

350-701 Latest Test Format - 350-701 Exam Certification Cost

What's more, part of that Test4Cram 350-701 dumps now are free: <https://drive.google.com/open?id=1WwTIZo9a6kAzl1YaBACXJ-4y5bk2qdJP>

About the oncoming 350-701 exam, every exam candidates are wishing to utilize all intellectual and technical skills to solve the obstacles ahead of them to go as well as it possibly could. So the pending exam causes a panic among the exam candidates. The 350-701 exam prepare of our website is completed by experts who has a good understanding of real exams and have many years of experience writing 350-701 Study Materials. They know very well what candidates really need most when they prepare for the exam. They also understand the real exam situation very well. So they compiled 350-701 exam prepare that they hope to do their utmost to help candidates pass the exam and get what job they want.

350-701 Exam Certification Cost - 350-701 Reliable Exam Answers

Stop wasting time on meaningless things. There are a lot wonderful things waiting for you to do. You still have the opportunities to become successful and wealthy. The 350-701 study materials is a kind of intelligent learning assistant, which is capable of aiding you pass the 350-701 Exam easily. If you are preparing the exam, you will save a lot of troubles with the guidance of our 350-701 study materials. Our company is aimed at relieving your pressure from heavy study load. So we strongly advise you to have a try.

Understanding functional and technical aspects of Implementing and Operating Cisco Security Core Technologies (SCOR 350-701) Content Security

The following will be discussed in **CISCO 350-701 Exam Dumps**:

- Describe web proxy identity and authentication including transparent user identification
- Compare the components, capabilities, and benefits of local and cloud-based email and web solutions (ESA, CES, WSA)
- Configure and verify web and email security deployment methods to protect onpremises and remote users (inbound and outbound controls and policy management)
- Configure and verify web security controls on Cisco Umbrella (identities, URL content settings, destination lists, and reporting)
- Implement traffic redirection and capture methods

Cisco Implementing and Operating Cisco Security Core Technologies Sample Questions (Q350-Q355):

NEW QUESTION # 350

Which Cisco platform provides an agentless solution to provide visibility across the network including encrypted traffic analytics to detect malware in encrypted traffic without the need for decryption?

- A. Cisco Advanced Malware Protection
- B. Cisco Identity Services Engine
- C. Cisco AnyConnect
- **D. Cisco Stealthwatch**

Answer: D

NEW QUESTION # 351

When choosing an algorithm to us, what should be considered about Diffie Hellman and RSA for key establishment?

- A. DH is a symmetric key establishment algorithm intended to output asymmetric keys
- B. RSA is an asymmetric key establishment algorithm intended to output symmetric keys
- C. RSA is a symmetric key establishment algorithm intended to output asymmetric keys
- **D. DH is on asymmetric key establishment algorithm intended to output symmetric keys**

Answer: D

Explanation:

Diffie Hellman (DH) uses a private-public key pair to establish a shared secret, typically a symmetric key. DH is not a symmetric algorithm - it is an asymmetric algorithm used to establish a shared secret for a symmetric key algorithm.

NEW QUESTION # 352

What is an attribute of the DevSecOps process?

- A. isolated security team
- **B. development security**
- C. security scanning and theoretical vulnerabilities
- D. mandated security controls and check lists

Answer: B

Explanation:

ExplanationExplanationDevSecOps (development, security, and operations) is a concept used in recent years to describe how to move security activities to the start of the development life cycle and have built-in security practices in the continuous integration/continuous deployment (CI/CD) pipeline. Thus minimizing vulnerabilities and bringing security closer to IT and business objectives. Three key things make a real DevSecOps environment:+ Security testing is done by the development team+ Issues found during that testing is managed by the development team+ Fixing those issues stays within the development team

NEW QUESTION # 353

Which attack is preventable by Cisco ESA but not by the Cisco WSA?

- **A. phishing**
- B. DoS
- C. buffer overflow
- D. SQL injection

Answer: A

Explanation:

Reference:

https://www.cisco.com/c/en/us/td/docs/security/esa/esa13-5/user_guide/b_ESA_Admin_Guide_13-5/m_advance

NEW QUESTION # 354

What is a function of Cisco AMP for Endpoints?

- A. It blocks email-based attacks
- B. It detects DNS attacks
- C. It protects against web-based attacks
- **D. It automates threat responses of an infected host**

Answer: D

Explanation:

Cisco AMP for Endpoints is a next generation endpoint security solution that provides prevention, detection, and response capabilities. One of its functions is to automate threat responses of an infected host by isolating it from the network, blocking malicious files, and removing them from all endpoints. This reduces the time and effort required to contain and remediate a threat, and prevents further damage or data loss. According to the source book, Cisco AMP for Endpoints can perform the following automated responses:

* Endpoint Isolation: This feature allows you to isolate an endpoint from the network if it is compromised or infected. This prevents the endpoint from communicating with other devices or servers, and stops the spread of malware or exfiltration of data. You can isolate an endpoint manually from the console, or automatically based on a policy or a detection. You can also restore the network connectivity of an isolated endpoint when it is safe to do so.

* File Blocking: This feature allows you to block a file from executing on any endpoint if it is deemed malicious or suspicious. You can block a file manually from the console, or automatically based on a policy or a detection. You can also unblock a file if it is a false positive or no longer a threat.

* File Removal: This feature allows you to remove a file from any endpoint if it is malicious or unwanted.

You can remove a file manually from the console, or automatically based on a policy or a detection.

You can also restore a file from quarantine if it is a false positive or needed for analysis.
