ITexamReview's products are developed by a lot of experienced IT specialists using their wealth of knowledge and experience to do research for IT certification exams. So if you participate in Pure Storage certification FAAA\_005 exam, please choose our ITexamReview's products, ITexamReview can not only provide you a wide coverage and good quality exam information to guarantee you to let you be ready to face this very professional exam but also help you pass Pure Storage Certification FAAA\_005 Exam to get the certification.

The main benefit of Pure Storage FAAA\_005 exam dumps in hand experience in technical subjects is that you shall know its core points. You don't have to just note the points and try remembering each. You shall know the step-wise process of how you can execute a procedure and not skip any FAAA\_005 point. Experience gives you a clear insight into everything you study for your Pure Storage certification exam. So, when you get the Pure Storage FlashArray Architect Associate FAAA\_005 exam dumps for the exam, make sure that you get in hand experience with all the technical concepts.

## Pure Storage FAAA\_005 Exam Practice Test Questions Available In Three User-Friendly Formats

Obtaining a certificate has many benefits, you can strengthen your competitive force in the job market, enter a better company, and double your wage etc. FAAA\_005 exam bootcamp of us will help you get the certificate successfully. With experienced experts to edit and verify, FAAA\_005 exam dumps are high quality and accuracy. You can pass the exam just one time. In addition, FAAA\_005 Exam Bootcamp contain both questions and answers, and you can check the answer easily. Free update for 365 days is available. Our system will send the latest version of FAAA\_005 exam dumps to you automatically.

## Pure Storage FlashArray Architect Associate Sample Questions (Q31-Q36):

### NEW QUESTION # 31

A System Administrator has a FlashArray//X70R3. They need to add a backup element as part of their data protection strategy. They have the following requirements:

- \* The solution should be offsite
- \* Cost needs to be kept as low as possible
- \* The backup needs to be stored in a different location from their current FlashArray
- \* Restore times are not a concern

Which solution should the SE recommend to the System Administrator?

- A. CloudSnap to a public cloud provider
- B. ActiveDR to a FlashArray//C60
- C. ActiveCluster to a FlashArray//C60

**Answer: A**

**Explanation:**

The System Administrator requires an offsite backup solution that is cost-effective, stores data in a different location from the current FlashArray, and does not prioritize restore times. The best solution to recommend is CloudSnap to a public cloud provider.

**Why This Matters:**

**CloudSnap:**

CloudSnap is a feature that offloads snapshots to cloud storage providers like AWS S3 or Azure Blob.

It is highly cost-effective because customers only pay for the cloud storage they use, and it eliminates the need for additional on-premises hardware.

Since restore times are not a concern, CloudSnap's slower restore process compared to on-premises solutions is acceptable.

**Why Not the Other Options?**

**A). ActiveCluster to a FlashArray//C60:**

ActiveCluster provides synchronous replication for high availability but does not meet the requirement for an offsite backup solution. Additionally, it is more expensive than CloudSnap.

**B). ActiveDR to a FlashArray//C60:**

ActiveDR provides asynchronous replication for disaster recovery but requires additional hardware (FlashArray//C60), which increases costs. It is less cost-effective than CloudSnap for backup purposes.

**Key Points:**

**Cost Efficiency:** CloudSnap leverages cloud storage, minimizing upfront and ongoing costs. **Offsite Storage:** Ensures backups are stored in a different location from the primary FlashArray. **Restore Times:** CloudSnap's slower restore process is acceptable given the customer's requirements.

**NEW QUESTION # 32**

A manufacturing customer is running Oracle volumes on their existing //X90R3 array and would like to use FlashArray for their Windows file shares. They are asking if it is feasible to do this.

How should the SE respond?

- A. The customer needs to upgrade to XL to be able to use FA File.
- B. The customer should migrate their Windows file servers to Pure.
- **C. The customer should be able to use their current FlashArray.**

**Answer: C**

**Explanation:**

The SE should respond that the customer can use their current FlashArray for Windows file shares alongside their existing Oracle workloads. Pure Storage FlashArray is a versatile platform capable of supporting multiple workloads, including block storage for databases (e.g., Oracle) and file services for Windows file shares.

**Why This Matters:**

**FlashArray Versatility:**

Pure Storage FlashArray supports both block and file workloads through its integrated architecture. While FlashArray is primarily known for block storage, it can also support file workloads using FA File Services, which provides NFS and SMB protocols for file sharing.

The customer does not need to migrate their Windows file servers or upgrade their hardware unless there are specific capacity or performance constraints.

**Current Array Feasibility:**

Assuming the existing //X90R3 array has sufficient capacity and performance headroom, it can handle the additional workload without requiring upgrades.

**Why Not the Other Options?**

**A). The customer should migrate their Windows file servers to Pure:**

While migrating file servers to Pure Storage can provide benefits like simplified management and improved performance, it is not a requirement. The customer can continue using their existing file servers while leveraging FlashArray for block storage.

**B). The customer needs to upgrade to XL to be able to use FA File:**

Upgrading to a higher-end model like FlashArray//XL is unnecessary unless the current array lacks the required capacity or performance for the additional workload. The //X90R3 is fully capable of supporting FA File Services.

**Key Points:**

**Versatility:** FlashArray can support both block and file workloads simultaneously.

**No Immediate Upgrades Needed:** The current array can likely handle the additional workload without requiring hardware changes.

Workload Consolidation: Using a single platform for multiple workloads simplifies infrastructure and reduces costs.

### NEW QUESTION # 33

Which Evergreen/Forever benefit allows a customer to trade in an existing 12 TB shelf for a new 60 TB shelf while only paying for a 48 TB increase?

- **A. Right-Size Guarantee**
- B. Flat is Fair Maintenance
- C. Love Your Storage
- D. Capacity Consolidation

**Answer: A**

Explanation:

The Right-Size Guarantee is an Evergreen/Forever benefit that allows customers to trade in existing storage shelves for newer, higher-capacity shelves while only paying for the incremental capacity increase. In this scenario, the customer can trade in a 12 TB shelf for a 60 TB shelf and only pay for the additional 48 TB of capacity.

Why This Matters:

The Right-Size Guarantee ensures that customers can upgrade their storage infrastructure without overpaying for capacity they already own. This aligns with Pure Storage's commitment to providing flexible and cost-effective storage solutions.

By leveraging this benefit, the customer can modernize their storage environment while optimizing costs.

Why Not the Other Options?

A). Capacity Consolidation:

Capacity Consolidation refers to the ability to consolidate workloads onto fewer arrays or shelves, but it does not specifically address trading in existing shelves for higher-capacity ones at a reduced cost.

B). Flat is Fair Maintenance:

Flat is Fair Maintenance ensures predictable and consistent maintenance pricing over time, but it does not apply to upgrading or trading in storage shelves.

D). Love Your Storage:

Love Your Storage is a program that provides hardware upgrades and enhancements, but it does not directly relate to trading in shelves for capacity increases.

Key Points:

Right-Size Guarantee: Allows customers to trade in existing shelves for higher-capacity shelves at a reduced cost.

Cost Optimization: Ensures customers only pay for the incremental capacity increase, reducing total cost of ownership (TCO).

Evergreen Benefits: Part of Pure Storage's commitment to delivering flexible and future-proof storage solutions.

### NEW QUESTION # 34

Which two public cloud storage services are supported as offload targets for Purity CloudSnap? (Choose two.)

- **A. Amazon AWS S3**
- **B. Azure Blob Storage**
- C. Amazon AWS EBS
- D. IBM Object Storage

**Answer: A,B**

Explanation:

Purity CloudSnap is a feature of Pure Storage FlashArray that enables customers to offload snapshots to public cloud storage for long-term retention or disaster recovery purposes. To determine which public cloud storage services are supported as offload targets, let's analyze the options:

Analysis of Options:

A). Amazon AWS S3:

Amazon S3 (Simple Storage Service) is one of the most widely used object storage services in the public cloud.

Purity CloudSnap supports AWS S3 as an offload target, making it a valid choice.

B). IBM Object Storage:

IBM Object Storage is not currently supported as an offload target for Purity CloudSnap.

Pure Storage focuses on integration with major cloud providers like AWS and Azure.

C). Amazon AWS EBS:

Amazon EBS (Elastic Block Store) is a block storage service designed for use with EC2 instances.

However, CloudSnap does not support AWS EBS as an offload target because it is intended for object storage services like S3.

D). Azure Blob Storage:

Azure Blob Storage is Microsoft's object storage service, similar to AWS S3.

Purity CloudSnap supports Azure Blob Storage as an offload target, making it a valid choice.

Recommendation:

The correct answers are

A). Amazon AWS S3 and

D). Azure Blob Storage, as these are the supported public cloud storage services for CloudSnap.

Reference: Pure Storage CloudSnap Documentation:

CloudSnap Overview

Explains how CloudSnap integrates with public cloud storage services.

Supported Cloud Providers:

CloudSnap Supported Targets

Lists AWS S3 and Azure Blob Storage as supported offload targets.

### NEW QUESTION # 35

What allows for array upgrades without any degradation in performance?

- A. Right-Size Guarantee
- **B. Non-disruptive upgrades**
- C. ActiveCluster
- D. Protection groups

**Answer: B**

Explanation:

The feature that allows for array upgrades without any degradation in performance is non-disruptive upgrades.

Why This Matters:

Non-Disruptive Upgrades:

Pure Storage FlashArray supports rolling upgrades, enabling software updates (e.g., Purity//FA) and hardware upgrades (e.g., controllers) without interrupting operations.

During a controller upgrade, the active/active architecture ensures that one controller continues handling I/O operations while the other is upgraded, maintaining consistent performance.

Why Not the Other Options?

A). ActiveCluster:

ActiveCluster provides synchronous replication for high availability but does not directly relate to non-disruptive upgrades.

C). Right-Size Guarantee:

The Right-Size Guarantee ensures customers receive the expected effective capacity based on their workload's data reduction profile. It is unrelated to upgrades or performance.

D). Protection groups:

Protection groups are used for replication and snapshot management but do not impact the ability to perform non-disruptive upgrades.

Key Points:

Non-Disruptive Upgrades: Ensure seamless updates without impacting performance or availability.

Active/Active Architecture: Enables continuous I/O processing during upgrades.

Customer Experience: Minimizes downtime and disruption during maintenance or upgrades.
