P.S. Free 2026 CompTIA CAS-005 dumps are available on Google Drive shared by TestKingFree: https://drive.google.com/open?id=1vcDH11HjCj0xiS1_PndRCnqkMkTrKpX7

CAS-005 certification has great effect in this field and may affect your career even future. CAS-005 real questions files are professional and high passing rate so that users can pass the exam at the first attempt. High quality and pass rate make us famous and growing faster and faster. Many candidates compliment that CAS-005 Study Guide materials are best assistant and useful for qualification exams, they have no need to purchase other training courses or books to study, and only by practicing our CAS-005 CompTIA CASP exam braindumps several times before exam, they can pass exam in short time easily.

We believe you will also competent enough to cope with demanding and professorial work with competence with the help of our CAS-005 exam braindumps. Our experts made a rigorously study of professional knowledge about this CAS-005 exam. So do not splurge time on searching for the perfect practice materials, because our CAS-005 Guide materials are exactly what you need to have. Just come and buy our CAS-005 practice guide, you will be a winner!

CompTIA CAS-005 Latest Real Test: CompTIA SecurityX Certification Exam - TestKingFree Test Engine Simulation

We take the rights of the consumer into consideration. So as a company that aimed at the exam candidates of CAS-005 study

guide, we offer not only free demos, Give three versions of our CAS-005 exam questions for your option, but offer customer services 24/7. Even if you fail the CAS-005 Exams, the customer will be reimbursed for any loss or damage after buying our CAS-005 training materials. Besides, you can enjoy free updates for one year as long as you buy our exam dumps.

CompTIA CAS-005 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Security Engineering: This section measures the skills of CompTIA security architects that involve troubleshooting common issues related to identity and access management (IAM) components within an enterprise environment. Candidates will analyze requirements to enhance endpoint and server security while implementing hardware security technologies. This domain also emphasizes the importance of advanced cryptographic concepts in securing systems.
Topic 2	<ul style="list-style-type: none"> Security Architecture: This domain focuses on analyzing requirements to design resilient systems, including the configuration of firewalls and intrusion detection systems.
Topic 3	<ul style="list-style-type: none"> Governance, Risk, and Compliance: This section of the exam measures the skills of CompTIA security architects that cover the implementation of governance components based on organizational security requirements, including developing policies, procedures, and standards. Candidates will learn about managing security programs, including awareness training on phishing and social engineering.
Topic 4	<ul style="list-style-type: none"> Security Operations: This domain is designed for CompTIA security architects and covers analyzing data to support monitoring and response activities, as well as assessing vulnerabilities and recommending solutions to reduce attack surfaces. Candidates will apply threat-hunting techniques and utilize threat intelligence concepts to enhance operational security.

CompTIA SecurityX Certification Exam Sample Questions (Q69-Q74):

NEW QUESTION # 69

A security officer received several complaints from users about excessive MFA push notifications at night. The security team investigates and suspects malicious activities regarding user account authentication. Which of the following is the best way for the security officer to restrict MFA notifications?

- A. Provisioning FIDO2 devices
- **B. Configuring prompt-driven MFA**
- C. Deploying a text message based on MFA
- D. Enabling OTP via email

Answer: B

Explanation:

Excessive MFA push notifications can be a sign of an attempted push notification attack, where attackers repeatedly send MFA prompts hoping the user will eventually approve one by mistake.

Configuring prompt-driven MFA: This option allows users to respond to prompts in a secure manner, often including features like time-limited approval windows, additional verification steps, or requiring specific actions to approve. This can help prevent users from accidentally approving malicious attempts.

Configuring prompt-driven MFA is the best solution to restrict unnecessary MFA notifications and improve security.

NEW QUESTION # 70

An organization recently hired a third party to audit the information security controls present in the environment. After reviewing the audit findings, the Chief Information Security Officer (CISO) approved the budget for an in-depth defense strategy for network security. Which of the following is the most likely reason the CISO approved the additional budget?

- A. The auditor reported a low score on the PCI DSS self-assessment questionnaire.
- B. Potential customers increasingly asked for security compliance reports.
- C. Other departments had unused budget, which was transferred to IT security
- **D. The previous network architecture contained controls that could be easily bypassed.**

Answer: D

Explanation:

The most likely driver for approving additional network security budget is that the audit revealed that the existing architecture contained security controls that could be easily bypassed. This indicates fundamental weaknesses in defense-in-depth and suggests that attackers could gain access to sensitive systems or data despite the presence of controls.

Option A (unused budgets) is not a strategic reason for approving security investment. Option B (compliance reports requested by customers) may influence investment in compliance initiatives, but it does not explain the need for an in-depth defense architecture.

Option D (PCI DSS low score) is a compliance-specific issue but would not, on its own, drive a broad architectural budget approval unless PCI was the only focus.

Security audits often uncover systemic flaws-such as flat networks, insufficient segmentation, or single points of failure-that create the conditions for bypassing controls. Addressing these issues requires rearchitecting the environment, introducing layered defenses, and strengthening monitoring capabilities, all of which demand significant budget. Thus, option C aligns with the decision to invest in robust defense-in-depth strategies.

NEW QUESTION # 71

A security engineer must resolve a vulnerability in a deprecated version of Python for a custom-developed flight simulation application that is monitored and controlled remotely. The source code is proprietary and built with Python functions running on the Ubuntu operating system. Version control is not enabled for the application in development or production. However, the application must remain online in the production environment using built-in features. Which of the following solutions best reduces the attack surface of these issues and meets the outlined requirements?

- A. Code-signing within the CI/CD pipeline ensures that only verified and signed code is deployed, mitigating the risk of supply chain attacks. Updating Python with aptitude and updating modules with pip ensures vulnerabilities are patched. Deploying the solution to production after testing maintains application availability while securing the development lifecycle. Branch protection (B) applies only to version-controlled environments, which is not the case here. NFS network share (C) does not address the deprecated Python vulnerability. Version designation (D) does not eliminate security risks from outdated dependencies.
- B. Enable branch protection in the GitHub repository. Update Python with aptitude, and update modules with pip in a test environment. Deploy the solution to production.
- C. Use an NFS network share. Update Python with aptitude, and update modules with pip in a test environment. Deploy the solution to production.
- D. Configure version designation within the Python interpreter. Update Python with aptitude, and update modules with pip in a test environment. Deploy the solution to production.
- E. Configure code-signing within the CI/CD pipeline, update Python with aptitude, and update modules with pip in a test environment. Deploy the solution to production.

Answer: A

NEW QUESTION # 72

A subcontractor develops safety critical avionics software for a major aircraft manufacturer. After an incident, a third-party investigator recommends the company begin to employ formal methods in the development life cycle. Which of the following findings from the investigation most directly supports the investigator's recommendation?

- A. The system's bill of materials failed to include commercial and open-source libraries.
- B. The company lacks dynamic and interactive application security testing standards.
- C. The codebase lacks traceability to functional and non-functional requirements.
- D. The implemented software inefficiently manages compute and memory resources.

Answer: C

NEW QUESTION # 73

An IPSec solution is being deployed. The configuration files for both the VPN concentrator and the AAA server are shown in the diagram.

Complete the configuration files to meet the following requirements:

- * The EAP method must use mutual certificate-based authentication (With issued client certificates).
- * The IKEv2 Cipher suite must be configured to the MOST secure

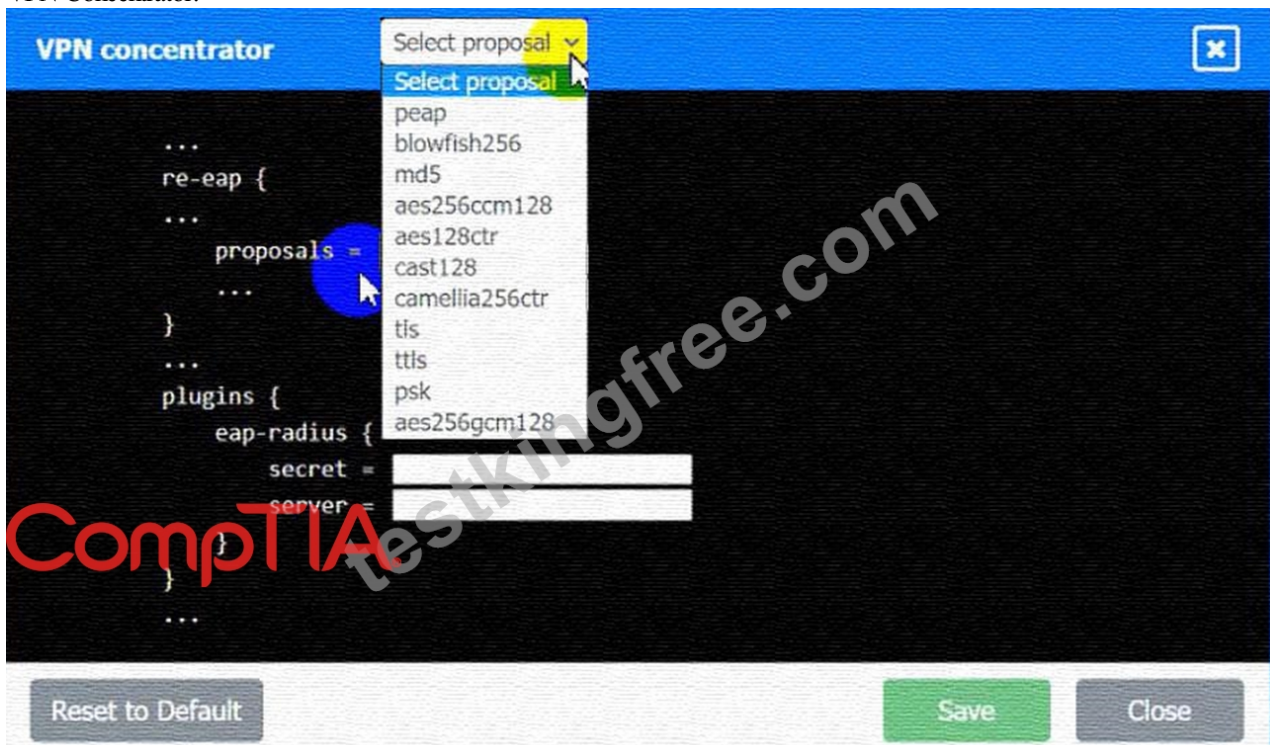

authenticated mode of operation,

* The secret must contain at least one uppercase character, one lowercase character, one numeric character, and one special character, and it must meet a minimum length requirement of eight characters, INSTRUCTIONS Click on the AAA server and VPN concentrator to complete the configuration.

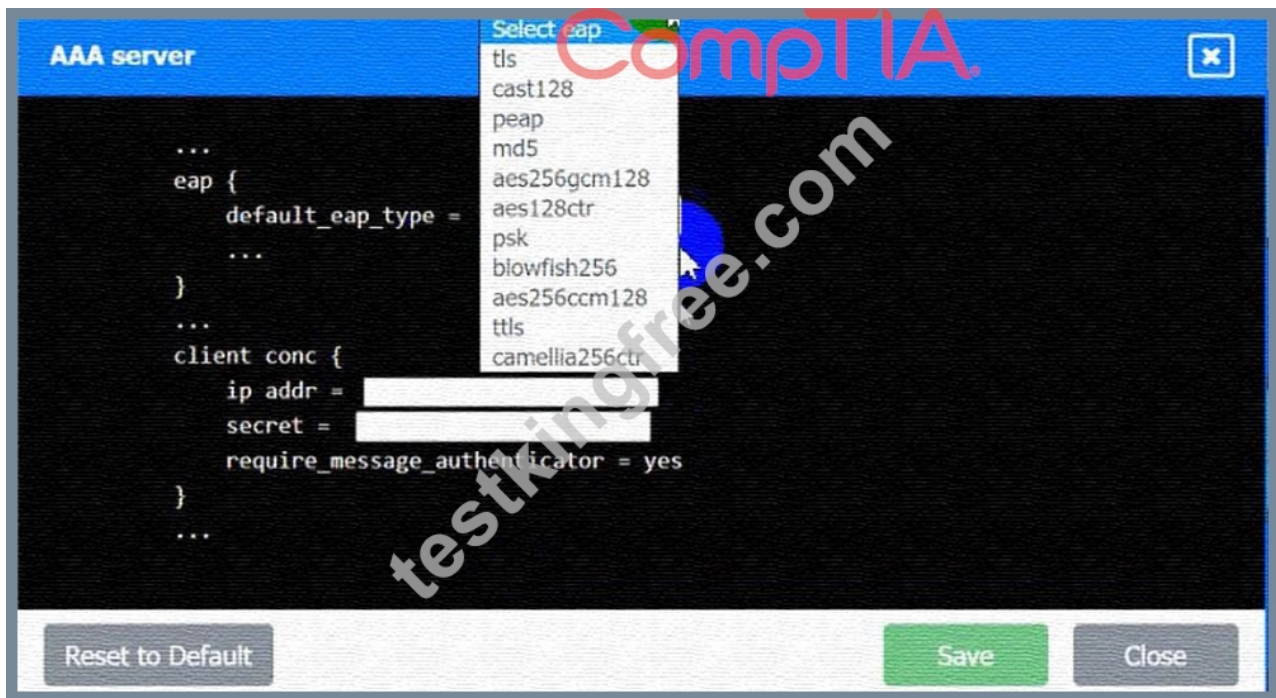

Fill in the appropriate fields and make selections from the drop-down menus.

VPN Concentrator:

AAA Server:

Answer:

Explanation:

VPN Concentrator:

A screenshot of a computer Description automatically generated

AAA Server:

A screenshot of a computer Description automatically generated

NEW QUESTION # 74

.....

The certificate is of significance in our daily life. At present we will provide all candidates who want to pass the CAS-005 exam with three different versions for your choice. Any of the three versions can work in an offline state, and the version makes it possible that the websites is available offline. If you use the quiz prep, you can use our latest CAS-005 Exam Torrent in anywhere and anytime. How can you have the chance to enjoy the study in an offline state? You just need to download the version that can work in an offline state, and the first time you need to use the version of our CAS-005 quiz torrent online.
