220-1201 Questions Exam & Latest New Exam Experience Ensure you High Pass Rate for 220-1201: CompTIA A+ Core 1 Exam (2026) Easily

It is an incredible opportunity among all candidates fighting for the desirable exam outcome to have our 220-1201 practice materials. With the help of our hardworking experts, our 220-1201 exam braindumps have been on the front-front of this industry and help exam candidates around the world win in valuable time. With years of experience dealing with exam, they have thorough grasp of

knowledge which appears clearly in our 220-1201 Actual Exam. To choose us is to choose success!

CompTIA A+ Core 1 Exam (2026) Sample Questions (Q50-Q55):

NEW QUESTION # 50

An IT specialist compares Bluetooth and NFC technologies for mobile device connectivity. Which of the following statements accurately describes a key difference between the two?

- **A. NFC works best within a few centimeters, but Bluetooth can connect devices that are up to 32ft (10m) apart.**
- B. NFC is faster than Bluetooth when transferring large files between devices.
- C. NFC consumes more power than Bluetooth, making it less suitable for devices in which battery conservation is crucial.
- D. NFC requires pairing with the receiving host, whereas Bluetooth just needs the available connection.

Answer: A

Explanation:

NFC (Near-Field Communication) operates at very short ranges - usually less than 4cm, and is ideal for quick, secure transactions like contactless payments. Bluetooth supports longer ranges (up to 10 meters or 32 feet) and is suited for ongoing connections like wireless headsets or file transfers.

Option A: Bluetooth is faster for large file transfers.

Option B: NFC uses less power, not more.

Option C: NFC does not require pairing - Bluetooth does.

CompTIA A+ Core 1 Exam Objective Reference:

Objective 1.5: Given a scenario, connect and configure accessories and ports of mobile devices.

NEW QUESTION # 51

A technician needs to move a workstation to a different logical network segment. Which of the following technologies should the technician use?

- **A. VLAN**
- B. DNS
- C. DHCP
- D. VPN

Answer: A

Explanation:

Comprehensive and Detailed In-Depth Explanation:

AVLAN (Virtual LAN) is used to logically segment a network without requiring physical separation. It enables grouping devices based on function or department regardless of their physical location.

* Option A (DHCP): Assigns IP addresses dynamically but doesn't create network segments.

* Option C (DNS): Resolves domain names to IP addresses, not used for network segmentation.

* Option D (VPN): Provides secure remote access but does not relate to logical segmentation within a local network.

CompTIA A+ Core 1 Exam Objective Reference:

* Objective 2.3: Explain common logical networking concepts.

NEW QUESTION # 52

Which connector is used to uplink a new ISP cable modem to its wall jack?

- **A. F-type**
- B. Lightning
- C. LC
- D. RJ45

Answer: A

Explanation:

Cable modems supplied by ISPs connect to the coaxial wall outlet using an F-type connector. CompTIA A+ specifies that F-type connectors are threaded coaxial connectors used in broadband cable internet, cable TV, and some satellite systems. They attach to

RG-6 or RG-59 coaxial cable and provide a secure, shielded connection to the cable provider's infrastructure.

The cable modem requires this coaxial uplink to receive downstream and upstream signals from the ISP before converting them into Ethernet on the LAN side.

LC (B) is for fiber optic connectors, not coaxial. RJ45 (C) is an Ethernet connector and is used on the LAN side of the modem-not on the wall uplink. Lightning (D) is an Apple connector and irrelevant to networking hardware.

Thus, the correct connector for the ISP cable modem uplink is F-type.

NEW QUESTION # 53

Which of the following devices is designed specifically to allow multiple network devices to communicate across a single platform?

- A. Switch
- B. Firewall
- C. NIC
- D. Routers

Answer: A

Explanation:

A switch is designed to connect multiple network devices within the same network and enable them to communicate with each other efficiently over a single platform by forwarding data frames based on MAC addresses.

NEW QUESTION # 54

A company deploys its infrastructure in self-operated data centers. The company recently migrated some of its applications to a public cloud. Which of the following most accurately describes the cloud model the company is following?

- A. Public
- B. Private
- C. Hybrid
- D. Community

Answer: C

Explanation:

A hybrid cloud combines private infrastructure (on-premises, self-operated data centers) with public cloud services, providing flexibility and scalability.

From CompTIA A+ 220-1101 Official Study Guide, Objective 3.7 - Cloud concepts:

"A hybrid cloud model integrates private and public cloud infrastructure to allow applications and data to be shared between them"
