

Professional 2V0-11.25 Learning Materials | 2V0-11.25 100% Free Reliable Exam Camp

BONUS!!! Download part of ITPassLeader 2V0-11.25 dumps for free: <https://drive.google.com/open?id=1UENBbv4bBvXAtsZzdZvbIFHQ4VrHOcld>

Possessing VMware certification will be a standard to test IT workers' qualifications. 2V0-11.25 reliable exam preparation will be a key to a certification. If you want to apply for a senior management position, one certification will be an outstanding advantage. I advise people pass exams and get certifications with 2V0-11.25 Reliable Exam Preparation as soon as possible so that you will be one step ahead while facing better job opportunities.

VMware 2V0-11.25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Plan and Design the VMware by Broadcom Solution: There are no testable objectives in this section. Still, it is intended for solution architects who need to plan and design VMware Cloud Foundation deployments, focusing on sizing, architecture selection, and network storage design.
Topic 2	<ul style="list-style-type: none"> VMware by Broadcom Solution: This section of the exam measures skills of the cloud administrator and covers identifying VMware Cloud Foundation components like vSphere, vSAN, and NSX, as well as their architecture, including stretched configurations. It also assesses knowledge of requirements for implementing private cloud solutions, use cases for VMware Aria Suite components, vSphere IaaS control plane, Data Services Manager, and VMware Cloud Foundation Add-Ons. The focus is on the ability to recognize and apply the correct VMware solutions for various enterprise scenarios.
Topic 3	<ul style="list-style-type: none"> Install, Configure, Administrate the VMware by Broadcom Solution: This section of the exam measures skills of the VMware Cloud Foundation administrator and covers the installation and configuration processes for VMware Cloud Foundation components, deploying and configuring management domains, NSX Edge Clusters, and the VMware Aria Suite Lifecycle. It assesses the ability to deploy workload domains, enable vSphere IaaS control plane, create vSphere namespaces, manage stretched clusters, and use VMware Cloud Foundation APIs. Candidates are also tested on scaling deployments, performing Day 2 operations like backup, recovery, lifecycle management, VM lifecycle management, configuring networking and storage, managing ESXi hosts, implementing encryption, and operationalizing VMware NSX, vSAN, and Aria Suite. The section is comprehensive, targeting those responsible for the ongoing administration and optimization of VMware environments.

Topic 4	<ul style="list-style-type: none"> • Troubleshoot and Optimize the VMware by Broadcom Solution: This section of the exam measures skills of the cloud infrastructure support engineer and covers diagnosing and resolving technical issues related to VMware Cloud Foundation deployment and operations. It includes troubleshooting the deployment process, vSphere, networking, vSAN, SDDC Manager, and Aria Suite. The section also evaluates the ability to optimize infrastructure performance, manage resources, and ensure efficient operation, focusing on the practical aspects of maintaining and enhancing VMware Cloud Foundation environments.
Topic 5	<ul style="list-style-type: none"> • IT Architectures, Technologies, Standards: There are no testable objectives in this section. However, this area establishes the foundational knowledge expected of cloud administrators, such as understanding basic IT infrastructure, virtualization, and cloud models. This section is relevant for cloud administrators and infrastructure engineers.

Reliable VMware 2V0-11.25 Exam Camp & 2V0-11.25 Reliable Dumps Book

Do you always feel that your gains are not proportional to your efforts without valid 2V0-11.25 study torrent? Do you feel that you always suffer from procrastination and cannot make full use of your sporadic time? If your answer is absolutely yes, then we would like to suggest you to try our 2V0-11.25 Training Materials, which are high quality and efficiency test tools. Your success is 100% ensured to pass the 2V0-11.25 exam and acquire the dreaming 2V0-11.25 certification which will enable you to reach for more opportunities to higher incomes or better enterprises.

VMware Cloud Foundation 5.2 Administrator Sample Questions (Q142-Q147):

NEW QUESTION # 142

Which feature of VMware Data Services Manager enhances database security and compliance?

- A. Database-Level Authentication
- B. Network traffic optimization
- C. Storage replication
- D. Automated workload migration

Answer: A

Explanation:

VMware Data Services Manager enhances database security and compliance by providing Database-Level Authentication, which ensures that access to databases is tightly controlled and that only authorized users can access sensitive database information. This is critical for maintaining security and compliance with industry standards and regulations.

NEW QUESTION # 143

DRAG DROP

Arrange the steps in the correct order to generate a performance report in Aria Operations.

Answer:

Explanation:

A screenshot of a computer AI-generated content may be incorrect.

NEW QUESTION # 144

An administrator is troubleshooting a high CPU usage issue of the SDDC Manager VM. Access to SDDC Manager UI is exhibiting degraded performance.

What two steps should the administrator take to diagnose the issue? (Choose two.)

- A. Login to SDDC Manager using console with root credentials, run the top command to identify any services that may be consuming high %CPU.
- B. Reboot the SDDC Manager VM to clear any temporary issues.
- C. Upgrade the vSphere version to the latest release.
- D. Review the CPU usage of the ESXi management domain hosts to identify any that are overcommitted.
- E. Reconfigure the DRS settings to be more aggressive in load balancing.

Answer: A,D

Explanation:

When troubleshooting high CPU usage on the SDDC Manager VM, the recommended diagnostic steps are:

Login to SDDC Manager using console with root credentials, run the top command to identify any services that may be consuming high %CPU (B):The official documentation instructs administrators to use system monitoring commands such as top or htop within the SDDC Manager appliance to determine if specific processes or services are causing elevated CPU usage. This helps pinpoint the root cause inside the VM.

Review the CPU usage of the ESXi management domain hosts to identify any that are overcommitted (D):

High CPU usage within the SDDC Manager VM could also result from overall CPU contention on the physical ESXi hosts.

Checking host-level CPU usage can help determine if the underlying infrastructure is contributing to the performance issue. The documentation emphasizes reviewing host resource metrics to ensure the management cluster is not overcommitted.

Other options such as rebooting the VM, upgrading vSphere, or modifying DRS settings are not recommended as initial diagnostic steps according to official guidance. Rebooting or changing configurations without proper analysis may disrupt services or not address the root cause.

NEW QUESTION # 145

What are two benefits of enabling workload Management on a vSphere Cluster within a VI Workload Domain using SDDC Manager? (Choose two.)

- A. It allows the deployment of traditional VMs with enhanced performance.
- B. It enhances the security of the vSphere cluster.
- C. It integrates vSphere with third-party cloud providers.
- D. It integrates the vSphere supervisor with NSX Networking.
- E. It enables the use of Kubernetes for container orchestration on the vSphere cluster.

Answer: D,E

Explanation:

Workload Management integrates the vSphere Supervisor with NSX networking to provide Kubernetes control plane connectivity. It enables Kubernetes-based container orchestration directly on the vSphere cluster via the Supervisor control plane.

NEW QUESTION # 146

What three steps are required to commission a new host into the SDDC Manager inventory? (Choose three.)

- A. Four NIC ports with a minimum 10 Gbps speed.
- B. A supported version of ESXi installed on the host.
- C. Delete all disk partitions on HDD/SSD.
- D. Update the DNS records and add the host directly to the SDDC Manager appliance using the root credentials.
- E. Manually import the host into the vCenter Server inventory and assign it to a cluster.
- F. Self-signed certificate regenerated based on FQDN of host.

Answer: B,C,F

Explanation:

As documented in the official VMware Cloud Foundation Administration Guide for Host Commissioning:

A . Self-signed certificate regenerated based on FQDN of host.

Exact Extract:

"During the commissioning process, SDDC Manager regenerates a self-signed certificate for the host based on its FQDN to ensure secure communications and integration with the management domain." C . Delete all disk partitions on HDD/SSD.

Exact Extract:

"Before commissioning, all partitions must be deleted from the host's disks to allow SDDC Manager to claim storage for vSAN or
