## SAP Certified Associate - Process Data Analyst - SAP Signavio Sample Questions (Q22-Q27):

### NEW QUESTION # 22

What are some benefits of Process Mining? Note: There are 3 correct answers to this question.

- **A. Reduced costs**
- **B. Process standardization**
- C. Automated process documentation
- D. Higher automation rate
- **E. Ensured compliance**

**Answer: A,B,E**

Explanation:

Process Mining, as a component of SAP Signavio, offers various benefits that enhance business process efficiency and compliance.

The key advantages include:

\* **Reduced costs (A):** By identifying bottlenecks, inefficiencies, and deviations in processes, Process Mining enables organizations to optimize operations, leading to significant cost reductions. It helps in pinpointing unnecessary steps in a process that can be eliminated or streamlined, directly impacting the bottom line.

\* **Process standardization (C):** It promotes the standardization of processes across the organization by discovering the most efficient ways to execute processes and encouraging their adoption company-wide.

Standardization reduces variability, improves quality, and facilitates easier compliance with regulations.

\* **Ensured compliance (E):** Process Mining ensures compliance with internal and external regulations by providing transparency into actual processes. It can automatically detect deviations from predefined process models and highlight areas of non-compliance, enabling timely corrective actions.

While automated process documentation (B) and higher automation rate (D) are benefits associated with broader Business Process Management and automation tools, they are not direct outcomes of Process Mining itself.

### NEW QUESTION # 23

Where do you configure access rights for your workflow?

- **A. On the Actions tab**
- B. On the Versions tab
- C. On the Details tab
- D. On the Trigger tab

**Answer: A**

### NEW QUESTION # 24

Which Widgets can visualize process flows by backtracking the performed events? Note: There are 2 correct answers to this question.

- A. Correlation
- **B. Process Discovery**
- **C. Variant Explorer**
- D. Breakdown

**Answer: B,C**

### NEW QUESTION # 25

How can you capture relevant process tasks in a table-based approach?

- A. Use Process Reporting
- B. Use Process Documentation Template
- C. Use QuickModel
- D. Use Graphical Editor

**Answer: C**

### NEW QUESTION # 26

Which workflows support the governance of a process? Note: There are 2 correct answers to this question.

- A. Content assessment workflows
- B. Application interview workflows
- C. Approval workflows
- D. Data processing workflows

**Answer: A,C**

Explanation:

Workflows that support the governance of a process include:

\* Option B (Approval workflows): These are critical for ensuring that changes to processes undergo a review and approval procedure, maintaining control and quality over process modifications.

\* Option C (Content assessment workflows): These workflows are designed to evaluate the content of process models or documentation for accuracy, relevance, and compliance, playing a key role in the governance framework by ensuring the integrity and usefulness of process information.
