312-49v11 Pass4sure Pass Guide, 312-49v11 Valid Exam Guide

Many learners feel that they have choice phobia disorder whiling they are choosing reliable 312-49v11 test guide on the internet. If so you can choose our 312-49v11 certification materials. We are the leading position in this field and our company is growing faster and faster because of our professional and high pass-rate 312-49v11 Exam Torrent materials. Every year more than thousands of candidates choose our reliable 312-49v11 test guide materials we help more than 98% of candidates clear exams, we are proud of our 312-49v11 exam questions.

EC-COUNCIL Computer Hacking Forensic Investigator (CHFI-v11) Sample Questions (Q414-Q419):

NEW QUESTION # 414
An investigator is studying a suspicious Windows service discovered on a corporate system that seems to be associated with

malware. The service has a name similar to a genuine Windows service, runs as a SYSTEM account, and exhibits potentially harmful behavior. Which tool and method should the investigator use to study the service's behavior without allowing it to inflict more damage?

- A. Deploy Autoruns for Windows to check if the suspicious service is configured to run at system bootup
- B. Utilize the Windows Service Manager to create an identical service and study its behavior
- C. Inspect the startup folder for the presence of the suspicious service using command prompt commands
- D. Use SrvMan to stop the suspicious service and analyze its impact on the system

Answer: A

NEW QUESTION # 415
After a credential theft at a logistics company in Memphis, Tennessee, investigators review packet captures and event logs to understand how the adversary moved from the VPN gateway to an internal database through several intermediate hosts. Their immediate goal is to reconstruct the sequence of network hops the attacker used across segments. Which outcome of network forensics best fits this objective?

- A. Path of intrusion
- B. Source of security incidents
- C. Intrusion techniques an attacker used
- D. Traces and evidence

Answer: A

Explanation:
The best answer is A because the question is focused on reconstructing the route the attacker followed through the environment. The wording emphasizes movement from the VPN gateway to an internal database through intermediate hosts, which is a classic path-reconstruction problem. In CHFI v11, network forensics includes examining packet captures, correlating logs, tracing attack progression, and understanding how malicious activity moves across systems. While identifying the source of the incident can also matter, this scenario is not primarily asking where the attack began. It asks for the sequence of hops used after entry.
Likewise, intrusion techniques concern methods such as credential abuse, lateral movement protocols, or exploitation mechanisms, but those are secondary to the immediate objective stated in the question. Traces and evidence is too general and does not describe a specific analytical outcome. In exam reasoning, when the investigator's task is to map the movement chain across devices and segments, the most precise result is the path of intrusion. That outcome helps analysts understand lateral movement, affected assets, and the order in which the attacker progressed through the network.

NEW QUESTION # 416
Which of the following are small pieces of data sent from a website and stored on the user's computer by the user's web browser to track, validate, and maintain specific user information?

- A. Web Browser Cache
- B. Open files
- C. Cookies
- D. Temporary Files

Answer: C

NEW QUESTION # 417
Cybercriminals sometimes use compromised computers to commit other crimes, which may involve using computers or networks to spread malware or Illegal Information. Which type of cybercrime stops users from using a device or network, or prevents a company from providing a software service to its customers?

- A. Phishing
- B. Malware attack
- C. Ransomware attack
- D. Denial-of-Service (DoS) attack

Answer: C

NEW QUESTION # 418
An intrusion detection system (IDS) gathers and analyzes information from within a computer or a network to identify any possible violations of security policy, including unauthorized access, as well as misuse.
Which of the following intrusion detection systems audit events that occur on a specific host?

- A. File integrity checking
- B. Network-based intrusion detection
- C. Log file monitoring
- D. Host-based intrusion detection

Answer: D

NEW QUESTION # 419
.....

With the arrival of a new year, most of you are eager to embark on a brand-new road for success (312-49v11 test prep). Now since you have made up your mind to embrace an utterly different future, you need to take immediate actions. Using 312-49v11 practice materials, from my perspective, our free demo is possessed with high quality which is second to none. This is no exaggeration at all. Just as what have been reflected in the statistics, the pass rate for those who have chosen our 312-49v11 Exam Guide is as high as 99%, which in turn serves as the proof for the high quality of our practice torrent.
