliver the application front end.**
- **D. Use Elastic Load Balancing with a round-robin routing algorithm.**
- E. Have the orders written into an Amazon SQS queue.

Answer: C,D

NEW QUESTION # 262

A Solutions Architect must update an application environment within AWS Elastic Beanstalk using a blue/ green deployment methodology. The Solutions Architect creates an environment that is identical to the existing application environment and deploys the application to the new environment.

What should be done next to complete the update?

- A. Update the DNS records to point to the green environment
- B. Redirect to the new environment using Amazon Route 53
- **C. Select the Swap Environment URLs option**
- D. Replace the Auto Scaling launch configuration

Answer: C

Explanation:

<https://docs.aws.amazon.com/elasticbeanstalk/latest/dg/using-features.CNAMEswap.html>

NEW QUESTION # 263

When does an AWS Data Pipeline terminate the AWS Data Pipeline-managed compute resources?

- A. AWS Data Pipeline terminates AWS Data Pipeline-managed compute resources every 2 hours.
- **B. When the final activity that uses the resources has completed successfully or failed**
- C. AWS Data Pipeline terminates AWS Data Pipeline-managed compute resources every 12 hours.
- D. When the final activity that uses the resources is running

Answer: B

Explanation:

Compute resources will be provisioned by AWS Data Pipeline when the first activity for a scheduled time that uses those resources is ready to run, and those instances will be terminated when the final activity that uses the resources has completed successfully or failed.

NEW QUESTION # 264

A company plans to move regulated and security-sensitive businesses to AWS. The Security team is developing a framework to validate the adoption of AWS best practice and industry-recognized compliance standards. The AWS Management Console is the preferred method for teams to provision resources.

Which strategies should a Solutions Architect use to meet the business requirements and continuously assess, audit, and monitor the configurations of AWS resources? (Choose two.)

- A. Use the Amazon CloudWatch Events near-real-time capabilities to monitor system events patterns, and trigger AWS Lambda functions to automatically revert non-authorized changes in AWS resources. Also, target Amazon SNS topics to enable notifications and improve the response time of incident responses.
- B. Use AWS CloudTrail events to assess management activities of all AWS accounts. Ensure that CloudTrail is enabled in all accounts and available AWS services. Enable trails, encrypt CloudTrail event log files with an AWS KMS key, and monitor recorded activities with CloudWatch Logs.
- C. Use CloudTrail integration with Amazon SNS to automatically notify unauthorized API activities. Ensure that CloudTrail is enabled in all accounts and available AWS services. Evaluate the usage of Lambda functions to automatically revert non-authorized changes in AWS resources.
- D. Use Amazon CloudWatch Logs agent to collect all the AWS SDK logs. Search the log data using a pre-defined set of filter patterns that machines mutating API calls. Send notifications using Amazon CloudWatch alarms when unintended changes are performed. Archive log data by using a batch export to Amazon S3 and then Amazon Glacier for a long-term retention and auditability.
- E. Use AWS Config rules to periodically audit changes to AWS resources and monitor the compliance of the configuration. Develop AWS Config custom rules using AWS Lambda to establish a test-driven development approach, and further automate the evaluation of configuration changes against the required controls.

Answer: A,B
