Information-Technology-Management Dump Check - Valid Test Information-Technology-Management Fee

The TrainingDump WGU Information-Technology-Management exam dumps are being offered in three different formats. The names of these formats are Information-Technology-Management PDF questions file, desktop practice test software, and web-based practice test software. All these three WGU Information Technology Management QGC1 exam dumps formats contain the real WGU Information-Technology-Management Exam Questions that will help you to streamline the Information-Technology-Management exam preparation process.

WGU Information Technology Management QGC1 Sample Questions (Q170-Q175):

NEW QUESTION # 170
Which process is improved by manufacturing enterprise resource planning (ERP) systems?

- A. Designing prototypes
- B. Coordinating materials and production
- C. Developing packaging designs

- D. Managing employee time-off

Answer: B

Explanation:
In manufacturing, ERP systems are used to coordinate materials, resources, and production schedules. ERP integrates procurement, inventory, and production planning, ensuring that the right materials are available at the right time, reducing downtime and waste.
Option B: Packaging design is a marketing and design activity, not ERP-driven.
Option C: Time-off management is handled by HR systems, not ERP production modules.
Option D: Prototyping is a product design function, not ERP-based.
Thus, ERP systems in manufacturing improve coordination of materials and production.

WGU Information Technology Management - Enterprise Resource Planning in Manufacturing, section on ERP Benefits for Production.

NEW QUESTION # 171
Why should chief information officers embrace risk in digital leadership?

- A. To challenge existing models and drive innovation
- B. To maintain infrastructure and operational efficiency
- C. To beat competitors to the market
- D. To limit investment in experimentation

Answer: A

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
In digital leadership, chief information officers (CIOs) are expected to lead change, adopt new technologies, and rethink traditional business models. This inherently involves taking calculated risks. Embracing risk allows CIOs to:
Challenge existing models-question outdated processes, structures, and technologies.
Explore innovative solutions, such as new platforms, automation, AI, and customer engagement methods.
Move the organization toward digital transformation, rather than staying locked into legacy approaches.
Create value by experimenting, learning, and iterating on new initiatives.
Why the other options are incorrect:
A . To beat competitors to the market - Speed to market can be a benefit, but embracing risk in digital leadership is primarily about innovation and transformation, not just being first.
C . To maintain infrastructure and operational efficiency - Maintenance and efficiency call for risk reduction, not increased risk-taking. This is more aligned with traditional IT operations than digital leadership.
D . To limit investment in experimentation - Embracing risk is the opposite of limiting experimentation. Digital leaders must support experimentation and learning.
Therefore, the best reason CIOs should embrace risk in digital leadership is to challenge existing models and drive innovation, which matches Option B.

NEW QUESTION # 172
What is an advantage of using a trusted third party to confirm correlations between users and public keys in disaster recovery planning?

- A. Monitors enclosures
- B. Features full-time monitoring
- C. Provides authentication and authorization
- D. Protects against encrypted attacks

Answer: C

Explanation:
Role of a Trusted Third Party:
Trusted third parties, like Certificate Authorities (CAs), validate the correlation between users and public keys.
They ensure secure communication by providing authentication (verifying user identity) and authorization (granting access rights).
Advantages in Disaster Recovery Planning:

Simplifies secure communication during recovery processes.
Provides a trusted mechanism for verifying identities and preventing unauthorized access.
Why Other Options Are Incorrect:
Option A (Monitors enclosures): Not related to public key verification.
Option B (Protects against encrypted attacks): While encryption enhances security, it is not the purpose of a trusted third party.
Option D (Features full-time monitoring): Not a function of trusted third parties like CAs.
:
Public Key Infrastructure (PKI) Best Practices - NIST SP 800-32
Role of Trusted Third Parties in Disaster Recovery - Gartner Research

NEW QUESTION # 173
Which factor in the planning process is considered true, real, or certain without proof or demonstration?

- A. Project objective
- B. Project Assumption
- C. Project requirements
- D. Project theory

Answer: B

NEW QUESTION # 174
Which hacking method involves forging the from address so that replies go to an unintended audience?

- A. Hoaxes
- B. Spoofing
- C. Spyware
- D. Packet tampering

Answer: B

Explanation:
* Definition of Spoofing:
* Spoofing involves forging the "from" address in communications (e.g., emails) so that replies or interactions are misdirected.
* Attackers use this method to impersonate trusted entities, steal sensitive information, or redirect responses to malicious actors.
* Impact of Spoofing:
* Misleads recipients into sharing sensitive information.
* Often used in phishing and social engineering attacks.
* Incorrect Options Analysis:
* A. Packet tampering: Involves altering data packets during transmission.
* C. Spyware: Refers to software that secretly monitors user activity.
* D. Hoaxes: Refers to false warnings or scams, not address forgery.
References and Documents of Information Technology Management:
* "Email Security and Spoofing Prevention" (NIST Cybersecurity Framework).
* ITIL Security Management Practices (Axelos).

NEW QUESTION # 175

......

Briefly speaking, our Information-Technology-Management training guide gives priority to the quality and service and will bring the clients the brand new experiences and comfortable feelings. As the pass rate of our Information-Technology-Management exam questions is high as 98% to 100%. Numerous of our loyal customers praised that they felt cool to study with our Information-Technology-Management Study Guide and pass the exam. The 24/7 service also let them feel at ease for they can contact with us at any time. What are you still hesitating for? Hurry to buy our Information-Technology-Management learning engine now!
