CCM Echte Fragen & CCM Exam Fragen

Heutzutage, wo Zeit in dieser Gesellschaft sehr geschätzt wird, schlage ich Ihnen vor, die effizienten Medical Professional CCM (Certified Case Manager Certification Exam (CCM)) Fragenkataloge von Fast2test zu wählen. Sie können mit weniger Zeit und Geld die Medical Professional CCM Zertifizierungsprüfung nur einmalig bestehen können.

Medical Professional Certified Case Manager Certification Exam (CCM) CCM Prüfungsfragen mit Lösungen (Q92-Q97):

92. Frage

Which one of the following is NOT considered a change made in the 2017 edition of the FIDIC Red, Yellow, and Silver Books?

- A. New procedures requiring the Contractor to prepare and implement a Quality Management System to show compliance with the Contract requirements.
- **B. New procedures requiring the Contractor to prepare and implement a Compliance Verification System to show that the design, materials, workmanship and certain other matters all comply.**
- C. A fair and balanced approach where risk is allocated to the Party that is best able to bear and control that risk.
- D. The concentration on dispute avoidance, including an enhanced role for the Dispute Avoidance and Adjudication Board (DAAB) in this respect, and promoting cooperation between the parties during the project.

Antwort: B

Begründung:

Comprehensive and Detailed Explanation:

Option D is not a new procedure introduced in the 2017 FIDIC editions.

The 2017 editions focus on dispute avoidance (A), quality management systems (B), and fair risk allocation (C), but do not explicitly require a Compliance Verification System as described.

93. Frage

(Under FIDIC Red Book (edition 1999) a notice may be delivered to which two addresses?
Choose all of the correct answers (multiple possibilities).)

- A. The address of the Site.
- **B. The address stated in the Contract Data.**
- C. The address of the Contractor 's Representative.
- **D. The address provided for by the recipient of the notice.**

Antwort: B,D

Begründung:

Under FIDIC Red Book 1999, Sub-Clause 1.3 [Communications] governs the delivery of notices and other communications. The clause clearly specifies that communications must be sent to the addresses stated in the Contract Data. This ensures certainty, traceability, and contractual validity of all formal correspondence between the Parties.

Option A is therefore correct, as the Contract Data defines the official addresses for communication. These addresses are agreed at the outset and form the primary reference point for valid notice delivery.

Option B is also correct. Sub-Clause 1.3 further allows that if a Party notifies the other of a change of address, then communications may be delivered to that updated address. This reflects practical contract administration, where offices or contact details may change during the project lifecycle. However, such change must be formally communicated.

Option C is incorrect because the Site address is not automatically a valid address for formal notices unless explicitly stated in the Contract Data. Delivering notices to the Site could create disputes regarding receipt and validity.

Option D is also incorrect. While the Contractor's Representative plays a key role in project execution (under Clause 4.3), the Representative's address is not necessarily the formal address for contractual notices unless it is specifically designated in the Contract Data.

This clause highlights the importance of proper notice procedures in FIDIC contracts, as improper delivery may invalidate claims or contractual rights.

94. Frage

Regarding the FIDIC Red Book (edition 1999): which two statements are true in respect of Building Information Modelling (BIM)?
Choose all of the correct answers (multiple possibilities).

- A. BIM is not related to the improvement of quality, accuracy, delivery times and cost savings.
- **B. BIM is one of the digital data technologies used in all aspects of project planning, investigation, design, construction and operation.**
- **C. For construction or building projects involving BIM, many Sub-Clauses of FIDIC Red Book (edition 2017) should be thoroughly reviewed when drafting the Particular Conditions.**
- D. General Conditions of Contract require the use of BIM.

Antwort: B,C

Begründung:

Option B is correct: BIM is indeed a digital data technology applicable throughout the project lifecycle.

Option D is correct: Use of BIM requires careful consideration of contract clauses and appropriate adjustments in Particular Conditions.

Option A is incorrect; the 1999 edition does not mandate BIM use.

Option C is false; BIM improves quality, accuracy, delivery times, and cost efficiency.

95. Frage

Applying FIDIC Silver Book (edition 1999), which one of the following elements shall not form part of the time Programme/revised programme?

- A. Review periods under Sub-Clause 5.2.
- B. The sequence and timing of inspections and tests.
- C. The remedial work (if any) instructed under Sub-Clause 7.6.
- D. The intended order of the works.

Antwort: C

Begründung:

Comprehensive and Detailed Explanation:

According to the FIDIC Silver Book, 1999 Edition (The Conditions of Contract for EPC/Turnkey Projects), the Contractor is required under Sub-Clause 8.3 ("Programme") to submit a time programme that illustrates the sequence and timing of the works, including milestones and key events. The intended order of the works (Option A), sequence and timing of inspections and tests (Option B), and review periods (Option D) related to contract management processes such as approval of design or submissions (Sub-Clause 5.2) are integral to effective scheduling and coordination.

However, remedial work instructed under Sub-Clause 7.6, which concerns remedying defects or damage, is generally not part of the initial or revised programme. Instead, remedial works are typically handled as separate tasks or incorporated into specific defect liability or rectification schedules after the main programme has been executed. Such remedial works arise from defects liability obligations and do not belong to the original or revised time programme used to plan the main construction phases.

This distinction is important because the programme reflects planned works execution, whereas remedial work is reactive and may be scheduled separately under defects liability clauses or final project close-out arrangements.

96. Frage

If a FIDIC Red, Yellow, or Silver Book (edition 2017) is applied, in which of the following two cases is the Contractor required to submit a revised programme?

Choose all of the correct answers (multiple possibilities).

- A. To accurately reflect the actual progress of the Works, whenever any Programme ceases to reflect actual progress or is otherwise inconsistent with the Contractor ' s obligations.
- B. To accurately reflect the actual progress of the Works, but only if any Programme ceases to reflect actual progress with at least 42 days.
- C. The Contractor shall revise the Programme only by request from the Engineer or the Employer (in case of FIDIC Silver Book).
- D. Upon a request from the Engineer (under FIDIC Red or Yellow Books) or Employer (under FIDIC Silver Book) notifying it that the Programme fails to comply with the Contract, to a specified extent, or no longer reflects actual progress or is otherwise inconsistent with the Contractor ' s obligations.

Antwort: A,D

Begründung:

Option C is correct: The Contractor must revise the programme whenever it no longer accurately reflects progress or obligations.

Option D is correct: The Contractor must also revise the programme upon formal request if it fails contract compliance or progress reflection.

Option A is incorrect; the Contractor has ongoing obligations beyond formal requests.

Option B is incorrect; no 42-day threshold applies in the contract for revision.
