

2026 Updated NSE5_FNC_AD-7.6–100% Free Latest Practice Questions | NSE5_FNC_AD-7.6 Exam Tests

In order to provide the most effective NSE5_FNC_AD-7.6 exam materials which cover all of the current events for our customers, a group of experts in our company always keep an close eye on the changes of the NSE5_FNC_AD-7.6 exam even the smallest one, and then will compile all of the new key points as well as the latest types of exam questions into the new version of our NSE5_FNC_AD-7.6 Practice Test, and you can get the latest version of our NSE5_FNC_AD-7.6 study materials for free during the whole year. Do not lose the wonderful chance to advance with times.

The TestBraindump is a leading platform that has been helping the Fortinet NSE 5 - FortiNAC-F 7.6 Administrator (NSE5_FNC_AD-7.6) exam candidates in exam preparation and boosting their confidence to pass the final NSE5_FNC_AD-7.6 exam. The TestBraindump is offering real, valid, and updated Fortinet NSE 5 - FortiNAC-F 7.6 Administrator (NSE5_FNC_AD-7.6) practice questions. These Fortinet NSE 5 - FortiNAC-F 7.6 Administrator (NSE5_FNC_AD-7.6) exam questions are verified by Fortinet NSE5_FNC_AD-7.6 exam trainers. They work closely and check all Fortinet NSE 5 - FortiNAC-F 7.6 Administrator (NSE5_FNC_AD-7.6) exam dumps one by one and they ensure the best possible answers to Fortinet NSE 5 - FortiNAC-F 7.6 Administrator (NSE5_FNC_AD-7.6) exam dumps.

Fortinet NSE5_FNC_AD-7.6 Exam Tests | Exam NSE5_FNC_AD-7.6 Tutorial

High efficiency service has won reputation for us among multitude of customers, so choosing our NSE5_FNC_AD-7.6 real study dumps we guarantee that you won't be regret of your decision. Helping our candidates to pass the NSE5_FNC_AD-7.6 exam and achieve their dream has always been our common ideal. We believe that your satisfactory on our NSE5_FNC_AD-7.6 Exam Questions is the drive force for our company. Meanwhile, we adopt a reasonable price for you, ensures people whoever is rich or poor would have the equal access to buy our useful NSE5_FNC_AD-7.6 real study dumps.

Fortinet NSE 5 - FortiNAC-F 7.6 Administrator Sample Questions (Q55-Q60):

NEW QUESTION # 55

Refer to the exhibits.

Ports Tab

Enable RADIUS authentication for this device

Read VLANs

Logical Network: Cameras Add Configuration

Logical Network	Access Enforcement	Access Value	Is Alias
Registration	Deny		
Quarantine	Deny		
Dead End	Deny		
Authentication	Enforce		

Network Enforcement

Logical Network	Access Enforcement	Access Value
Roaming Guest	Enforce	

Dot1x Auto Registration: On Use port setting

An administrator is troubleshooting visibility issues on a modeled switch. The switch is configured to use link traps and to provision hosts based on network access policies. The administrator is seeing hosts on ports with no hosts connected and not seeing hosts on ports where hosts are known to be connected.

What is the most likely cause?

- A. The switch cannot be contacted by FortiNAC-F.
- **B. The credentials are incorrect.**
- C. The logical networks are set to deny.
- D. The host has uninstalled the FortiNAC-F agent.

Answer: B

Explanation:

Incorrect switch credentials prevent FortiNAC-F from successfully performing SNMP-based polling (such as layer 2 host learning) needed to accurately learn and clear hosts per port. As a result, FortiNAC-F displays stale or missing host-to-port associations even though link traps are enabled.

NEW QUESTION # 56

In a wireless integration, what method does FortiNAC use to obtain connecting MAC address information?

- A. SNMP traps
- B. Link traps
- C. Endstation traffic monitoring
- **D. RADIUS**

Answer: D

NEW QUESTION # 57

Refer to the exhibit.

Guest/Contractor Template

An administrator wants to ensure that guest accounts created from this template are not allowed network access outside of the designated times.

To achieve this, all necessary configurations must be made to force isolation of hosts in which state?

- A. At-risk
- **B. Non-authenticated**
- C. Rogue
- D. Disabled

Answer: B

Explanation:

When guest accounts attempt access outside their configured login availability, authentication fails and the hosts remain in a non-authenticated state. To prevent network access during those times, isolation must be enforced for hosts in the non-authenticated state so they are restricted until valid authentication occurs within the permitted time window.

NEW QUESTION # 58

Refer to the exhibit. What would FortiNAC-F generate if only one of the security fitters is satisfied?

Modify Security Trigger

Name:

Time Limit: Seconds

Filter Match:

Frequency	Vendor	Type	Sub Type	Threat ID	Description	Severity	Prefer Destination Address	Number of Custom Fields
1	Fortinet		virus				No	1
1							No	1

Add Modify Delete

OK Cancel

- A. A security alarm
- B. A security event
- **C. A normal event**
- D. A normal alarm

Answer: C

Explanation:

In FortiNAC-F, Security Triggers are used to identify specific security-related activities based on incoming data such as Syslog messages or SNMP traps from external security devices (like a FortiGate or an IDS). These triggers act as a filtering mechanism to determine if an incoming notification should be escalated from a standard system event to a Security Event.

According to the FortiNAC-F Administrator Guide and relevant training materials for versions 7.2 and 7.4, the Filter Match setting is the critical logic gate for this process. As seen in the exhibit, the "Filter Match" configuration is set to "All". This means that for the Security Trigger named

"Infected File Detected" to "fire" and generate a Security Event or a subsequent Security Alarm, every single filter listed in the Security Filters table must be satisfied simultaneously by the incoming data.

In the provided exhibit, there are two filters: one looking for the Vendor "Fortinet" and another looking for the Sub Type "virus". If only one of these filters is satisfied (for example, a message from Fortinet that does not contain the "virus" subtype), the logic for the Security Trigger is not met. Consequently, FortiNAC-F does not escalate the notification. Instead, it processes the incoming data as a Normal Event, which is recorded in the Event Log but does not trigger the automated security response workflows associated with security alarms.

"The Filter Match option defines the logic used when multiple filters are defined. If 'All' is selected, then all filter criteria must be met in order for the trigger to fire and a Security Event to be generated. If the criteria are not met, the incoming data is processed as a normal event. If 'Any' is selected, the trigger fires if at least one of the filters matches."

NEW QUESTION # 59

An administrator wants to build device profiling rules based on network traffic, but the network session view is not populated with any records.

Which two settings can be enabled to gather network session information? (Choose two.)

- A. Layer 3 polling on the infrastructure devices
- **B. Firewall session polling on modeled FortiGate devices**
- C. Network traffic polling on any modeled infrastructure device
- **D. Netflow setting on the FortiNAC-F interfaces**

Answer: B,D

Explanation:

In FortiNAC-F, the Network Sessions view provides a real-time and historical log of traffic flows, including source/destination IP addresses, ports, and protocols. This data is essential for building Device Profiling Rules that rely on "Traffic Patterns" or "Network Footprints" to identify devices (e.g., an IP camera communicating with its specific NVR). If the network session view is empty, the system is not receiving the necessary flow or session data from the network infrastructure.

According to the FortiNAC-F Administration Guide, there are two primary methods to populate this view:

NetFlow/sFlow/IPFIX (C): FortiNAC-F can act as a flow collector. By enabling NetFlow settings on the FortiNAC-F service interface (port2/eth1) and configuring your switches or routers to export flow data to the FortiNAC IP, the system can parse these packets and record sessions.

Firewall Session Polling (B): For environments with FortiGate firewalls, FortiNAC-F can proactively poll the FortiGate via the REST API to retrieve its current session table. This is particularly useful as it provides session visibility without requiring the overhead of configuring NetFlow on every access layer switch.

NEW QUESTION # 60

.....

The Fortinet NSE 5 - FortiNAC-F 7.6 Administrator certification exam is one of the top-rated career advancement NSE5_FNC_AD-7.6 certifications in the market. This Fortinet NSE 5 - FortiNAC-F 7.6 Administrator certification exam has been inspiring candidates since its beginning. Over this long period, thousands of Fortinet NSE 5 - FortiNAC-F 7.6 Administrator exam candidates have passed their NSE5_FNC_AD-7.6 Certification Exam and now they are doing jobs in the world's top brands.

NSE5_FNC_AD-7.6 Exam Tests: https://www.testbrindump.com/NSE5_FNC_AD-7.6-exam-prep.html

Fortinet NSE5_FNC_AD-7.6 Latest Practice Questions Do you feel it is amazing, Fortinet NSE5_FNC_AD-7.6 Latest Practice Questions Many successful people are still working hard to make new achievements, As a worldwide certification dumps leader, our website provides you the latest NSE5_FNC_AD-7.6 exam pdf and valid NSE5_FNC_AD-7.6 test questions to help you pass test with less time, We have NSE5_FNC_AD-7.6 dump PDF that is very easy to read and we also have NSE5_FNC_AD-7.6 dumps actual test for you to learn self shortcoming in the test.

Sonya's research interests focus on user experience, web development, Exam NSE5_FNC_AD-7.6 Tutorial and Internet entrepreneurship, X is started initially by the `init` process, Do you feel it is amazing?

Many successful people are still working NSE5_FNC_AD-7.6 hard to make new achievements, As a worldwide certification dumps leader, our website provides you the latest NSE5_FNC_AD-7.6 exam pdf and valid NSE5_FNC_AD-7.6 test questions to help you pass test with less time.

Updated NSE5_FNC_AD-7.6 Questions – Three Best Formats

We have NSE5_FNC_AD-7.6 dump PDF that is very easy to read and we also have NSE5_FNC_AD-7.6 dumps actual test for you to learn self shortcoming in the test, In contrast we feel as happy as you are NSE5_FNC_AD-7.6 Reliable Source when you get the desirable outcome and treasure every breathtaking moment of your review.
