## UiPath Agentic Automation Associate Sample Questions (Q61-Q66):

### NEW QUESTION # 61

When a user creates a print job from a VDA-mapped network printer, how is the print job routed?

- A. Directly to the Endpoint printer, bypassing the VDA server.
- B. Directly from the VDA server to the print server and then to the print device for output.
- C. Printing to a network printer is not supported with HDX.
- D. Through the HDX protocol from VDA to Endpoint, and then to the print server.

**Answer: B**

Explanation:

When using a VDA-mapped network printer, the print job is processed on the VDA and sent directly to the network print server, which then forwards it to the physical printer. This avoids unnecessary routing through the client endpoint and ensures efficient printing.

### NEW QUESTION # 62

Scenario: A Citrix Administrator maintains a Citrix Virtual Apps and Desktops Site with a number of network print servers being used for all users. Currently, the print servers use native Windows drivers. No client printers are being used. New company guidelines require a reduction in the number of native drivers being used within the Site infrastructure. Which step can the administrator take to meet the new company guidelines?

- A. Install the Universal Print Server on all print servers in the Site and leave the default Universal printer driver usage policy setting.
- B. Enable the Citrix Universal Print Driver (EMF) driver and leave the default Universal printer driver usage policy setting.
- C. Configure the Citrix Universal Generic Printer and update the Auto-create generic universal printer policy setting.
- **D. Install the Universal Print Server on all print servers in the Site and update the Universal printer driver usage policy setting.**

**Answer: D**

Explanation:

By installing the Citrix Universal Print Server and configuring the Universal printer driver usage policy, print servers can use the Citrix Universal Print Driver instead of multiple native Windows drivers. This reduces the number of drivers in the environment while ensuring centralized network printing remains functional.

### NEW QUESTION # 63
