

AZ-140 Exam Simulation: Configuring and Operating Microsoft Azure Virtual Desktop & AZ-140 Study Guide Materials

DOWNLOAD the newest DumpTorrent AZ-140 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1pXDc3JYvJ4Ua4mDkBEdaKZphvtHd7Yv>

We have a team of experts curating the real AZ-140 questions and answers for the end users. We are always working on updating the latest AZ-140 questions and providing the correct AZ-140 answers to all of our users. We provide free updates for one year from the date of purchase. You can benefit from the updates AZ-140 Preparation material, and you will be able to pass the AZ-140 exam in the first attempt.

Microsoft AZ-140 Exam Syllabus Topics:

Section	Weight	Objectives
Topic 1: Configure access and security	20-25%	- Configure role-based access control (RBAC) • 1. Assign roles to users and groups • 2. Implement the principle of least privilege • 3. Plan Azure Virtual Desktop access roles - Configure security • 1. Implement session security and bandwidth recommendations • 2. Implement Azure Private Virtual Network • 3. Configure Microsoft Defender for Cloud Apps • 4. Configure Conditional Access policies for Azure Virtual Desktop - Configure authentication • 1. Configure Azure AD join for Azure Virtual Desktop • 2. Configure Hybrid AD join for Azure Virtual Desktop • 3. Implement single sign-on (SSO)

Topic 2: Plan and design an Azure Virtual Desktop architecture	15-20%	- Design an Azure Virtual Desktop topology • 1. Design a metadata location for FSLogix • 2. Recommend a naming convention for host pools and session hosts • 3. Recommend network capacity and connectivity • 4. Recommend subscriptions and subscriptions limits - Design a business continuity and disaster recovery (BCDR) strategy • 1. Plan for user profiles • 2. Plan for scenarios requiring multi-session desktop pools • 3. Plan for identity and authentication • 4. Plan for host pool scaling • 5. Recommend appropriate licensing model
Topic 3: Deploy an Azure Virtual Desktop solution	20-25%	- Create and manage session hosts • 1. Implement scaling plans for autoscaling • 2. Configure Azure VM image for host pools • 3. Deploy Windows 10/11 multi-session VMs • 4. Add session hosts to existing host pools - Create and manage workspaces and application groups • 1. Create and configure application groups • 2. Publish applications and desktops • 3. Assign users to application groups • 4. Create and configure workspaces - Create and deploy host pools • 1. Implement a validation environment • 2. Deploy a host pool by using the Azure portal • 3. Configure host pool assignment types (pooled or personal) • 4. Deploy a host pool by using PowerShell or other tools
Topic 4: Manage user experience and desktop settings	15-20%	- Configure remote connections and experience • 1. Configure bandwidth and latency recommendations • 2. Configure quality user experience • 3. Configure Remote Desktop Protocol (RDP) properties • 4. Configure display protocols - Install and configure applications • 1. Configure MSIX app attach • 2. Configure application packages for host pools • 3. Implement session-specific application publishing - Configure user profiles • 1. Implement FSLogix profile containers • 2. Configure profile containers for host pools • 3. Configure cloud cache for FSLogix • 4. Implement user profile disks

Topic 5: Monitor and maintain an Azure Virtual Desktop infrastructure	15-20%	- Troubleshoot Azure Virtual Desktop issues • 1. Troubleshoot application issues • 2. Troubleshoot session host issues • 3. Troubleshoot Azure Virtual Desktop connectivity issues • 4. Troubleshoot user experience issues - Manage resilience and availability • 1. Configure host pool availability options • 2. Implement backup and disaster recovery • 3. Plan for disaster recovery scenarios - Implement monitoring and alerting • 1. Monitor Azure Virtual Desktop with Azure Advisor • 2. Create and configure alerts and notifications • 3. Set up monitoring dashboards • 4. Configure Azure Virtual Desktop insights

100% Pass Quiz 2026 Microsoft AZ-140 Accurate Vce Torrent

Our staff will be on-line service 24 hours a day. I believe that you have also contacted a lot of service personnel, but I still imagine you praise the staff of our AZ-140 study engine. They have the best skills and the most professional service attitude on the AZ-140 Practice Questions. He can solve any problems you have encountered while using AZ-140 exam simulating for all of our staffs are trained to be professional to help our customers. And they are kind and considerate.

Microsoft Configuring and Operating Microsoft Azure Virtual Desktop Sample Questions (Q54-Q59):

NEW QUESTION # 54

You have an Azure Virtual Desktop host pool that runs Windows 10 Enterprise multi-session. User sessions are load-balanced between the session hosts. Idle session timeout is 30 minutes. You plan to shut down a session host named Host1 to perform routine maintenance. You need to prevent new user sessions to Host1 without disconnecting active user sessions.
Solution: From the Azure portal, add lock on Host1. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION # 55

You have an Azure storage account that contains the generalized Windows 10 disk images shown in the following table.

Name	Format	Disk type
Disk1	VHD	Fixed size
Disk2	VHD	Dynamically expanding
Disk3	VHDX	Fixed size
Disk4	VHDX	Dynamically expanding

You need to create an image that will be used to deploy an Azure Virtual Desktop session host.
Which disk should you use?

- A. Disk1
- B. Disk2
- C. Disk3
- D. Disk4

Answer: A

Explanation:

Azure support fixed size VHD disks only. You must convert VHDX to VHD before trying to upload it to Azure.

<https://docs.microsoft.com/en-us/azure/virtual-desktop/set-up-customize-master-image>

NEW QUESTION # 56

You plan to deploy Windows Virtual Desktop.

You need to create Azure NetApp Files storage to store FSLogix profile containers.

Which four actions should you perform in sequence after you register the NetApp Resource Provider? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

Actions

Create a NetApp account.

Create and assign a managed identity.

Create a volume.

Create a capacity pool.

Create an Azure file share.

Configure an Active Directory connection.

Answer Area

Answer:

Explanation:

Actions

Create a NetApp account.

Create and assign a managed identity.

Create a volume.

Create a capacity pool.

Create an Azure file share.

Configure an Active Directory connection.

Answer Area

Create a NetApp account.

Create a capacity pool.

Configure an Active Directory connection.

Create a volume.

Explanation:

1. Set up Azure NetApp Files account

2. Create capacity pool

3. Join Active Directory connection

4. Create new volume

NEW QUESTION # 57

Your network contains an on-premises Active Directory domain that syncs to an Azure Active Directory (Azure AD) tenant. The domain contains the users shown in the following table.

Name	Role	Member of
User1	Desktop Virtualization Workspace Reader	Group1
User2	Desktop Virtualization Application Group Reader	Group2

You have a Windows Virtual Desktop deployment that contains the application groups shown in the following table.

Name	Application	Assignment
AppGroup1	Microsoft Word	Group1
AppGroup2	Microsoft Excel	Group2
AppGroup3	Microsoft PowerPoint	Group1, Group2

You have the workspaces shown in the following table.

Name	Application group
Workspace1	AppGroup1
Workspace2	AppGroup2

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area			
Statements	Yes	No	
User1 has PowerPoint listed in the Remote Desktop client.	☐	☐	
User1 has Word listed in the Remote Desktop client.	☐	☐	
User2 has PowerPoint listed in the Remote Desktop client.	☐	☐	

Answer:

Explanation:

Answer Area

Statements	Yes	No
User1 has PowerPoint listed in the Remote Desktop client.	☐	☒
User1 has Word listed in the Remote Desktop client.	☒	☐
User2 has PowerPoint listed in the Remote Desktop client.	☐	☒

NEW QUESTION # 58

You have an Azure virtual machine named VM1 that runs Windows 10 Enterprise multi-session.

You plan to add language packs to VM1 and create a custom image of VM1 for a Windows Virtual Desktop host pool.

You need to ensure that modern apps can use the additional language packs when you deploy session hosts by using the custom image.

Which command should you run first? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

The screenshot shows a PowerShell command prompt with the following parameters:
-TaskPath: "\Microsoft\Windows\AppxDeploymentClient\
-TaskName: "License Validation"
The command is: Disable-ScheduledTask

Answer:

Explanation:

The screenshot shows a PowerShell command prompt with the following parameters:
-TaskPath: "\Microsoft\Windows\AppxDeploymentClient\
-TaskName: "License Validation"
The command is: Disable-ScheduledTask

Explanation:

The screenshot shows a PowerShell command prompt with the following parameters:
-TaskPath: "\Microsoft\Windows\AppxDeploymentClient\
-TaskName: "License Validation"
The command is: Disable-ScheduledTask

NEW QUESTION # 59

.....

In this fast-changing world, the requirements for jobs and talents are higher, and if people want to find a job with high salary they must boost varied skills which not only include the good health but also the working abilities. But if you get the AZ-140 certification, your working abilities will be proved and you will find an ideal job. We provide you with AZ-140 Exam Materials of high quality which can help you pass the AZ-140 exam easily. It also saves your much time and energy that you only need little time to learn and prepare for AZ-140 exam.
