

New PCCP Test Testking - Valid PCCP Exam Papers

What's more, part of that TestkingPass PCCP dumps now are free: <https://drive.google.com/open?id=1cwlyraqL53JUgi8OoBRFMko96UZFQsCk>

Our PCCP learning materials are carefully compiled by industry experts based on the examination questions and industry trends. You don't have to worry about our learning from PCCP exam question. We assure you that our PCCP learning materials are easy to understand and use the fewest questions to convey the most important information. As long as you follow the steps of our PCCP Quiz torrent, your mastery of knowledge will be very comprehensive and you will be very familiar with the knowledge points. This will help you pass the exam more smoothly.

Good product and all-round service are the driving forces for a company. Our Company is always striving to develop not only our PCCP study materials, but also our service because we know they are the aces in the hole to prolong our career. Reliable service makes it easier to get oriented to the exam. If our candidates fail to pass the PCCP Exam unfortunately, you can show us the failed record, and we will give you a full refund.

Valid PCCP Exam Papers | PCCP Exam Online

If you don't work hard to improve your strength, you can't get the chance you want. Without chance, you will not be able to obtain your desired status and salary. This society is such a reality. It is also fair. Every year, many people purchase our PCCP study materials. With the help of our PCCP Exam Braindumps, they successfully passed the exam and got the certification, and became more and more successful than before. So if you buy our PCCP practice questions, you will have a brighter future!

Palo Alto Networks PCCP Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> • Network Security: This domain targets a Network Security Specialist and includes knowledge of Zero Trust Network Access (ZTNA) characteristics, functions of stateless and next-generation firewalls (NGFWs), and the purpose of microsegmentation. It also covers common network security technologies such as intrusion prevention systems (IPS), URL filtering, DNS security, VPNs, and SSL • TLS decryption. Candidates must understand the limitations of signature-based protection, deployment options for NGFWs, cybersecurity concerns in operational technology (OT) and IoT, cloud-delivered security services, and AI-powered security functions like Precision AI.
Topic 2	<ul style="list-style-type: none"> • Cloud Security: This section targets a Cloud Security Specialist and addresses major cloud architectures and topologies. It discusses security challenges like application security, cloud posture, and runtime security. Candidates will learn about technologies securing cloud environments such as Cloud Security Posture Management (CSPM) and Cloud Workload Protection Platforms (CWPP), as well as the functions of a Cloud Native Application Protection Platform (CNAPP) and features of Cortex Cloud.
Topic 3	<ul style="list-style-type: none"> • Secure Access: This part of the exam measures skills of a Secure Access Engineer and focuses on defining and differentiating Secure Access Service Edge (SASE) and Secure Service Edge (SSE). It covers challenges related to confidentiality, integrity, and availability of data and applications across data, private apps, SaaS, and AI tools. It examines security technologies including secure web gateways, enterprise browsers, remote browser isolation, data loss prevention (DLP), and cloud access security brokers (CASB). The section also describes Software-Defined Wide Area Network (SD-WAN) and Prisma SASE solutions such as Prisma Access, SD-WAN, AI Access, and enterprise DLP.
Topic 4	<ul style="list-style-type: none"> • Endpoint Security: This domain is aimed at an Endpoint Security Analyst and covers identifying indicators of compromise (IOCs) and understanding the limits of signature-based anti-malware. It includes concepts like User and Entity Behavior Analytics (UEBA), endpoint detection and response (EDR), and extended detection and response (XDR). It also describes behavioral threat prevention and endpoint security technologies such as host-based firewalls, intrusion prevention systems, device control, application control, disk encryption, patch management, and features of Cortex XDR.
Topic 5	<ul style="list-style-type: none"> • Security Operations: This final section measures skills of a Security Operations Analyst and covers key characteristics and practices of threat hunting and incident response processes. It explains functions and benefits of security information and event management (SIEM) platforms, security orchestration, automation, and response (SOAR) tools, and attack surface management (ASM) platforms. It also highlights the functionalities of Cortex solutions, including XSOAR, Xparse, and XSIAM, and describes services offered by Palo Alto Networks' Unit 42.

Palo Alto Networks Certified Cybersecurity Practitioner Sample Questions (Q32-Q37):

NEW QUESTION # 32

Which analysis detonates previously unknown submissions in a custom-built, evasion-resistant virtual environment to determine real-world effects and behavior?

- A. Dynamic
- B. Bare-metal
- C. Pre-exploit protection
- D. Static

Answer: A

Explanation:

Dynamic analysis is a method of malware analysis that executes the malware in a controlled environment and observes its behavior and effects. Dynamic analysis can reveal the malware's network activity, file system changes, registry modifications, and other indicators of compromise. Dynamic analysis is performed by Palo Alto Networks WildFire, a cloud-based service that analyzes unknown files and links from various sources, such as email attachments, web downloads, and firewall traffic. WildFire uses a custom-built, evasion-resistant virtual environment to detonate the submissions and generate detailed reports and verdicts. WildFire can also share the threat intelligence with other Palo Alto Networks products and partners to prevent future attacks. References: WildFire Overview, WildFire Features, WildFire Dynamic Analysis

NEW QUESTION # 33

Which activity is a technique in the MITRE ATT&CK framework?

- A. Lateral movement
- B. Resource development
- C. Credential access
- D. Account discovery

Answer: D

Explanation:

Account discovery is a technique in the MITRE ATT&CK framework under the Discovery tactic. It involves adversaries attempting to identify user accounts on a system or network.

Credential access, lateral movement, and resource development are tactics - high-level objectives an attacker is trying to achieve.

NEW QUESTION # 34

Which next-generation firewall (NGFW) deployment option provides full application visibility into Kubernetes environments?

- A. Virtual
- B. SASE
- C. Container
- D. Physical

Answer: C

Explanation:

A container-based NGFW is specifically designed to integrate with Kubernetes environments, providing full application visibility and control within containerized workloads. It operates at the pod level, making it ideal for securing dynamic microservices architectures.

NEW QUESTION # 35

Which of the Cloud-Delivered Security Services (CDSS) will detect zero-day malware by using inline cloud machine learning (ML) and sandboxing?

- A. Advanced WildFire
- B. IoT security
- C. DNS security
- D. Advanced Threat Prevention

Answer: A

Explanation:

Advanced WildFire is a Cloud-Delivered Security Service (CDSS) that detects zero-day malware using inline cloud machine learning (ML) and sandboxing techniques. It analyzes unknown files in real-time to identify and block new threats before they can cause harm.

NEW QUESTION # 36

Which model would a customer choose if they want full control over the operating system(s) running on their cloud computing platform?

- A. PaaS
- B. IaaS
- C. DaaS
- D. SaaS

Answer: B

Explanation:

IaaS (Infrastructure as a Service) is a cloud computing model that delivers on-demand infrastructure resources to organizations via the cloud, such as compute, storage, networking, and virtualization¹. Customers do not have to manage, maintain, or update their own data center infrastructure, but are responsible for the operating system, middleware, virtual machines, and any apps or data¹. Therefore, IaaS gives customers full control over the operating system(s) running on their cloud computing platform, as well as the flexibility to customize and configure their infrastructure according to their needs². References: What are the different types of cloud computing? | Google Cloud, PaaS vs IaaS vs SaaS: What's the difference? | Google Cloud

NEW QUESTION # 37

.....

In actuality, the test center around the material is organized flawlessly for self-review considering the way that the competitors who are working in Palo Alto Networks working conditions don't get the sufficient opportunity to go to classes for Palo Alto Networks Certified Cybersecurity Practitioner certification. Thusly, they need to go for self-study and get the right test material to fire scrutinizing up for the Palo Alto Networks Certified Cybersecurity Practitioner (PCCP) exam. By utilizing Palo Alto Networks PCCP dumps, they shouldn't stress over any additional assistance with that.
