

Newly ACD101 Exam Dumps [2026] For Massive Achievement

P.S. Free 2026 Appian ACD101 dumps are available on Google Drive shared by TorrentExam: <https://drive.google.com/open?id=1VhzteOaNDE7liBYHFshQRLZaHbp46u46>

The evergreen field of Appian is so attractive that it provides non-stop possibilities for the one who passes the Appian ACD101 exam. So, to be there on top of the IT sector, earning the Appian Associate Developer (ACD101) certification is essential. Because of using outdated ACD101 Study Material, many candidates don't get success in the ACD101 exam and lose their resources. The ACD101 PDF Questions of TorrentExam are authentic and real.

Appian ACD101 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Introduction to the Appian Platform: The Appian Associate Developer exam tests the familiarity of aspiring Appian developers with essential Appian resources like online docs and Appian Max, and their abilities to organize application structures. It measures your understanding of how to utilize the capabilities of Appian, such as process mining and RPA, to address business challenges effectively.
Topic 2	<ul style="list-style-type: none"> General Appian Principles: This topic of the ACD101 Exam assesses the knowledge of Appian developers about Appian platform permissions, including role-based security, and differentiates between various design objects like processes and records. It evaluates your understanding of Appian environments as well.
Topic 3	<ul style="list-style-type: none"> Appian Development: Process Models: This topic of the ACD101 exam focuses on your ability to create, debug, and publish process models within Appian. It includes configuring workflow nodes, Smart Services, and understanding data flow in processes.

ACD101 Latest Braindumps & ACD101 Valid Study Plan

Practice tests (desktop and web-based) are simulations of actual Appian ACD101 PDF Questions designed to help individuals prepare and improve their performance for the Appian ACD101 certification test. TorrentExam facilitates the customers with customizable practice tests which means they can adjust the number of questions and set the time of the test according to themselves which will help them in order to feel the real-based exam pressure and control it.

Appian Associate Developer Sample Questions (Q82-Q87):

NEW QUESTION # 82

Review the following code snippet:

```
displayvalue(1, {0, 1, 2}, {"Low", "Medium", "High"}, "Unknown")
```

The definition of displayvalue is:

Tries to match a value in a given array with a value at the same index in a replacement array and returns either the value at the same index or a default value if the value is not found.

What does this code snippet return?

- A. High
- **B. Medium**
- C. Low

Answer: B

Explanation:

The displayvalue() function matches a given value with an array and returns the value at the same index from a replacement array or a default value if not found. In the snippet displayvalue(1, {0, 1, 2}, {"Low", "Medium", "High"}, "Unknown"), the value 1 is matched in the array {0, 1, 2} at index 1. The function then returns the value at index 1 in the array {"Low", "Medium", "High"}, which is "Medium".

NEW QUESTION # 83

Match each Appian Design Object name to the most applicable use case.

Note: Each use case will be used once or not at all. To change your responses, you may deselect your response by clicking the blank space at the top of the selection list.

Answer Area

Custom Data Type (CDT)

Store a reference to a group that will be assigned a task or receive a notification.

Connect Appian to a relational database, establishing relationships between custom data types in Appian and corresponding tables in the database.

Establish a data structure into which a process model can set values prior to writing to the database.

Establish a workflow in which results are written to a database after three (3) users receive a review task in a defined order.

Process Model

Store a reference to a group that will be assigned a task or receive a notification.

Connect Appian to a relational database, establishing relationships between custom data types in Appian and corresponding tables in the database.

Establish a data structure into which a process model can set values prior to writing to the database.

Establish a workflow in which results are written to a database after three (3) users receive a review task in a defined order.

Constant

Store a reference to a group that will be assigned a task or receive a notification.

Connect Appian to a relational database, establishing relationships between custom data types in Appian and corresponding tables in the database.

Establish a data structure into which a process model can set values prior to writing to the database.

Establish a workflow in which results are written to a database after three (3) users receive a review task in a defined order.

Answer:

Explanation:

Custom Data Type (CDT)

Store a reference to a group that will be assigned a task or receive a notification.

Connect Appian to a relational database, establishing relationships between custom data types in Appian and corresponding tables in the database.

Establish a data structure into which a process model can set values prior to writing to the database.

Establish a workflow in which results are written to a database after three (3) users receive a review task in a defined order.

Process Model

Store a reference to a group that will be assigned a task or receive a notification.

Connect Appian to a relational database, establishing relationships between custom data types in Appian and corresponding tables in the database.

Establish a data structure into which a process model can set values prior to writing to the database.

Establish a workflow in which results are written to a database after three (3) users receive a review task in a defined order.

Constant

Store a reference to a group that will be assigned a task or receive a notification.

Connect Appian to a relational database, establishing relationships between custom data types in Appian and corresponding tables in the database.

Establish a data structure into which a process model can set values prior to writing to the database.

Establish a workflow in which results are written to a database after three (3) users receive a review task in a defined order.

Explanation:

* Custom Data Type (CDT): Connect Appian to a relational database, establishing relationships between custom data types in Appian and corresponding tables in the database.

* Process Model: Establish a data structure into which a process model can set values prior to writing to the database.

* Constant: Store a reference to a group that will be assigned a task or receive a notification.

* Custom Data Types (CDTs) define the structure of data within Appian and can be mapped to existing database tables to leverage relational database functionalities. They establish how data is structured and stored in the Appian application.

* Process Models depict the workflow and logic of a business process. They can include user and automated tasks, and they can manipulate and store data before, during, and after the execution of the process.

* Constants are reusable static values that can be referenced within Appian. They can store values like group references, which can then be used for task assignment or notification purposes in process models or other expressions.

NEW QUESTION # 84

Match each node to the correct description for the node.

Note: Each description will be used once. To change your responses, you may deselect your response by clicking the blank space at the top of the selection list.

Answer Area

Timer Event

<input type="checkbox"/>	Can accept multiple paths: when all paths arrive, all outgoing flows are executed at the same time.
<input type="checkbox"/>	Can be added to a flow or attached to a smart service to trigger an Exception Flow or an Escalation.
<input type="checkbox"/>	Can run automated activities.
<input type="checkbox"/>	Can accept one incoming path and select one outgoing path.

XOR Gateway

<input type="checkbox"/>	Can accept multiple paths: when all paths arrive, all outgoing flows are executed at the same time.
<input type="checkbox"/>	Can be added to a flow or attached to a smart service to trigger an Exception Flow or an Escalation.
<input type="checkbox"/>	Can run automated activities.
<input type="checkbox"/>	Can accept one incoming path and select one outgoing path.

Script Task

<input type="checkbox"/>	Can accept multiple paths: when all paths arrive, all outgoing flows are executed at the same time.
<input type="checkbox"/>	Can be added to a flow or attached to a smart service to trigger an Exception Flow or an Escalation.
<input type="checkbox"/>	Can run automated activities.
<input type="checkbox"/>	Can accept one incoming path and select one outgoing path.

AND Gateway

<input type="checkbox"/>	Can accept multiple paths: when all paths arrive, all outgoing flows are executed at the same time.
<input type="checkbox"/>	Can be added to a flow or attached to a smart service to trigger an Exception Flow or an Escalation.
<input type="checkbox"/>	Can run automated activities.
<input type="checkbox"/>	Can accept one incoming path and select one outgoing path.

Answer:

Explanation:

Timer Event

Can accept multiple paths: when all paths arrive, all outgoing flows are executed at the same time.
Can be added to a flow or attached to a smart service to trigger an Exception Flow or an Escalation.
Can run automated activities.
Can accept one incoming path and select one outgoing path.

XOR Gateway

Can accept multiple paths: when all paths arrive, all outgoing flows are executed at the same time.
Can be added to a flow or attached to a smart service to trigger an Exception Flow or an Escalation.
Can run automated activities.
Can accept one incoming path and select one outgoing path.

Script Task

Can accept multiple paths: when all paths arrive, all outgoing flows are executed at the same time.
Can be added to a flow or attached to a smart service to trigger an Exception Flow or an Escalation.
Can run automated activities.
Can accept one incoming path and select one outgoing path.

AND Gateway

Can accept multiple paths: when all paths arrive, all outgoing flows are executed at the same time.
Can be added to a flow or attached to a smart service to trigger an Exception Flow or an Escalation.
Can run automated activities.
Can accept one incoming path and select one outgoing path.

Appian Documentation: Process Modeler Objects

NEW QUESTION # 85

Which types of objects can be called using the "rule! domain " prefix?

- A. Decisions, expression rules, interfaces, and integrations
- B. Connected systems, records, expression rules, and interfaces
- C. Process models, integrations, expression rules, and constants

Answer: A

NEW QUESTION # 86

You have a Custom Data Type (CDT), ABC_book. This CDT is backed by a database table, abc_book, with data store entity, ABC_book. There is also a constant that refers to this data store entity, ABC_DSE_BOOK.

You need to write code to pull back entries from the abc_book table as CDT objects. You only want 10 entries, but you need to know the total number of entries in the table.

Which code snippet accomplishes this goal?

```

a!queryEntity(
  entity: cons!ABC_DSE_BOOK,
  query: a!query(
    pagingInfo: a!pagingInfo(
      startIndex: 1,
      batchSize: -1
    )
  )
)

```

• A.

```

a!queryEntity(
  entity: cons!ABC_DSE_BOOK,
  query: a!query(
    pagingInfo: a!pagingInfo(
      startIndex: 1,
      batchSize: 10
    )
  ),
  fetchTotalCount: true
)

```

• B.

```

a!queryEntity(
  entity: cons!ABC_DSE_BOOK,
  pagingInfo: a!pagingInfo(
    startIndex: 1,
    batchSize: 10
  ),
  fetchTotalCount: false
)

```

• C.

Answer: B

NEW QUESTION # 87

.....

We strongly recommend using our ACD101 exam dumps to prepare for the Appian Associate Developer. It is the best way to ensure success. With our ACD101 practice questions, you can get the most out of your studying and maximize your chances of passing your ACD101 Exam. TorrentExam Appian Associate Developer is the answer if you want to score higher in the ACD101 exam and achieve your academic goals.
