ISACA AAISM Exam Questions–Most Practical Way to Pass Exam

Dumps4PDF AAISM exam dumps are audited by our certified subject matter experts and published authors for development. AAISM exam dumps are one of the highest quality AAISM Q&AS in the world. It covers nearly 96% real questions and answers, including the entire testing scope. Dumps4PDF guarantees you Pass AAISM Exam at first attempt.

ISACA AAISM Exam Syllabus Topics:

Topic	Details
Topic 1	• AI Governance and Program Management: This section of the exam measures the abilities of AI Security Governance Professionals and focuses on advising stakeholders in implementing AI security through governance frameworks, policy creation, data lifecycle management, program development, and incident response protocols.
Topic 2	• AI Technologies and Controls: This section of the exam measures the expertise of AI Security Architects and assesses knowledge in designing secure AI architecture and controls. It addresses privacy, ethical, and trust concerns, data management controls, monitoring mechanisms, and security control implementation tailored to AI systems.
Topic 3	• AI Risk Management: This section of the exam measures the skills of AI Risk Managers and covers assessing enterprise threats, vulnerabilities, and supply chain risk associated with AI adoption, including risk treatment plans and vendor oversight.

Hot AAISM Minimum Pass Score | Efficient AAISM: ISACA Advanced in AI Security Management (AAISM) Exam 100% Pass

Our company pays high attentions to the innovation of our AAISM study materials. We constantly increase the investment on the innovation and build an incentive system for the members of the research expert team. Our experts group specializes in the research and innovation of our AAISM Study Materials and supplements the latest innovation and research results into the AAISM study materials timely.

ISACA Advanced in AI Security Management (AAISM) Exam Sample Questions (Q95-Q100):

NEW QUESTION # 95
A data scientist creating categories and training the algorithm on large data sets is an example of which type of AI model learning technique?

- A. Supervised
- B. Reinforcement
- C. Unsupervised
- D. Machine learning (ML)

Answer: A

Explanation:
AAISM classifies learning paradigms by the presence of labeled targets. Creating categories (labels) and training on them is supervised learning, where input features are mapped to known outputs and optimization minimizes prediction error against ground truth. Unsupervised (B) discovers structure without labels; reinforcement (A) optimizes behavior via rewards; "machine learning" (C) is the broad field, not the specific technique.
References: AI Security Management™ (AAISM) Body of Knowledge - AI/ML Foundations; Learning Paradigms and Data Requirements. AAISM Study Guide - Supervised vs. Unsupervised vs. Reinforcement Learning; Label Quality and Model Performance Dependencies.

NEW QUESTION # 96
An organization plans to use an open-source foundational AI model. Which of the following is MOST important for the AI governance committee to consider when approving its use?

- A. Employee privacy rights
- B. Confidential data leakage
- C. AI model support
- D. AI model accuracy

Answer: B

Explanation:
AAISM emphasizes that open-source AI models present elevated data leakage risks because internal data may flow into external, uncontrolled repositories or be used for further training. Governance bodies must prioritize the risk of data exposure, model reuse, data retention uncertainty, and uncontrolled model behavior.
While accuracy (B) and support (C) are important operational considerations, they are not the primary governance risk. Employee privacy rights (D) matter but are encompassed within the broader risk of data leakage.
References: AAISM Study Guide - Open-Source AI Governance; Data Leakage and Uncontrolled Model Behavior.

NEW QUESTION # 97
Which of the following BEST enables an organization to maintain visibility to its AI usage?

- A. Measuring the impact of AI implementation using key performance indicators (KPIs)
- B. Maintaining a comprehensive inventory of AI systems and business units that leverage them
- C. Ensuring the board approves the policies and standards that define corporate AI strategy
- D. Maintaining a monthly dashboard that captures all AI vendors

Answer: B

Explanation:
The AAISM framework stresses that the most effective way to maintain oversight of organizational AI usage is by maintaining a

comprehensive inventory of all AI systems and the business units using them. Such an inventory provides a centralized, transparent record of where AI is deployed, ensuring accountability, monitoring, and compliance. While board approval, dashboards, and KPIs are important governance tools, they do not provide holistic visibility across the enterprise. The inventory ensures traceability and governance alignment, making it the best method to maintain visibility of AI usage.

AAISM Study Guide - AI Governance and Program Management (AI Inventories) ISACA AI Security Management - Centralized Oversight of AI Assets

NEW QUESTION # 98

A large financial services organization is integrating a third-party AI solution into its critical fraud detection system. Which of the following is the BEST way for the organization to reduce risk associated with AI vendor and supply chain dependencies?

- A. Focusing on performance testing to ensure the solution meets operational requirements
- B. Implementing isolated virtual environments to validate the integration of the fraud detection system with the solution
- C. Conducting annual vulnerability assessments of the fraud detection system after integration
- D. Establishing contractual agreements requiring vendors to provide evidence of secure development practices

Answer: D

Explanation:
AAISM emphasizes supplier assurance through contractual obligations as the foundational control for AI supply chain risk. Contracts should require verifiable evidence of secure development practices (e.g., secure SDLC, model and data provenance documentation, SBOM/MBOM where applicable, vulnerability disclosure, patch SLAs, audit rights, incident notification, and regulatory compliance assertions). This creates enforceable, continuous assurance beyond point-in-time tests.
* A is necessary but reactive and limited to your environment.
* B addresses performance, not supply chain security.
* D is a good isolation/validation practice but does not create vendor accountability across the lifecycle.

NEW QUESTION # 99

Which area of intellectual property law presents the GREATEST challenge in determining copyright protection for AI-generated content?

- A. Enforcing trademark rights associated with AI systems
- B. Protecting trade secrets in AI technologies
- C. Establishing licensing frameworks for AI-generated works
- D. Determining the rightful ownership of AI-generated creations

Answer: D

Explanation:
AAISM governance content highlights that the greatest intellectual property challenge in the context of AI- generated works is determining rightful ownership. Traditional copyright law requires human authorship, but AI-generated creations blur authorship and ownership boundaries, raising legal uncertainty about who can claim rights. Trademark enforcement, trade secret protection, and licensing frameworks are established areas of IP law but do not present the same fundamental challenge as ownership attribution. For AI-generated content, the central legal dilemma is ownership of the creation.

NEW QUESTION # 100

......

You need to do something immediately to change the situation. For instance, the first step for you is to choose the most suitable AAISM actual dumps for your coming exam. Just like the old saying goes, the little things will determine success or failure.so the

study materials is very important for you exam, because the study materials will determine whether you can pass the AAISM Exam successfully or not. However, how to choose the best and suitable study materials for yourself in a short time? It is very difficult for a lot of people to do a correct choice, especially these people who have no any experience about the AAISM exam. We would like to tell you how to buy the most suitable and helpful study materials.
