## Test EAEP2201 Practice & EAEP2201 Reliable Exam Price

With all of these EAEP2201 study materials, your success is 100% guaranteed. Moreover, we have Demos as freebies. The free demos give you a prove-evident and educated guess about the content of our EAEP2201 practice materials. As long as you make up your mind on this exam, you can realize their profession is unquestionable. And their profession is expressed in our EAEP2201 training prep thoroughly. They are great help to pass the EAEP2201 exam and give you an unforgettable experience.

## Esri Enterprise Administration Professional 2201 Sample Questions (Q68-Q73):

### NEW QUESTION # 68

An administrator needs to share content with a specific group of users. The administrator is concerned that several important applications will stop working for the users if they leave the group.

Which action should the administrator perform to prevent users from leaving the group?

- A. Create an administrative group
- B. Change the role of the users
- C. Create a group visible only to group members

Answer: A

Explanation:

In ArcGIS Enterprise, when creating a new group, administrators have the option to designate it as an Administrative Group. This designation restricts members from leaving the group voluntarily; only the group owner or a group manager can remove members. This ensures that critical applications and content shared within the group remain accessible to all intended users, preventing disruptions caused by users inadvertently or intentionally leaving the group.

It's important to note that this setting can only be applied during the creation of a new group and cannot be modified later.

Reference Source: ArcGIS Enterprise documentation on creating administrative groups

#### NEW QUESTION # 69

A GIS analyst creates a layer in ArcGIS Pro that must be published to the ArcGIS Enterprise portal as a web service that supports editing. The analyst does not have a connection to the ArcGIS Server where the service must be published.

What action should the analyst perform?

- A. Create a service definition file to be published by a portal administrator
- B. Change the privileges on their user role to allow publishing
- C. Upload the layer to the portal as a layer package file and add it to a web map

**Answer: A**

Explanation:

When a direct connection to the ArcGIS Server is not available, the recommended approach is to create a service definition (.sd) file in ArcGIS Pro. This file encapsulates the map, its data, and the necessary configurations for publishing. The analyst can then provide this file to a portal administrator, who can publish it to the ArcGIS Enterprise portal, ensuring the service supports editing as required.

Changing user privileges (Option B) does not address the lack of server connection. Uploading a layer package (Option C) does not result in a web service that supports editing capabilities.

Reference Source: ArcGIS Pro documentation on publishing services using service definition files

#### NEW QUESTION # 70

An organization recently upgraded Portal for ArcGIS. The organization must reduce the number of named users to the maximum allowed by the authorization file and delete members in bulk.

Which action should the administrator perform?

- A. Use command line utilities
- B. Delete users using the Member tab
- C. Batch delete users with ArcPy

**Answer: C**

#### NEW QUESTION # 71

A user must create groups, edit features, and create web apps. This user will also create print layouts, charts, and animations using ArcGIS Pro. The organization has no additional add-on licenses.

Which user type should be configured for this user?

- A. GIS Professional
- B. Editor
- C. Creator

**Answer: A**

Explanation:

The GIS Professional user type includes access to ArcGIS Pro, which is required for creating print layouts, charts, animations, and conducting advanced analysis. It also includes capabilities such as creating groups, editing features, and creating web apps within the ArcGIS Enterprise portal without needing additional add-on licenses.

The Creator user type supports most web GIS tasks but does not include ArcGIS Pro unless an add-on license is assigned.

The Editor user type is the most limited and is intended for editing existing content only, not for creating or managing groups or web applications.

Reference Source: ArcGIS Enterprise documentation - User types, capabilities, and included applications

### NEW QUESTION # 72

An ArcGIS Enterprise administrator wants to publish their feature classes as layers in bulk from a registered geodatabase. Which action should the administrator perform?

- A. Create a data store item in the ArcGIS Enterprise portal
- **B. Register the geodatabase in ArcGIS Server Manager**
- C. Register as a hosted layer in ArcGIS Data Store
- D. Import an SDE connection file into ArcGIS Server Administrator Directory

**Answer: B**

Explanation:

To publish feature classes as services in bulk from an enterprise geodatabase, it must first be registered with the ArcGIS Server site. This registration tells ArcGIS Server where to access the data directly for referenced service publishing. The proper way to do this is through ArcGIS Server Manager.

From ArcGIS Enterprise documentation:

"To publish layers directly from a registered enterprise geodatabase without copying data, you must register the geodatabase with your ArcGIS Server site using ArcGIS Server Manager."

\* Option B is used for hosted services, not referenced publishing.

\* Option C is not the correct interface for registering data sources.

\* Option D involves hosting data, which is not applicable for referenced layers from a geodatabase.
