NEW QUESTION # 295

An administrator notices that the communications between Unisphere and the storage system get interrupted. Which service task should the administrator perform to fix the issue with minimal impact?

- A. Reinitialize
C Enable SSH
- B. Restart Management Software

- C. Reboot Storage Processor

Answer: B

Explanation:

Explanation

The service task that the administrator should perform to fix the issue with minimal impact is Restart Management Software. This service task restarts the management software on both storage processors without affecting the data services or the host I/O. This can resolve the communication issues between Unisphere and the storage system. Reinitialize, Enable SSH, and Reboot Storage Processor are service tasks that have more impact and risk than Restart Management Software.
