Scrum SSM certification exam is offered by the Scaled Agile Academy, which is the certifying body for the Scaled Agile Framework (SAFe). SSM exam is a multiple-choice test that consists of 45 questions, which must be completed within 90 minutes. SSM exam is designed to test the candidate's knowledge of Scrum and SAFe, as well as their ability to apply this knowledge in real-world scenarios.

Scrum SSM: SAFe 5 Scrum Master (SSM) exam covers a range of topics, including the roles and responsibilities of a Scrum Master, the principles and practices of Agile, and the SAFe framework. SSM Exam also covers how to facilitate team events, such as Sprint planning, Sprint review, and Daily Scrum meetings. Additionally, the exam covers how to coach teams, stakeholders, and Product Owners to achieve successful outcomes.

SSM Testking Cram & SSM Vce Torrent & SSM Prep Pdf

The passing rate of our SSM test torrent is high but if you fail in the exam we will refund you in full immediately. Some people may worry that the refund procedure is complicate but we guarantee to the client that the refund procedure is very simple. If only you provide the screenshot or the scanning copy of SSM exam failure marks list we will refund you immediately and the process is really simple. It is very worthy for you to buy our SSM Guide questions and we can help you pass the exam successfully. If you have any problems please contact us by the online customer service or the mails, and we will reply and solve your problem immediately.

Scrum SSM (6.0) - SAFe® Scrum Master Sample Questions (Q27-Q32):

NEW QUESTION # 27

Which SAFe organizational construct allows businesses to build large and complex systems in a Lean-Agile manner?

- A. Value Stream
- B. Portfolio
- C. Solution Train
- D. Agile Release Train

Answer: D

NEW QUESTION # 28

What is the intended value of the Team Sync event?

- A. The team reviews and improves processes before the next Iteration
- B. The team is able to commit to a set of goals to be delivered in the Iteration

- C. The team is able to prepare requirements for Iteration Planning
- **D. The team aligns on the progress of Iteration Goals**

Answer: D

Explanation:

The Team Sync (or Daily Stand-up) in SAFe is a short, focused, timeboxed event that allows the team to align on progress toward iteration goals, identify impediments, and plan the next 24 hours.

The meeting promotes transparency and collaboration, ensuring that all team members are aware of progress and issues that could affect delivery. It also reinforces self-management by allowing the team to adapt plans daily based on new information.

From SAFe guidance:

"The Team Sync allows team members to align on progress toward iteration goals, discuss impediments, and adjust their plans to stay on track." Thus, the correct answer is A. The team aligns on the progress of Iteration Goals, as it captures the event's primary intent.

NEW QUESTION # 29

What are two typical anti-patterns with Product Owners (POs)? (Choose two.)

- A. POs facilitate story grooming sessions with the team during the Iteration
- B. POs bring the business problem to the team and ask the team to design the solution
- **C. POs design the solution before bringing the intent to the team**
- **D. POs ask the team for help in writing user stories**
- E. POs and Product Managers are not aligned with business intent

Answer: C,D

NEW QUESTION # 30

What is one benefit of having an IP Iteration every PI?

- A. It creates a guardrail for teams working too hard
- **B. It creates an estimating buffer for meeting PI objectives**
- C. It creates a timeboxed opportunity for team growth
- D. It creates a chance for teams to manage quality

Answer: B

Explanation:

One benefit of having an IP Iteration every PI is that it creates an estimating buffer for meeting PI objectives. PI objectives are a set of SMART goals that align the teams and stakeholders to a common vision and mission for the upcoming Program Increment (PI). They are derived from the business context, priorities, and dependencies, and are agreed upon and committed by the teams during PI Planning¹ However, since PI objectives are based on estimates and assumptions, there is always a degree of uncertainty and variability in the delivery process. To account for this, SAFe recommends that teams reserve 10% of their capacity for each PI as an estimating buffer. This buffer is used during the IP Iteration, which is a unique, dedicated iteration that occurs every PI and provides dedicated time for innovation, continuing education, PI Planning, and Inspect and Adapt events² By having an IP Iteration as an estimating buffer, the teams can improve the predictability and flow of value delivery, as well as reduce the stress and pressure of meeting the PI objectives³ (Must be taken from SAFe 6 Scrum Master resources) Reference:

NEW QUESTION # 31

How does the "C" in the CALMR approach to DevOps help teams manage tensions caused by differing needs?

- A. By identifying a collaborative approach to deployment

- B. By establishing communication between different teams
- **C. By creating a culture of shared responsibility**
- D. By committing to a balance of speed and quality

Answer: C

Explanation:

The "C" in the CALMR approach to DevOps stands for culture, which is the foundation of successful DevOps adoption. Culture refers to the values, beliefs, and behaviors that guide the collaboration and alignment of everyone in the value stream. By creating a culture of shared responsibility, teams can manage the tensions caused by differing needs, such as speed, quality, security, and stability. A culture of shared responsibility means that everyone is accountable for the outcomes of their work, and that they work together to deliver value to the customers. It also means that teams respect each other's roles and expertise, and seek feedback and learning opportunities. A culture of shared responsibility fosters trust, transparency, and continuous improvement, which are essential for DevOps.
