NEW QUESTION: 1

R1, R2, R3, and R4 run OSPF. The area IDs are shown in the figure. Please match the LSA types and area IDs in each area.

OSPF		
1 kind LSA, 2 kind LSA, 3 kind LSA		Area 0
1 kind LSA, 2 kind LSA		Area 1
		Area 2

Answer:

1 kind LSA, 2 kind LSA, 3 kind LSA	→	Area 0
1 kind LSA, 2 kind LSA	→	Area 1
	→	Area 2

NEW QUESTION: 2

Which of the following descriptions about BGP route aggregation is wrong?

P.S. Free 2026 Huawei H12-821_V1.0 dumps are available on Google Drive shared by Pass4guide: https://drive.google.com/open?id=1x5wyn7bNy6AqvkyVH_DYeImjfuUrj8DV

I believe that a lot of people working in the IT industry hope to pass some IT certification exams to obtain the corresponding certifications. Some IT authentication certificates can help you promote to a higher job position in this fiercely competitive IT industry. Now the very popular Huawei H12-821_V1.0 authentication certificate is one of them. Although passing the Huawei certification H12-821_V1.0 exam is not so easy, there are still many ways to help you successfully pass the exam. While you can choose to spend a lot of time and energy to review the related IT knowledge, and also you can choose a effective training course. Pass4guide can provide the pertinent simulation test, which is very effective to help you pass the exam and can save your precious time and energy to achieve your dream. Pass4guide will be your best choice.

In the past few years, H12-821_V1.0 study materials have helped countless candidates pass the H12-821_V1.0 exam. After having a H12-821_V1.0 certification, some of them encountered better opportunities for development, some went to great companies, and some became professionals in the field. H12-821_V1.0 study materials have stood the test of time and market and received countless praises. Through the good reputation of word of mouth, more and more people choose to use H12-821_V1.0 Study Materials to prepare for the H12-821_V1.0 exam, which makes us very gratified. Please be assured that we will stand firmly by every warrior who will pass the exam. H12-821_V1.0 study materials have the following characteristics:

H12-821_V1.0 Reliable Braindumps Sheet & Test H12-821_V1.0 Questions

Vce

The HCIP-Datacom-Core Technology V1.0 (H12-821_V1.0) mock exams will allow you to prepare for the H12-821_V1.0 exam in a smarter and faster way. You can improve your understanding of the H12-821_V1.0 exam objectives and concepts with the easy-to-understand and actual H12-821_V1.0 Exam Questions offered by Pass4guide. Pass4guide makes the H12-821_V1.0 Practice Questions affordable for everyone and allows you to find all the information you need to polish your skills to be completely ready to clear the H12-821_V1.0 exam on the first attempt.

Huawei HCIP-Datacom-Core Technology V1.0 Sample Questions (Q393-Q398):

NEW QUESTION # 393

BGP routes have multiple path attributes. When a router advertises a BGP route to its peers, the route carries multiple path attributes. These attributes describe the characteristics of the BGP route and affect route selection in some scenarios. The attribute is Huawei-specific. It is valid only on the local device and is not transmitted to BGP peers. (Enter the attribute name in lowercase as it appears in the command output about the BGP routing table.)

Answer:

Explanation:

preference

Explanation:

BGP routes have a variety of path attributes that describe their characteristics and influence route selection.

These attributes include well-known mandatory attributes like AS-PATH and NEXT-HOP, as well as optional attributes like MED and LOCAL_PREF.

In Huawei devices, there is a Huawei-specific attribute called "preference", which is a local parameter used to influence BGP route selection on the device.

* Key Characteristics of "preference":

* It is valid only locally on the router.

* It is not shared with BGP peers.

* It helps the router determine the best route when multiple routes exist for the same prefix.

* It appears in the BGP routing table output in lowercase as preference.

Thus, the correct answer is preference (entered in lowercase as required).

References:

* Huawei HCIA-Datacom Study Guide, Chapter on "BGP Attributes".

NEW QUESTION # 394

The ABR in the NSSA area will not flood Type 4 and Type 5 LSAs to NSSA, but will flood Type 7 LSAs to other areas.

- A. FALSE
- B. TRUE

Answer: A

NEW QUESTION # 395

As shown in the figure, R1 and R2 have configured the local sending time interval, the local receiving time interval and the local BFD detection multiple.

Which of the following descriptions of the time parameters after RI negotiation are correct? (Multiple choice)

- A. The reception time after R1 negotiation is 200 milliseconds
- B. The sending time after R1 negotiation is 150 milliseconds
- C. The sending time after R1 negotiation is 50 milliseconds
- D. The reception time after R1 negotiation is 150 milliseconds

Answer: A,C

NEW QUESTION # 396

In the OSPF protocol, intra-area route calculation involves only Router LSA, Network LSA, and Summary LSA.

- A. FALSE
- B. TRUE

Answer: A

Explanation:

Intra-area route calculation in OSPF involves only Router LSAs (Type 1) and Network LSAs (Type 2). Summary LSAs (Type 3) are used for inter-area routes and do not participate in intra-area route calculation. Therefore, the statement is false .

NEW QUESTION # 397

On an office network of an enterprise, OSPF is enabled on two directly connected routers. During adjacency establishment, the state machine stays in the 2-way state. Which of the following statements are not possible causes?

- A. Hello time values are different.
- B. Router IDs conflict.
- C. The N-bit and E-bit of Hello packets are the same.
- D. Area IDs are different.

Answer: B,C

Explanation:

Comprehensive and Detailed Step-by-Step Explanation:

* OSPF State Machine:

* OSPF adjacency progresses through several states: Down > Init > 2-Way > ExStart > Exchange > Loading > Full.

* The 2-Way state indicates that routers have exchanged Hello packets but are not forming full adjacencies.

* Possible Causes for Staying in the 2-Way State:

* Hello Time Values Are Different (A): Mismatched Hello/Dead intervals prevent adjacency establishment.

* Area IDs Are Different (B): OSPF routers must belong to the same area to establish adjacency.

* Router IDs Conflict (C): While Router ID conflicts cause other issues, they do not result in the 2-Way state.

* N-bit and E-bit Are the Same (D): Matching N-bit/E-bit values are normal and do not cause problems.

References:

* HCIA-Datacom Study Guide, Chapter: OSPF Adjacency Establishment

NEW QUESTION # 398

.....

In order to meet the needs of all customers that pass their exam and get related certification, the experts of our company have designed the updating system for all customers. Our H12-821_V1.0 exam question will be constantly updated every day. The IT experts of our company will be responsible for checking whether our H12-821_V1.0 exam prep is updated or not. Once our H12-821_V1.0 test questions are updated, our system will send the message to our customers immediately. If you use our H12-821_V1.0 Exam Prep, you will have the opportunity to enjoy our updating system. You will get the newest information about your exam in the shortest time. You do not need to worry about that you will miss the important information, more importantly, the updating system is free for you, so hurry to buy our H12-821_V1.0 exam question, you will find it is a best choice for you.
