100% Pass ISQI Realistic Reliable CPRE-FL_Syll_3.0 Exam Questions

A growing number of people start to take the CPRE-FL_Syll_3.0 exam in order to gain more intensifying attention in the different field. It is known to us that the knowledge workers have been playing an increasingly important role all over the world, since we have to admit the fact that the CPRE-FL_Syll_3.0 certification means a great deal to a lot of the people, especially these who want to change the present situation and get a better opportunity for development. Our CPRE-FL_Syll_3.0 Exam Questions will help you make it to pass the CPRE-FL_Syll_3.0 exam and get the certification for sure.

ISQI IREB Certified Professional for Requirements Engineering. Foundation Level Sample Questions (Q172-Q177):

NEW QUESTION # 172

Choose the correct sentence regarding phrase templates for requirements:

- A. Should is used for mandatory requirements.
- B. Even requirements using may are mandatory.
- C. Shall is used for requirements that are strongly desired but not mandatory.
- D. Will is used for factual statements, not requirements.

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

The handbook prescribes specific modal verbs: shall indicates a mandatory requirement-non-compliance means the system is not acceptable. Should denotes a desirable, but not strictly mandatory, property. May expresses an option or permission, not an obligation. Will is reserved for statements of fact or project constraints (e.g., "the system will run on hardware X"), not for normative requirements. Therefore only statement C correctly captures the recommended usage of "will"; A, B and D contradict the defined semantics of the modal verbs.

NEW QUESTION # 173

Which of the following is NOT a good practice for selecting/introducing a new RE tool?

- A. Apply the tool to a non-critical project.
- B. Focus on the acquisition costs.
- C. Train employees to ensure proper and effective use of the tool.
- D. Deploy the tool in parallel with an ongoing project to ensure redundancy and minimize risks.

Answer: B

Explanation:

Got it - I'll re-cast this whole batch in your MCQ format.

NEW QUESTION # 174

The following factors favour the adoption of a linear RE process, EXCEPT:

- A. The ability to change requirements easily is important for the project.
- B. The development process for the system is plan-driven.
- C. The stakeholders are available, know their requirements, and can specify them up front.
- D. A comprehensive requirements specification is required as a contractual basis for outsourcing or tendering the design and implementation of the system.

Answer: A

NEW QUESTION # 175

You carry out modelling of requirements with a use case diagram. Which answer best describes its prospective modelling elements? (1 Point)

- A. Actors, use cases and associations
- B. Objects, activities and associations
- C. Actors, messages and activities
- D. Objects, use cases and activities

Answer: A

NEW QUESTION # 176

All of the following are considered to be principles of Requirements Engineering, EXCEPT:

- A. Requirements should be viewed as the end in itself, not as a means to an end.
- B. Requirements Engineering is about satisfying the stakeholders' needs.
- C. Systems cannot be understood under an isolated point of view.

- D. It is impossible to successfully develop a system without a common basis of understanding.

Answer: A

NEW QUESTION # 177

.....
