- A. Buy more user licenses to increase org limits
- B. Install an Aloha certified App
- C. Upgrade to an Enterprise Edition org
- D. Create and install an unmanaged package

Answer: A,C

NEW QUESTION # 98

Universal Containers uses multiple Salesforce orgs for its different lines of business (LOBs). In a recent analysis, the architect found that UC could have a more complete view of its customers by gathering customer data from different orgs.

What two options can an architect recommend to accomplish the customer 360-degree view?

Choose 2 answers

- A. Implement a Hub-and-Spoke multi-org strategy by consolidating customer data In a single org, which will be the master of customer data,
- B. Implement a Complete Graph multi-org strategy by allowing each org to connect directly to every other, reading and writing customer data
- C. Implement a Single Package multi-org strategy by developing and deploying to all orgs a managed package which reads and consolidates
- D. Migrate from multi-org to single-org strategy, consolidating customer data in the process.

Answer: A,C

NEW QUESTION # 99

Universal Containers has a complex deployment coming up. The deployment will include several Apex classes which depend on custom settings that hold important configuration. How should an Architect manage this deployment?

- A. Create a custom metadata type and include this in your deployment to production
- B. Manually deploy and populate custom settings in production using a change set
- C. Script the deployment of all functionality via the Force.com Migration Tool
- D. Manually deploy and populate the custom settings in production prior to the Apex Class deployment

Answer: A

NEW QUESTION # 100

The CTO at Universal Containers decided to implement the Scrum framework for its agile teams, and communicated a set of Scrum principles to the company.

Which describes a Scrum principle?

- A. Deliver working software, so if a software component is working, avoid changing it.
- B. Respect other teams by not doing their work (a developer should not test the software).
