PMI Project Management Professional (2025 Version) Sample Questions (Q341-Q346):
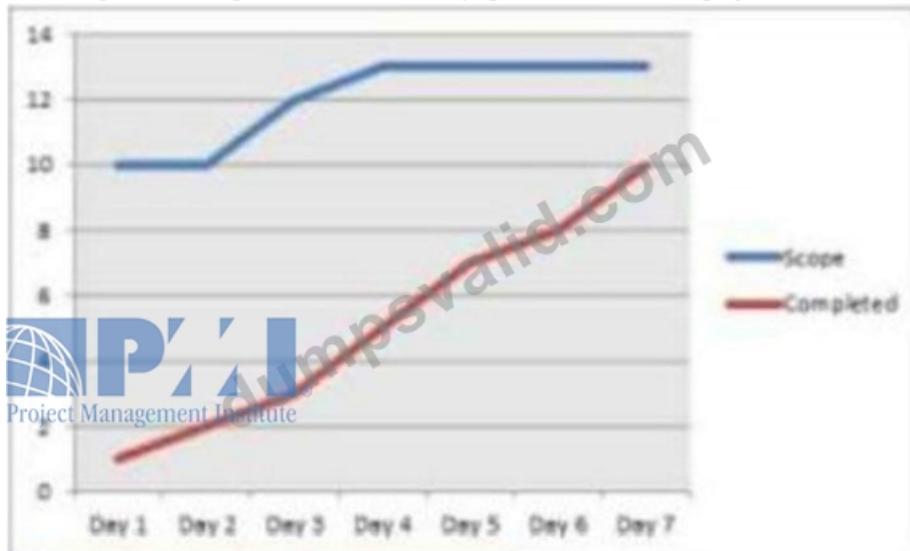

NEW QUESTION # 341
A new smart phone is introduced Market research indicates that customer expectations for the browsing speed of certain applications are unmet. To mitigate this, the quality team reviews the design and decides to reproduce the product.
What is this cost of rework called?

- A. Cost of quality assurance testing
- B. Quality management cost
- C. Cost of quality improvement
- D. Cost of quality (COQ)

Answer: D

NEW QUESTION # 342

According to this burnup chart for the last 7-day sprint, what should the project lead address with the product owner and team?

- A. The product owner should not ask the team to change their sprint commitments.
- B. The team is not meeting the expectations of the product owner.
- C. The team should have stopped on day 4 and started a new sprint.
- D. The team is accepting too much work in the sprint after it has started.

Answer: B

Explanation:
The burnup chart indicates that the "Completed" work is trailing behind the "Scope," suggesting that the team is not meeting the expectations set by the product owner. This discrepancy can be due to various factors such as underestimation of tasks, unforeseen challenges, or scope changes. It's important for the project lead to address this with the product owner and team to realign expectations, reassess the workload, and implement corrective actions to ensure that project goals are met within the sprint timeframe.
