Detailed PSP Study Plan, New PSP Exam Duration

We are well acknowledged for we have a fantastic advantage over other vendors - We offer you the simulation test with the Soft version of our PSP exam engine: in order to let you be familiar with the environment of PSP test as soon as possible. Under the help of the real simulation, you can have a good command of key points which are more likely to be tested in the real PSP test. Therefore that adds more confidence for you to make a full preparation of the upcoming PSP exam.

ASIS Physical Security Professional Exam Sample Questions (Q12-Q17):

NEW QUESTION # 12

Schedule Risk may affect the following:

- A. Long-duration activities
- B. Activity resource allocation
- C. Calendar shifts
- D. The final milestones phase milestones, critical and non-critical activities

Answer: D

NEW QUESTION # 13

In analyzing a logical chain of activities in a critical path method (CPM) schedule, what do differing total float values within that chain typically indicate?

- A. Certain activities in the critical path have no successors.
- B. The schedule has too much detail to reflect an accurate critical path.
- **C. Different calendars are assigned to certain activities in the logical chain.**
- D. The schedule is projecting an "early completion".

Answer: C

Explanation:

Impact of Calendars on Total Float:

* Differing calendars (e.g., working days, holidays, or shifts) assigned to activities can result in varying total float values within a logical chain.

* Total float measures the flexibility of an activity and is calculated based on its calendar and logical dependencies.

PSP Study Guide References:

* The guide covers how calendar assignments influence float calculations and their potential to create disparities in a critical path.

Conclusion: The correct answer is B, as differing total float values typically indicate the use of different calendars for activities in the chain.

NEW QUESTION # 14

What is a critical path method schedule?

- A. The timeline of the riskiest work
- B. List of work to be accomplished by responsible party and when it is to be accomplished
- C. A graphical means of showing the important work
- **D. A network diagram of logically interconnected activities**

Answer: D

NEW QUESTION # 15

Budgeted cost of work scheduled is _____.

- A. The total authorized budget for accomplishing the project scope
- **B. The sum of all budgets for work scheduled to be accomplished within a given time period**
- C. The expected total cost of an activity, group of activities or the project
- D. The value of the completed work expressed in terms of the budget assigned to that work

Answer: B

Explanation:

Scheduling Professional Study Guide and Documents References:

The Budgeted Cost of Work Scheduled (BCWS) is the planned value of all tasks scheduled during a specific period. It is a measure used in earned value management to assess schedule adherence.

* Option A defines Budgeted Cost of Work Performed (BCWP).

* Option B defines the total project budget (BAC).

* Option C defines the expected total cost, which is Estimate at Completion (EAC).

This answer is consistent with earned value methodologies and their application in project controls.

NEW QUESTION # 16

A controlled area where an even greater degree of security is required is called:

- A. External area
- **B. Limited area**
- C. Pass system area
- D. Multiple areas
