NEW QUESTION # 24

Which components are included to configure ETL data pipelines in SAP Signavio Process Intelligence? Note:

There are 3 correct answers to this question.

- A. Data Object Management
- B. Data Integration Management
- C. Data Relation Management
- D. Data Model Management
- E. Data Source Management

Answer: B,D,E

Explanation:

ETL (Extract, Transform, Load) data pipelines in SAP Signavio Process Intelligence are configured using specific components to manage data flow from source systems to analysis. The SAP Signavio ETL Guide explains:

* Option A (Data Model Management): This component defines the structure of the data, including the event log and case attributes tables, ensuring data is organized for process mining.

* Option B (Data Source Management): This involves configuring connections to source systems (e.g., ERP systems or databases) to extract raw data for the ETL pipeline.

* Option C (Data Integration Management): This component manages the integration of data from multiple sources, including transformation and loading processes, to prepare data for analysis.

* Option D (Data Object Management) is incorrect as it is not a standard component in SAP Signavio's ETL pipeline configuration; objects are managed within data models.
