And if you have any questions about the content of the ASIS-PSP Exam Questions, please feel free to email us we will try our best to answer you at the first time.

To be eligible to sit for the ASIS-PSP exam, individuals must meet certain education and experience requirements. They must have a minimum of a high school diploma or equivalent and have at least five years of experience in the field of physical security, with at least three years of experience in responsible charge of a physical security function. Alternatively, individuals who have a recognized bachelor's degree or higher may substitute up to four years of the required experience.

ASIS International, the leading organization for security professionals, offers a certification program that aims to promote excellence in the field of physical security management. The ASIS-PSP (Physical Security Professional) certification is designed for individuals who have a broad understanding of security principles and practices, and possess the knowledge and skills necessary to oversee and manage physical security programs. Physical Security Professional Exam certification program is recognized globally and demonstrates that an individual is truly committed to their profession.

High Hit-Rate ASIS-PSP - Physical Security Professional Exam Reliable Cram Materials

If you buy ASIS-PSP exam material, things will become completely different. Physical Security Professional Exam study questions will provide you with very flexible learning time. Whatever where you are, whatever what time it is, just an electronic device, you can practice. With Physical Security Professional Exam study questions, you no longer have to put down the important tasks at hand in order to get to class; with ASIS-PSP Exam Guide, you don't have to give up an appointment for study. Our study materials can help you to solve all the problems encountered in the learning process, so that you can easily pass the exam.

ASIS Physical Security Professional Exam Sample Questions (Q26-Q31):

NEW QUESTION # 26
Which of the following is NOT the alternative of optimizing risk management?

- A. Risk avoidance
- B. Risk spreading
- C. Risk transfer
- D. Risk assessment

Answer: D

Explanation:
Risk assessment is a foundational step within the risk management process-not an alternative to managing risk. Alternatives to optimize risk management include:
Risk avoidance: eliminating the activity causing the risk
Risk transfer: shifting the risk to another party (e.g., through insurance) Risk spreading: distributing the risk to reduce overall impact
Risk assessment, in contrast, is the evaluation of threats and vulnerabilities and precedes these treatment decisions.

NEW QUESTION # 27
What results from fearing the consequences of being caught; and is a product of reasoning?

- A. Speech honesty
- B. Conditional honesty
- C. Integrity
- D. Conduct

Answer: B

Explanation:
Conditional honesty is a behavior pattern where a person acts honestly primarily due to the fear of being caught or facing consequences. Unlike integrity, which is internal and moral-based, conditional honesty is external and consequence-based. It is considered a product of reasoning and is a key concept in evaluating personnel risk in security-sensitive roles.

NEW QUESTION # 28
A voluntary and intentional violation by a legally competent parson of a legal duty that commands or prohibits an act for the protection of society is known as:

- A. Law-breaking
- B. Crime

- C. Fault
- D. Corruption

Answer: B

Explanation:
A crime is defined as a voluntary and intentional violation of a law by someone who is legally competent. It involves breaking a legal duty meant to protect society. This can include actions that are prohibited or omissions where action was legally required.
Corruption (A) is a specific type of crime involving abuse of power.
Law-breaking (B) is a general, non-legal term.
Fault (C) is too broad and often used in civil contexts.

ASIS POA Manual - Legal Concepts in Security
PSP Study Guide - Criminal Law Fundamentals

NEW QUESTION # 29
When developing a request for proposal (RFP), a specification that requires bidders to satisfy overall system effectiveness measure is referred to as:

- A. Results-based
- B. Performance-based
- C. Feature-based
- D. Cost-based

Answer: B

Explanation:
A performance-based specification defines what the system must achieve (e.g., detection rate, response time), without specifying how to achieve it. This allows vendors flexibility in choosing technologies that meet required outcomes.
* B (Feature-based) and C (Results-based) are loosely defined or incorrect terms in procurement standards.
* D (Cost-based) focuses on budget, not system performance.

NEW QUESTION # 30
Which of the following is NOT the activity and concern of a crisis management plan?

- A. Media operation
- B. Vital records
- C. Disaster operation
- D. Crisis management team

Answer: B

NEW QUESTION # 31
......
