

ANS-C01真題材料 -你通過考試最佳的利劍AWS Certified Advanced Networking Specialty Exam

此外，這些NewDumps ANS-C01考試題庫的部分內容現在是免費的：<https://drive.google.com/open?id=1QUusiMrKE3WGn6u8YObJjGtSoz5hPYO6>

我們NewDumps的Amazon的ANS-C01考試培訓資料是以PDF和軟體格式提供，它包含NewDumps的Amazon的ANS-C01考試的試題及答案，你可能會遇到真實的ANS-C01考試，這些問題堪稱完美，和可行之有效的有效的方法，在任何Amazon的ANS-C01考試中獲得成功，NewDumps Amazon的ANS-C01全面涵蓋所有教學大綱及複雜問題，NewDumps的Amazon的ANS-C01考試的問題及答案是真正的考試挑戰，你必須要擦亮你的技能和思維定勢。

Amazon ANS-C01 認證考試已經成為了IT行業中很熱門的一個考試，但是為了通過考試需要花很多時間和精力掌握好相關專業知識。在這個時間很寶貴的時代，時間就是金錢。NewDumps為Amazon ANS-C01 認證考試提供的培訓方案只需要20個小時左右的時間就能幫你鞏固好相關專業知識，讓你為第一次參加的Amazon ANS-C01 認證考試做好充分的準備。

>> ANS-C01真題材料 <<

最受歡迎的ANS-C01真題材料，免費下載ANS-C01考試題庫得到妳想要的Amazon證書

想參加Amazon的ANS-C01認證考試嗎？你正在因為考試很難而發愁嗎？想報名參加考試，但是又擔心通過不了。你現在有這樣的心情嗎？沒關係，安心地報名吧。因為你只要用了NewDumps的資料，再難的考試也不是問題。即使你對通過考試一點信心也沒有，NewDumps的ANS-C01考古題也可以保證你一次就輕鬆成功。覺得不可思議嗎？你可以來NewDumps的網站瞭解更多的資訊。另外，你還可以先試用ANS-C01考古題的一部分。這樣的話你肯定就會知道，這個參考資料是你順利通過考試的保障。

獲得ANS-C01證書可以展示考生在AWS上設計和實施先進網絡解決方案的專業知識。同時，它還表明考生對AWS服務有深刻的理解，並知道如何使用它們創建安全、可擴展和高可用性的網絡。這種證書對於尋找技能豐富的網絡專業人士負責管理其AWS基礎架構的雇主來說非常重要。

最新的 AWS Certified Specialty ANS-C01 免費考試真題 (Q281-Q286):

問題 #281

A company is deploying a web application into two AWS Regions. The company has one VPC in each Region. Each VPC has three Amazon EC2 instances as web servers behind an Application Load Balancer (ALB). The company already has configured an Amazon Route 53 public hosted zone for example.com. Users will access the application by using the fully qualified domain name (FQDN) of app.example.com.

The company needs a DNS solution that allows global users to access the application. The solution must route the users' requests to the Region that provides the lowest response time. The solution must fail over to the Region that provides the next-lowest response time if the application is unavailable in the initially intended Region.

Which solution will meet these requirements?

- A. For each ALB, create an A record that has a geolocation routing policy to route app.example.com to the IP addresses of the ALB. Configure a Route 53 HTTP health check that monitors each ALB by IP address. Associate the health check with the A records.
- B. For each ALB, create an A record that has a latency-based routing policy to route app.example.com as an alias to the ALB. Set the value for Evaluate Target Health to Yes for the records.
- C. Create an A record that has a latency-based routing policy to route app.example.com as an alias to one of the ALBs. Configure a Route 53 health check that monitors TCP port 80 for each ALB by IP address. Associate the health check with the A records.
- D. Create an A record that has a geolocation routing policy to route app.example.com to the IP addresses for both ALBs. Configure a Route 53 health check that monitors TCP port 80 for each ALB by IP address. Associate the health check with the A records.

答案： B

問題 #282

A development team is building a new web application in the AWS Cloud. The main company domain, example.com, is currently hosted in an Amazon Route 53 public hosted zone in one of the company's production AWS accounts.

The developers want to test the web application in the company's staging AWS account by using publicly resolvable subdomains under the example.com domain with the ability to create and delete DNS records as needed. Developers have full access to Route 53 hosted zones within the staging account, but they are prohibited from accessing resources in any of the production AWS accounts.

Which combination of steps should a network engineer take to allow the developers to create records under the example.com domain? (Choose two.)

- A. Create a public hosted zone for staging.example.com in the staging account.
- B. Create an example.com NS record in the staging example.com domain. Populate the value with the name servers from the example.com domain. Set the routing policy type to simple routing.
- C. Create a staging.example.com NS record in the example.com domain. Populate the value with the name servers from the staging.example.com domain. Set the routing policy type to simple routing.
- D. Create a private hosted zone for staging example.com in the staging account.
- E. Create a public hosted zone for example.com in the staging account

答案： A,C

解題說明：

When a client queries a DNS server for a domain name, the DNS server typically starts by looking for NS records to determine which name servers are authoritative for the domain. The DNS server then queries the authoritative name servers to obtain the information about the domain that the client requested.

For example, suppose you own the domain example.com, but you want to delegate control of the subdomain sub.example.com to a different set of name servers. You would create NS records in the example.com zone file that point to the name servers for sub.example.com. This tells DNS servers that the name servers for sub.example.com are authoritative for that subdomain, and they should query those name servers for any requests related to sub.example.com.

問題 #283

A company operates in the us-east-1 Region and the us-west-1 Region. The company is designing a solution to connect an on-premises data center to the company's AWS environment in us-east-1. The solution uses two AWS Direct Connect connections. Traffic from us-west-1 to the data center needs to traverse the Direct Connect connections. A network engineer needs to set up active-passive functionality across the two Direct Connect connections by using a Direct Connect gateway to influence inbound traffic from VPCs that are in us-west-1 to the data center.

Which solution will meet these requirements?

- A. Use local preference BGP community tags to apply the 7224:9300 local preference BGP community tag to the prefixes for the primary connection. Apply the 7224:9100 local preference BGP community tag to the prefixes for secondary connection.
- B. At the data center, set the local preference for the primary connection to be higher than the local preference for the secondary connection.
- C. Use AS path prepending to set the AS path on the primary connection to be longer than the AS path on the secondary connection.
- D. Use local preference BGP community tags to apply the 7224:7300 local preference BGP community tag to the prefixes for the primary connection. Apply the 7224:7100 local preference BGP community tag to the prefixes for the secondary

connection.

答案： A

解題說明：

To control inbound traffic from AWS to the on-premises data center, local preference BGP community tags are used with a Direct Connect gateway.

AWS uses the following tags:

7224:9300 sets higher local preference (preferred route).

7224:9100 sets lower local preference (less preferred).

Applying 7224:9300 to the primary connection and 7224:9100 to the secondary connection ensures active-passive routing behavior for inbound traffic from AWS VPCs.

問題 #284

Which endpoint is considered to be best practice when analyzing data within a Configuration Stream of AWS Config?

Note: Answers to this question are not verified by our experts, please study yourself and select the appropriate answers.

Contribute: Please send the correct answers with reference text/link on feedback@VMexam.com to get up to 50% cashback.

Response:

- A. Kinesis
- B. SNS
- C. SQS
- D. E-Mail

答案： C

問題 #285

Which of the following statements does not describe Jumbo Frames in an AWS VPC environment?

Response:

- A. For instances that are colocated inside a placement group, jumbo frames help to achieve the maximum network throughput possible
- B. Jumbo Frames are not supported for traffic that exits the Virtual Private Gateway
- C. Jumbo Frames are not supported for traffic that exits the Internet Gateway
- D. T2.micro instances do not support Jumbo Frames

答案： D

問題 #286

.....

擁有 Amazon ANS-C01 認證可以評估你在公司的價值和能力，但是通過這個考試是比較困難的。而 ANS-C01 考題資料能幫考生掌握考試所需要的知識點，擁有良好的口碑，只要你選擇 Amazon ANS-C01 考古題作為你的考前復習資料，你就會相信自己的選擇不會錯。在您購買 Amazon ANS-C01 考古題之前，我們所有的題庫都有提供對應免費試用的 demo，您覺得適合在購買，這樣您可以更好的了解我們產品的品質。

ANS-C01 測試: <https://www.newdumps.com/ANS-C01-exam-new-dumps.html>

你已經看到 NewDumps Amazon 的 ANS-C01 考古題考試認證培訓資料，是時候做出選擇了，你甚至可以選擇其他的產品，不過你要知道我們 NewDumps 帶給你的無限大的利益，也只有 NewDumps 能給你 100% 保證成功，NewDumps 能讓你有一個美好的前程，讓你以後在 IT 行業有更寬廣的道路可以走，高效率的工作在資訊技術領域，如果您沒能通過 ANS-C01 考試，我們會全額退款給你，能否成功通過一項考試，並不在於你看了多少東西，而在於你是否找對了方法，NewDumps 就是你通過 ANS-C01 認證考試的正確方法，NewDumps ANS-C01 測試之所以能夠獨一無二地提供全面和高品質的資料的原因是我們擁有專業的專家團隊，Amazon ANS-C01 真題材料在 IT 行業工作的你肯定也在努力提高自己的技能吧。

伊麗安猶如小女孩般懇求著，夸脫大圖自大流行引起的遠程辦公開始以來，公司就迫不及待地想回家永遠工作，

你已經看到NewDumps Amazon的ANS-C01考古題考試認證培訓資料，是時候做出選擇了，你甚至可以選擇其他的產品，不過你要知道我們NewDumps帶給你的無限大的利益，也只有NewDumps ANS-C01能給你100%保證成功，NewDumps能讓你有一個美好的前程，讓你以後在IT行業有更寬廣的道路可以走，高效率的工作在資訊技術領域。
