Because of our past years' experience, we are well qualified to take care of your worried about the 1Z0-1061-24 Preparation exam and smooth your process with successful passing results. Our pass rate of the 1Z0-1061-24 study materials is high as 98% to 100% which is unique in the market.

Oracle CX Sales 2024 Implementation Professional Sample Questions (Q112-Q117):

NEW QUESTION # 112
Which of the following is the recommended practice for configuring security in Oracle Profitability and Cost Management Cloud Service?

- A. Use the predefined roles in the application without any modifications.
- B. Grant the Administrator role to all users for full control over all artifacts.
- C. Assign the Super User role to all users for unrestricted access.
- D. Create custom roles with specific privileges and assign them to users based on their responsibilities.

Answer: D

Explanation:
Option 1: Incorrect. Assigning the Super User role to all users is not recommended as it provides unrestricted access and may lead to security risks. Option 2: Incorrect. Granting the Administrator role to all users is not recommended as it gives full control over all

artifacts to every user and may lead to unauthorized changes or data breaches. Option 3: Correct. The recommended practice is to create custom roles with specific privileges and assign them to users based on their responsibilities. This ensures that users have access only to the functionality and data they need to perform their job. Option 4: Incorrect. Using the predefined roles in the application without any modifications may provide too much or too little access to certain functionalities and data, depending on a user's responsibilities.

NEW QUESTION # 113
What is the recommended approach to create a dimension hierarchy in Oracle Profitability and Cost Management Cloud Service?

- A. Export a dimension hierarchy from a different application and import it using the migration feature
- B. Import a dimension hierarchy from a file in the correct CSV format using the data management feature
- C. Use the drag-and-drop feature in the application interface to create a hierarchy
- D. Create each level of the dimension hierarchy individually and define the parent-child relationships manually

Answer: D

Explanation:
Option 1: Incorrect. The drag-and-drop feature can be used to rearrange existing members within a hierarchy, but not to create a hierarchy from scratch. Option 2: Incorrect. While importing a dimension hierarchy from a file is possible, it is not the recommended approach for creating a hierarchy from scratch. Option 3: Incorrect. The migration feature is used to move data and metadata between different instances of Oracle Profitability and Cost Management Cloud Service, not to create a dimension hierarchy. Option 4: Correct. The recommended approach to create a dimension hierarchy is to create each level of the hierarchy individually and define the parent-child relationships manually. This allows for more control and flexibility in designing the hierarchy.

NEW QUESTION # 114
Which of the following options represents a valid scenario where a Quantity dimension property can be used in an application in Oracle Profitability and Cost Management Cloud Service?

- A. Quantity is a property that can be defined for each Product and will be used to calculate the total cost of goods sold in the application.
- B. Quantity is a property that can be defined for each Department and will be used to calculate the headcount of employees responsible for each department.
- C. Quantity is a property that can be defined for each Entity and will be used to identify the number of times the Entity appears in the application.
- D. Quantity is a property that can be defined for each Account and will be used to calculate the cost of inventory used in production.

Answer: A

NEW QUESTION # 115
Which method allows you to load data into Oracle Profitability and Cost Management Cloud Service?

- A. SQL Insert
- B. File Import
- C. Data Management
- D. Data Load Rule

Answer: B

Explanation:
Option 1: Incorrect. Data Management is not a valid method for loading data into Oracle Profitability and Cost Management Cloud Service. Option 2: Correct. The File Import method allows you to load data into Oracle Profitability and Cost Management Cloud Service. This method involves importing data from a file in a supported format. Option 3: Incorrect. Data Load Rule is not a valid method for loading data into Oracle Profitability and Cost Management Cloud Service. Option 4: Incorrect. SQL Insert is not a valid method for loading data into Oracle Profitability and Cost Management Cloud Service.

NEW QUESTION # 116
What is the primary purpose of managing data and metadata in Oracle Profitability and Cost Management Cloud Service?

- A. To configure security settings
- B. To create cost objects
- C. To define cost allocations
- D. To store and organize data for analysis

Answer: D

Explanation:
Option 1: Incorrect. Creating cost objects is not the primary purpose of managing data and metadata. While managing data and metadata may involve defining cost objects, it serves a broader purpose. Option 2: Incorrect. Defining cost allocations is not the primary purpose of managing data and metadata. While managing data and metadata may involve defining cost allocations, it serves a broader purpose. Option 3: Correct. The primary purpose of managing data and metadata in Oracle Profitability and Cost Management Cloud Service is to store and organize data for analysis. This includes defining cost objects, cost allocations, and other relevant metadata. Option 4: Incorrect. Configuring security settings is not the primary purpose of managing data and metadata. While managing data and metadata may involve configuring security settings, it serves a broader purpose.

NEW QUESTION # 117
......
