

Most SDS Reliable Questions | Amazing Pass Rate For SDS: Senior Data Scientist | Free SDS Pdf Guide

P.S. Free 2026 DASCA SDS dumps are available on Google Drive shared by Getcertkey: <https://drive.google.com/open?id=1QBvWCRYAtfkEd0NnAhMcjcbRhUYqTWfv>

A free demo of SDS practice test questions and up to 1 year of free updates are also available at Getcertkey. So, this is the time to download valid SDS exam questions and start studying. There is no room for delays in SDS Preparation exams or second thoughts when you know that you have to survive the competition and safeguard your job.

You have to put in some extra effort, time, and investment and prepare well to pass this milestone. Do you have a plan to get success in the DASCA SDS certification exam? Are you looking for the right study material that ensures your success in the Getcertkey new real DASCA SDS Exam Questions on your first attempt? If your answer is yes then you just need to get help from Getcertkey practice exam questions.

Free SDS Pdf Guide, New SDS Test Testking

In the information society, everything is changing rapidly. In order to allow users to have timely access to the latest information, our SDS real exam has been updated. Our update includes not only the content but also the functionality of the system. The content of the SDS training guide is the real questions and answers which are always kept to be the latest according to the efforts of the professionals. And we apply the newest technologies to the system of our SDS exam questions.

DASCA Senior Data Scientist Sample Questions (Q30-Q35):

NEW QUESTION # 30

Which of the following is NOT an example of the applications of neural networks?

- A. Stock market prediction
- B. Character recognition
- C. Image compression
- **D. Traveling salesman's problem**
- E. None of the above

Answer: D

Explanation:

Neural networks have been widely applied in various domains:

Option A (Character recognition): Correct application - neural networks are highly effective for OCR (Optical Character Recognition).

Option B (Stock market prediction): Correct application - neural networks are used to model time-series and nonlinear patterns in finance.

Option D (Image compression): Correct application - neural nets (autoencoders) are used for dimensionality reduction and compression.

Option C (Traveling salesman's problem): NOT a typical neural network application. This is a combinatorial optimization problem usually solved with heuristics, dynamic programming, or optimization algorithms (not standard neural networks).

Thus, the correct answer is Option C (Traveling salesman's problem).

NEW QUESTION # 31

Which of the following is TRUE for data lake?

- A. The data lake can make both of the Business Intelligence and Data Science environments less agile and more productive
- **B. The data lake enables organizations to gather, manage, enrich, and analyze many new sources of data, whether structured or unstructured**
- **C. The data lake can make both of the Business Intelligence and Data Science environments more agile and more productive**
- **D. The data lake enables organizations to treat data as an organizational asset to be gathered and nurtured versus a cost to be minimized**
- E. None of the above

Answer: B,C,D

Explanation:

But per MCQ single-choice format # answer: A (though ideally A, B, C are correct).

A data lake is a centralized repository designed to store raw, structured, semi-structured, and unstructured data at scale. It provides: Agility and productivity (Option A): Data lakes support flexible ingestion and faster access, making BI and data science environments more efficient.

Data integration (Option B): They handle multiple types of data, enabling advanced analytics and machine learning use cases.

Data as an asset (Option C): They shift perspective, treating data as a strategic resource, not just a storage cost.

Option D: Incorrect. Data lakes improve agility, not reduce it.

Option E: Incorrect, since multiple true statements exist.

Thus, the correct choice per DASCA context is Option A (with B and C also being true).

NEW QUESTION # 32

Which of the following is the most important part of Hadoop?

- A. MapReduce Framework
- **B. Both A and B**
- C. Both B and C

- D. Spark Framework
- E. Hadoop Distributed File System (HDFS)

Answer: B

Explanation:

The Hadoop ecosystem consists of multiple components, but the two core components that define Hadoop are:

HDFS (Hadoop Distributed File System): Provides fault-tolerant, scalable storage across distributed clusters.

It is the backbone for storing massive datasets in a distributed fashion.

MapReduce Framework: Provides the parallel computing and data processing layer in Hadoop, enabling batch analysis over distributed datasets.

Option A: Correct, HDFS is essential.

Option B: Correct, MapReduce is essential.

Option C: Incorrect, Spark is a newer processing framework, but it is not originally part of Hadoop core.

Option D: Correct answer since both HDFS and MapReduce are considered the fundamental parts of Hadoop.

Option E: Incorrect, because Spark is not a core Hadoop component (though it integrates with Hadoop).

NEW QUESTION # 33

Which of the following is TRUE for Tensor?

- A. All of the above
- B. Tensor is used to describe multidimensional arrays of numbers on which we perform linear operations
- C. Tensor is an array of floating-point numbers
- D. Both B and C
- E. In Tensor, there can be arbitrarily many dimensions to the array

Answer: A

Explanation:

A Tensor is a fundamental data structure in modern machine learning frameworks (e.g., TensorFlow, PyTorch). It is best described as a generalization of vectors and matrices to potentially higher dimensions.

Option A: Correct. Tensors typically store numeric values (commonly floating-point numbers) in structured formats.

Option B: Correct. A tensor can have any number of dimensions (rank). For example:

A scalar is a 0-D tensor.

A vector is a 1-D tensor.

A matrix is a 2-D tensor.

Higher-rank tensors can represent images, videos, or multidimensional datasets.

Option C: Correct. Tensors are explicitly designed to allow linear algebra operations, which are the foundation of deep learning computations (matrix multiplications, dot products, etc.).

Therefore, since all three statements are true, the correct answer is Option E (All of the above).

NEW QUESTION # 34

Bernoulli random variable is a type of:

- A. Continuous random variable
- B. Both A and B
- C. Discrete random variable
- D. Sometimes Discrete or sometimes Continuous random variable

Answer: C

Explanation:

A Bernoulli random variable is the simplest form of discrete random variable.

It can take only two values:

1 with probability p (success).

0 with probability $(1 - p)$ (failure).

Since the outcomes are finite (binary), it is a discrete random variable.

Option B (Continuous): Incorrect, as continuous variables take values from an interval (e.g., real numbers).

Option C and D: Incorrect, as Bernoulli is always discrete, never continuous.

Thus, the correct answer is Option A (Discrete random variable).

NEW QUESTION # 35

.....

The DASCA SDS test materials are mainly through three learning modes, Pdf, Online and software respectively. The SDS test materials have a biggest advantage that is different from some online learning platform which has using terminal number limitation, the Senior Data Scientist SDS Quiz torrent can meet the client to log in to learn more, at the same time, the user can be conducted on multiple computers online learning, greatly reducing the time, and people can use the machine online of Senior Data Scientist SDS test prep more conveniently at the same time.
