

C_BCBTP_2502權威認證 - C_BCBTP_2502熱門考古題

此外，這些Fast2test C_BCBTP_2502考試題庫的部分內容現在是免費的：https://drive.google.com/open?id=1GWs_WWby1czzA9evDEHOPwMoq8VAN9T

面對職場的競爭和不景氣時期，提升您的專業能力是未來最好的投資，而獲得SAP C_BCBTP_2502認證對於考生而言有諸多好處。相對於考生尋找工作而言，一張C_BCBTP_2502認證可以倍受企業青睞，為您帶來更好的工作機會。但是如何輕鬆拿到C_BCBTP_2502認證哪？Fast2test的C_BCBTP_2502考古題是通過考試最有效的方式之一，我們提供在線測試引擎的題庫，可以讓您模擬真實的考試情景，快速讓考生掌握知識點并應用。C_BCBTP_2502題庫資料包含真實的考題體型，100%幫助考生通過考試。

SAP C_BCBTP_2502 考試大綱：

主題	簡介
主題 1	<ul style="list-style-type: none">• Illustrating CIO Transformation Delivered by SAP Business Suite: This section of the exam evaluates the skills of IT Transformation Managers and covers the role of SAP Business Suite in delivering value for CIO-led digital transformation. It highlights the significance of SAP's portfolio in enterprise IT, introduces the capabilities of SAP BTP, and shows how it connects with end-to-end processes and industry-specific use cases. Candidates should also be able to identify the key products within SAP BTP and explain how cross-portfolio components integrate to deliver measurable value.
主題 2	<ul style="list-style-type: none">• Discovering SAP Business Technology Platform: This section of the exam measures the skills of SAP Solution Architects and focuses on positioning the SAP Business Technology Platform within the overall SAP Business Suite strategy. It includes understanding the platform's role in enabling transformation, aligning with enterprise strategy, and supporting digital innovation. Candidates are expected to recognize the relevance of SAP BTP in modern business processes and how it integrates with other SAP offerings.

SAP C_BCBTP_2502熱門考古題， C_BCBTP_2502考試指南

為了讓你可以確認C_BCBTP_2502考古題的品質，以及你是不是適合這個考古題，Fast2test的C_BCBTP_2502考古題的兩種版本都提供免費的部分下載。我們將一部分的C_BCBTP_2502試題免費提供給你，你可以在Fast2test的網站上搜索下載。體驗過之後再購買，這樣可以避免你因為不知道資料的品質而盲目購買以後覺得後悔這樣的事情。

最新的 SAP Certified Associate C_BCBTP_2502 免費考試真題 (Q26-Q31):

問題 #26

How does SAP HANA Cloud improve business data processing?

- A. Restricts data access to SAP applications only.
- **B. Enables in-memory computing for real-time analytics.**
- C. Requires batch processing for data retrieval.
- D. Eliminates cloud computing in favor of on-premise storage.

答案： B

解題說明：

The primary innovation of SAP HANA Cloud is its in-memory computing engine, which stores data in RAM rather than on traditional spinning disks. This architecture allows for the processing of vast amounts of data at speeds that are orders of magnitude faster than legacy databases. For the SAP Business Suite, this means that the boundary between "doing the work" (transactions) and "analyzing the work" (analytics) disappears. Users can run complex, multi-dimensional analytical queries on live, "hot" data without the need for time-consuming data extracts or batch processing.

By enabling real-time analytics, SAP HANA Cloud empowers business leaders to make decisions based on what is happening now, rather than what happened last week. It also introduces "data tiering," which allows organizations to manage costs by keeping frequently accessed data in-memory while moving less critical data to cheaper "warm" or "cold" storage (Data Lake), all while keeping it accessible through a single interface.

This flexibility is essential for modern enterprises that deal with "Big Data" but require the agility of the cloud. Positioning HANA Cloud as the data foundation of BTP ensures that every application built on the platform is inherently fast, scalable, and capable of delivering instant insights.

問題 #27

Which SAP BTP component supports microservices-based application development?

- A. SAP SuccessFactors
- B. SAP Concur
- C. SAP Business Network
- **D. SAP Kyma Runtime**

答案： D

解題說明：

As enterprises move toward modern, scalable application architectures, the move from monolithic codebases to microservices becomes essential. SAP Kyma Runtime is the specific component of SAP BTP designed to support this transition. It is a fully managed Kubernetes-based environment that allows developers to extend SAP applications using serverless functions and microservices. Kyma provides a cloud-native way to build and run containerized applications, offering high scalability and flexibility. Positioning Kyma within the SAP Business Suite ecosystem is critical for "side-by-side" extensibility. It allows developers to build specialized services—such as a custom loyalty engine or a unique logistics tracker—using their preferred programming languages and frameworks (like Node.js, Go, or Python) while maintaining a seamless connection to the SAP core. Kyma is particularly powerful for "event-driven" architectures; it can listen for events in SAP S/4HANA (like a "New Sales Order created" event) and instantly trigger a microservice to perform a specific action in a third-party system. This decouples the innovation layer from the stable core, allowing for rapid updates and deployments without risking the stability of the primary business processes.

問題 #28

Which SAP BTP component provides a centralized hub for managing enterprise APIs?

- A. SAP SuccessFactors
- B. SAP Ariba
- C. SAP Business Network
- **D. SAP API Management**

答案： D

解題說明：

As businesses move toward a "composable" architecture, APIs (Application Programming Interfaces) become the essential links between different software components. SAP API Management, a core capability of the SAP Integration Suite on BTP, provides a centralized hub to design, publish, secure, and monitor these APIs.

In a complex SAP Business Suite environment, APIs might be exposed from S/4HANA, SuccessFactors, or even third-party non-SAP systems. Without a centralized management tool, these connections become difficult to track, secure, and update.

SAP API Management allows IT administrators to enforce consistent security policies (such as OAuth or rate-limiting) across all enterprise services, protecting sensitive data from unauthorized access. It also includes a "Developer Portal," which serves as a self-service catalog where developers can discover and test available APIs, significantly speeding up the development of new applications and integrations. By positioning API Management as a central pillar, SAP BTP enables "API-first" development, which is critical for digital transformation. This ensures that the enterprise is open and connectable, allowing for seamless communication between the digital core and the vast ecosystem of cloud services, mobile apps, and IoT devices.

問題 #29

Which SAP BTP capability is crucial for supply chain resilience in the logistics industry?

- A. Restricting logistics data visibility to local servers.
- B. Manual coordination of supply chain operations.
- C. Limiting automation in fleet management.
- **D. Real-time data exchange and tracking with SAP Integration Suite.**

答案： D

解題說明：

Supply chain resilience depends on visibility and the ability to react to disruptions in real-time. The SAP Integration Suite on BTP is crucial here because it enables real-time data exchange and tracking across a global network of suppliers, carriers, and warehouses. In the logistics industry, delays at a single port or a shortage of specific raw materials can have a cascading effect. By integrating IoT (Internet of Things) sensors, GPS tracking, and carrier management systems through the BTP Integration Suite, companies can gain a

"control tower" view of their entire supply chain.

This connectivity allows for "event-driven" logistics. For example, if a shipment is delayed, the system can automatically trigger a notification in the SAP S/4HANA system, recalculate production schedules, and notify customers—all without manual intervention. This level of automation and visibility is what builds resilience; it allows businesses to pivot quickly when faced with unexpected challenges. Positioning SAP BTP as the integration hub for logistics ensures that data flows smoothly between the "digital core" and the physical world of shipping and receiving. This transforms the supply chain from a linear, often opaque process into a dynamic, responsive network that can withstand the pressures of modern global commerce.

問題 #30

Which SAP BTP solution can be used to streamline handling of blocked sales orders?

- A. SAP Analytics Cloud
- **B. SAP Build Process Automation**
- C. SAP Integration Suite
- D. SAP Datasphere

答案： B

解題說明：

Blocked sales orders often represent a significant bottleneck in the "Order-to-Cash" process, usually requiring manual intervention from credit managers or sales administrators. SAP Build Process Automation is the ideal BTP solution to streamline this task. It combines the capabilities of workflow management and Robotic Process Automation (RPA) to automate the evaluation and release (or escalation) of these orders based on predefined business rules and real-time data from SAP S/4HANA.

By positioning SAP Build Process Automation as the solution, businesses can implement "exception-based" management. Instead of a human reviewing every blocked order, the BTP service can automatically release orders that meet certain low-risk criteria or route high-value/high-risk blocks to the appropriate manager's mobile device for instant approval. This significantly reduces the "Day Sales Outstanding" (DSO) and improves customer satisfaction by accelerating fulfillment. This approach highlights the value of SAP BTP as an extension layer for the SAP Business Suite; it allows for the optimization of core ERP processes without the need for complex, custom ABAP development, maintaining a "clean core" while achieving high levels of operational efficiency.

問題 #31

.....

要在今日競爭的工作市場上成功，無論是尋找新的機會或是在您目前的職位上獲得升遷，都需要建立與展現您的技術專業和技能。C_BCBTP_2502 認證能夠滿足考生在激烈的職場生涯中脫穎而出，眾多國際知名認證廠商都在招聘與 SAP 技能相關職位時首先看中 C_BCBTP_2502 的認證證書，可見 C_BCBTP_2502 認證的含金量很高。
