With innovative science and technology, our study materials have grown into a powerful and favorable product that brings great benefits to all customers. Under the support of our ASVAB Study Materials, passing the ASVAB exam won't be an unreachable mission.

College Admission Armed Services Vocational Aptitude Battery (ASVAB) Sample Questions (Q24-Q29):

NEW QUESTION # 24
One of the equal angles of an isosceles triangle is 40 degrees. What is thi angle opposite the unequal side?

- A. 100 degrees
- B. 40 degrees
- C. 90 degrees
- D. 140 degrees

Answer: A

Explanation:
In an isosceles triangle, two of the sides are equal. This means that the angles opposite them are equal, too. If one is 40 degrees, then so is the other. To find the angle opposite the unequal side, begin by adding the equal angles.
40+40=80 degrees
To find the third angle, subtract this amount from 180 (the number of degrees in any triangle) 180 -80=100 degrees (third angle)

NEW QUESTION # 25
For a special operations air assualt mission, one extra soldier for the security element is to be chosen at random from among three soldiers from the 327th Infantry Regiment, two soldiers from the 502nd Infantry Regiment, and five soldiers from the 187th Infantry Regiment. What is the probability that a soldier from the
327th Infantry Regiment will be chosen?

- A. 1/3
- B. 1/10
- C. 3/10
- D. 3/7

Answer: C

Explanation:
The probability of an event occurring is the number of "favorable" outcomes divided by the total possible number of outcomes. Since there are three soldiers from the 327th from which to choose, there are three possible favorable outcomes for choosing a soldier from that unit. Since the choice will be made from among a total of 10 soldiers, there are 10 different possible outcomes. The probability of choosing a soldier from the 327th Infantry Regiment is 3/10.

NEW QUESTION # 26
The amount that a machine (simple or complex) multiplies your force or effort is called

- A. load distance.
- B. resistance effect.
- C. mechanical advantage.
- D. acceleration.

Answer: C

Explanation:

The amount that a machine (simple or complex) multiplies your force or effort is called mechanical advantage.Load distanceis how far the load moves when force is applied, andaccelerationis the change in velocity or speed in a certain direction.

NEW QUESTION # 27

The base of a cylindrical can is a circle whose diameter is 2 inches. Its height is 7 inches. How many cubic inches are there in the volume of the can? (Use 22/7 for the value of n).

- A. 0
- B. 124/7
- C. 1
- D. 2

Answer: A

Explanation:
The volume of a cylinder is equal to the product of its height and the area of its base. The base is a circle.
The area of a circle is r2, where = 22 / 7 andris the radius. Since the diameter is 2 inches, the radius (which is one-half the diameter) is I inch.
Area of circular base =
22/7 x 1/1 x 1 / 1 = 22 / 7
The height is 7 inches.
22 / 7 x 7 / 1 = 22 cubic inches

NEW QUESTION # 28

Brawl most nearly means

- A. provide
- B. fight.
- C. speak.
- D. trap.

Answer: B

NEW QUESTION # 29

......

Before starting the College Admission ASVAB preparation, plan the amount of time you will allot to each topic, determine the topics that demand more effort and prioritize the components that possess more weightage in the College Admission ASVAB Exam. This kind of polished approach is beneficial for a commendable grade in the College Admission ASVAB Exam.
