Providing You the Best Accurate GH-500 Valid Exam Bootcamp with 100% Passing Guarantee

There is a high demand for GitHub Advanced Security certification, therefore there is an increase in the number of Microsoft GH-500 exam candidates. Many resources are available on the internet to prepare for the GitHub Advanced Security exam. ExamcollectionPass is one of the best certification exam preparation material providers where you can find newly released Microsoft GH-500 Dumps for your exam preparation.

Microsoft GitHub Advanced Security Sample Questions (Q50-Q55):

NEW QUESTION # 50

When using CodeQL, how does extraction for compiled languages work?

- A. By monitoring the normal build process
- B. By resolving dependencies to give an accurate representation of the codebase
- C. By running directly on the source code
- D. By generating one language at a time

Answer: A

Explanation:

For compiled languages, CodeQL performs extraction by monitoring the normal build process. This means it watches your usual build commands (like make, javac, or dotnet build) and extracts the relevant data from the actual build steps being executed.

CodeQL uses this information to construct a semantic database of the application.

This approach ensures that CodeQL captures a precise, real-world representation of the code and its behavior as it is compiled, including platform-specific configurations or conditional logic used during build.

NEW QUESTION # 51

Assuming that notification settings and Dependabot alert recipients have not been customized, which user account setting should you use to get an alert when a vulnerability is detected in one of your repositories?

- A. Enable all for Dependency graph
- B. Enable all in existing repositories
- C. Enable by default for new public repositories
- **D. Enable all for Dependabot alerts**

Answer: D

Explanation:

To ensure you're notified whenever a vulnerability is detected via Dependabot, you must enable alerts for Dependabot in your personal notification settings. This applies to both new and existing repositories. It ensures you get timely alerts about security vulnerabilities.

The dependency graph must be enabled for scanning, but does not send alerts itself.

NEW QUESTION # 52

As a developer with write access, you navigate to a code scanning alert in your repository. When will GitHub close this alert?

- A. After you triage the pull request containing the alert
- **B. After you fix the code by committing within the pull request**
- C. When you use data-flow analysis to find potential security issues in code
- D. After you find the code and click the alert within the pull request

Answer: B

Explanation:

GitHub automatically closes a code scanning alert when the vulnerable code is fixed in the same branch where the alert was generated, usually via a commit inside a pull request. Simply clicking or triaging an alert does not resolve it. The alert is re-evaluated after each push to the branch, and if the issue no longer exists, it is marked as resolved.

NEW QUESTION # 53

What should you do after receiving an alert about a dependency added in a pull request?

- **A. Update the vulnerable dependencies before the branch is merged**
- B. Deploy the code to your default branch
- C. Fork the branch and deploy the new fork
- D. Disable Dependabot alerts for all repositories owned by your organization

Answer: A

Explanation:

If an alert is raised on a pull request dependency, best practice is to update the dependency to a secure version before merging the PR. This prevents the vulnerable version from entering the main codebase.

Merging or deploying the PR without fixing the issue exposes your production environment to known risks.

NEW QUESTION # 54

What is the purpose of the SECURITY.md file in a GitHub repository?

- A. readme.md
- B. support.md
- C. security.md
- D. contributing.md

Answer: C

Explanation:

The correct place to look is the SECURITY.md file. This file provides contributors and security researchers with instructions on how to responsibly report vulnerabilities. It may include contact methods, preferred communication channels (e.g., security team email), and disclosure guidelines.

This file is considered a GitHub best practice and, when present, activates a "Report a vulnerability" button in the repository's Security tab.

NEW QUESTION # 55

.....

If you fail in the exam with our GH-500 quiz prep we will refund you in full at one time immediately. If only you provide the proof which include the exam proof and the scanning copy or the screenshot of the failure marks we will refund you immediately. If any problems or doubts about our GH-500 exam torrent exist, please contact our customer service personnel online or contact us by mails and we will reply you and solve your doubts immediately. Before you buy our product, you can download and try out it freely so you can have a good understanding of our GH-500 Quiz prep. Please feel safe to purchase our GH-500 exam torrent any time as you like. We provide the best service to the client and hope the client can be satisfied.

GH-500 Reliable Test Pattern: <https://www.examcollectionpass.com/Microsoft/GH-500-practice-exam-dumps.html>

Many candidates know our GH-500 practice test materials are valid and enough to help them clear GH-500 exams, With the help of GH-500 training dumps, you can face the exam easily, The GitHub Advanced Security (GH-500) questions are available in three easy-to-use forms, It means we will provide the new updates of our GH-500 preparation dumps freely for you later after your payment, We also offer free Microsoft GH-500 exam questions updates for 1 year after purchase, as well as a free GH-500 practice exam questions demo before purchase.

Doing this makes it easier to maintain your code GH-500 because then any changes or corrections have to be made only once, Drag left or right to skip through the song, Many candidates know our GH-500 Practice Test materials are valid and enough to help them clear GH-500 exams.

100% Pass 2026 Microsoft GH-500 The Best Valid Exam Bootcamp

With the help of GH-500 training dumps, you can face the exam easily, The GitHub Advanced Security (GH-500) questions are available in three easy-to-use forms, It means we will provide the new updates of our GH-500 preparation dumps freely for you later after your payment.

We also offer free Microsoft GH-500 exam questions updates for 1 year after purchase, as well as a free GH-500 practice exam questions demo before purchase.
