Interactive Chrome-Enterprise-Administrator EBook - Exam Chrome-Enterprise-Administrator Revision Plan

In order to meet the demand of all customers and protect your machines network security, our company can promise that our Chrome-Enterprise-Administrator study materials have adopted technological and other necessary measures to ensure the security of personal information they collect, and prevent information leaks, damage or loss. In addition, the Chrome-Enterprise-Administrator Study Materials system from our company can help all customers ward off network intrusion and attacks prevent information leakage, protect user machines network security.

Google Chrome-Enterprise-Administrator Exam Syllabus Topics:

Topic	Details
Topic 1	• Chrome Enterprise Management Fundamentals: This section of the exam measures skills of a Chrome Device Administrator and covers the foundational elements of managing Chrome in an enterprise. It includes understanding how policies are applied and resolved, differentiating managed browsers from profiles, and describing how policies work. It also covers Chrome's built-in security features, how extensions are used and deployed, and how the release cycle and channels are managed.
Topic 2	• Chrome Extensions: This section of the exam measures skills of an Endpoint Security Manager and involves managing Chrome extension policies. It includes designing extension management strategies, handling extension exemptions, creating approval workflows, and assessing extensions for their risk and compliance with business continuity requirements.
Topic 3	• Analyze Chrome Data: This section of the exam measures skills of a Chrome Data Analyst and focuses on using the Google Admin console to view, analyze, and troubleshoot browser data. It includes reviewing reports, diagnosing browser or update issues, investigating performance problems, and identifying security risks based on log events and Chrome activity.
Topic 4	• Chrome Updates: This section of the exam measures skills of a Chrome IT Policy Analyst and addresses the various update methods available for Chrome. It includes selecting the right update strategy for different business and security needs, managing compliance across platforms, and adapting update methods based on environmental changes or risks.
Topic 5	• Manage Chrome Enterprise in the Cloud: This section of the exam measures skills of a Cloud Systems Administrator and focuses on preparing and configuring environments for Chrome cloud management. Candidates must demonstrate how to verify domains, use admin roles, configure organizational structures, deploy enrollment tokens, enable reporting, and maintain Chrome using the Google Admin console.

Exam Google Chrome-Enterprise-Administrator Revision Plan, Chrome-Enterprise-Administrator Reliable Exam Online

We have dedicated staff to update all the content of Chrome-Enterprise-Administrator exam questions every day. So you don't need to worry about that you buy the materials so early that you can't learn the last updated content. And even if you failed to pass the exam for the first time, as long as you decide to continue to use Professional Chrome Enterprise Administrator Certification Exam torrent prep, we will also provide you with the benefits of free updates within one year and a half discount more than one year. Chrome-Enterprise-Administrator Test Guide use a very easy-to-understand language. So even if you are a newcomer, you don't need to worry that you can't understand the contents. Industry experts hired by Chrome-Enterprise-Administrator exam questions also explain all of the difficult professional vocabulary through examples, forms, etc. You can completely study alone without the help of others.

Google Professional Chrome Enterprise Administrator Certification Exam Sample Questions (Q43-Q48):

NEW QUESTION # 43

The browser administrators at a company have configured the following extension policies:

Policy Name | Policy Value

------- | --------

ExtensionInstallAllowlist | ["lpbdmphcndhhacbfcgbdmnoffaeppiici", "gihagpmigkmndpbjkmlolikibogeofcm", "enebfpjnlbicamdncnfhlaapucdmgkj", "hhpkimhnadcdidjaejaegpeeikllochd", "bmplllbeanipnjdckniakhniegbcobannoj"] ExtensionInstallBlocklist | [ ] ExtensionInstallForceList | ["gihagpmigkmndpbjkmlolikibogeofcm;https://clients2.google.com/service/update2/crx", "ufninibicajhgibfhjcgnimlmdhccodfl;https://clients2.google.com/service/update2/crx", "hhpkimhnadcdidjaejaegpeeikllochd;https://clients2.google.com/service/update2/crx"]

An employee at the company wants to install an extension from the Chrome Web Store called "Grammar Friend" with the extension ID `ufninibicajhgibfhjcgnimlmdhccodfl` What will happen when the user goes to the Grammar Friend page in the Chrome Web Store?

- A. The "Add to Chrome" button will be available to click, and the user can install the extension.
- B. A blue banner that says "This item's installation is required by your organization" will appear, and the "Remove from Chrome" button will be grayed out.
- C. The "Remove from Chrome" button will be available because the extension is already installed.
- D. A red banner that says "Your administrator has blocked this item (ID ufninibicajhgibfhjcgnimlmdhccodfl)" will appear, and the "Add to Chrome" button will be grayed out.

Answer: B

Explanation:
The extension ID `ufninibicajhgibfhjcgnimlmdhccodfl` is present in the `ExtensionInstallForceList`.
Extensions in this list are automatically installed and cannot be removed by the user. Therefore, when the user visits the Chrome Web Store page for "Grammar Friend," they will see a blue banner indicating that the extension is required by their organization, and the "Remove from Chrome" button will be disabled. The "Add to Chrome" button will not be clickable in the standard way because it's already being force-installed.

NEW QUESTION # 44

A company is managing browsers in the Google Admin console Security has scanned extensions in the organization and has determined that there are several extensions installed with ability to set proxy This violates company policy How would an administrator block these extensions'?

- A. Set policy in the Google Admin console to block all extensions from being installed on the browser
- B. Send an email to the users notifying them that they must uninstall the detected extensions
- C. Set permission policy in the Google Admin console to block such extensions
- D. Remotely connect to each device and delete the extension from the browser

Answer: C

Explanation:
The Google Admin console allows administrators to control extension permissions. By configuring the
"Permissions and URL access" policy, the administrator can block extensions that request specific permissions, such as the ability to set a proxy. This is a centralized and effective way to enforce the security policy. Remotely connecting to each device (option B) is not scalable. Blocking all extensions (option C) might be too restrictive. Relying on users to uninstall (option D) is not enforceable.

NEW QUESTION # 45
A Chrome administrator is using both Cloud policies and Local policies to apply settings to Chrome browsers The administrator wants to ensure that on Windows computers, the Cloud policies will have precedence if Cloud and Local policies conflict What Registry value can be created under HKEY_LOCAL_MACHINE\SOFTWARE\Policies\Google\Chrome to achieve this?

- A. "Value: PolicyOverridePreference Type REG_SZ Data Cloud"
- B. "Value PolicySupercedence Type REG_SZ Data Cloud"
- C. "Value: LocalPolicyOverride Type: REG_DWORD Data 0"
- D. "Value: CloudPolicyOverridesPlatformPolicy Type REG_DWORD Data 1"

Answer: D

Explanation:
To ensure cloud policies override local policies on Windows, the administrator needs to create a specific Registry value. The correct value is `"CloudPolicyOverridesPlatformPolicy"` of type `REG_DWORD` with data `1`. This setting explicitly tells the Chrome browser to prioritize cloud-managed policies over local policies.

NEW QUESTION # 46
A company uses Chrome Enterprise Core to manage Chrome browsers for its employees and contractors who share devices They need a way to ensure the following:
* Full-Time Employees (FTEs) can only see and use extensions assigned to them
* Contractors can only see and use extensions assigned to them
* Both FTEs and contractors have access to a set of shared extensions
How can the Chrome administrator configure Chrome Enterprise Core to achieve this'?

- A. Create Organizational Units (OUs) for Shared devices, assign shared extensions to the OU. Create a separate group in the Google Admin Console for FTEs. Assign extensions to the group based on their needs
- B. Create separate groups in the Google Admin Console for FTEs and Contractors. Assign extensions to respective groups based on their needs
- C. Create Organizational Units (OUs) for Shared devices, assign shared extensions to the OU. Use Group Policy Objects to assign specific extensions by user group
- D. Ask users to install all the extensions they need on the shared device

Answer: A

Explanation:
The most effective way to manage extensions in this scenario is to use a combination of OUs and groups.
Create an OU for the shared devices and force-install the shared extensions at this OU level. Then, create separate user groups for FTEs and Contractors in the Google Admin console and force-install their specific extensions to these groups. User group policies have a higher precedence than OU policies, ensuring the correct extensions are available to each user type when they sign in to the shared devices. Option A mentions Group Policy Objects, which are for Windows environments and less relevant in a cloud-managed scenario across potentially different OSes. Option B doesn't address the shared device aspect effectively. Option C is not a managed approach.

NEW QUESTION # 47
Where can information about all of the profiles associated with a browser be found*?

- A. Managed devices
- B. Chrome log events
- C. Managed browsers detail

- D. Chrome Insights report

Answer: C

Explanation:
The "Managed browsers detail" page in the Google Admin console provides specific information about individual managed Chrome browser instances. This includes details about the profiles associated with that browser, such as the signed-in users and their management status. Chrome log events might contain some profile-related information but are more focused on actions. The "Managed devices" section primarily focuses on ChromeOS devices. The "Chrome Insights report" provides a high-level overview rather than detailed profile information for a specific browser instance.

NEW QUESTION # 48
......

The Professional Chrome Enterprise Administrator Certification Exam (Chrome-Enterprise-Administrator) exam questions can help you gain the high-in-demand skills and credentials you need to pursue a rewarding career. To do this you just need to pass the Professional Chrome Enterprise Administrator Certification Exam (Chrome-Enterprise-Administrator) certification exam which is not easy to crack.
