近年、IT技術の急速な発展に伴って、IT技術を勉強し始める人がますます多くなっています。そこで、IT業界で働く人も多くなっています。このように、IT業界の競争が一層激しくなります。同様にIT業界で働いていて、IT夢を持っているあなたは、きっと他の人にキャッチアップされ、追い抜かれることを望まないでしょう。それでは、ずっと自分自身のスキルをアップグレードすることが必要になり、他の人に自分の強さを証明する必要があります。では、どうやって自分の能力を証明するのですか。多くの人々はIT認定試験を受験して認証資格を取ることを通して彼らの強さを証明します。あなたもIT認証資格を取りたいですか。まずEXINのCITM認定試験に合格しましょう。これはEXINの最も重要な試験の一つで、業界全体に認証された資格です。

## EXIN CITM 認定試験の出題範囲：

トピック	出題範囲
トピック 1	<ul style="list-style-type: none"><li>IT Strategy: This section of the exam measures the skills of an IT Strategy Manager and covers the development and alignment of IT strategy with business objectives. It emphasizes creating strategic plans to support organizational goals, understanding emerging technologies, and ensuring that IT investments contribute to competitive advantage and operational efficiency.</li></ul>

トピック 2	<ul style="list-style-type: none"> <li>• <b>Project Management:</b> This domain is aimed at an IT Project Manager and encompasses planning, executing, and controlling IT projects. It includes managing scope, time, cost, quality, and risks, applying project methodologies, engaging stakeholders, and delivering projects that meet business requirements.</li> </ul>
トピック 3	<ul style="list-style-type: none"> <li>• <b>Service Management:</b> This domain targets a Service Delivery Manager and focuses on managing IT services to ensure consistent and efficient delivery. It includes establishing service level agreements (SLAs), incident and problem management, continuous service improvement, and aligning IT services with business demands.</li> </ul>
トピック 4	<ul style="list-style-type: none"> <li>• <b>Risk Management:</b> This domain evaluates the capabilities of an IT Risk Manager and involves identifying, assessing, and mitigating IT-related risks. It addresses developing risk frameworks, compliance management, and proactive measures to safeguard IT assets and operations.</li> </ul>
トピック 5	<ul style="list-style-type: none"> <li>• <b>Information Security Management:</b> This section targets an Information Security Manager and focuses on protecting information assets from threats. It covers policy development, security controls implementation, incident response, data protection, and compliance with legal and regulatory requirements to maintain confidentiality, integrity, and availability.</li> </ul>
トピック 6	<ul style="list-style-type: none"> <li>• <b>Vendor Selection</b></li> <li>• <b>Management:</b> This section measures the expertise of a Vendor Manager and covers the process of selecting and managing third-party providers. It addresses evaluating vendor capabilities, negotiating contracts, monitoring performance, and maintaining productive relationships to ensure service quality and value.</li> </ul>
トピック 7	<ul style="list-style-type: none"> <li>• <b>IT Organization:</b> This domain targets an IT Operations Manager and focuses on the design and management of IT organizational structures. It includes defining roles and responsibilities, establishing governance frameworks, managing resources effectively, and fostering collaboration to support IT service delivery and business needs.</li> </ul>
トピック 8	<ul style="list-style-type: none"> <li>• <b>Application Management:</b> This section of the exam evaluates an Application Manager's skills in overseeing the lifecycle of IT applications. It covers application development support, maintenance, upgrades, user support, and ensuring that applications meet functional and performance standards aligned with business needs.</li> </ul>

## EXIN CITM認証資格、CITM勉強ガイド

ユーザーのニーズによりよく応えるために、CITM調査の質問では、ユーザーがプロのワンストップサービスを利用できるように、サービスシステムの完全なセットを設定しました。ユーザー向けのプレセールで無料デモを提供するだけでなく、ユーザーが購入できる3つのバージョンを選択できると同時に、CITMトレーニング資料も24時間のアフターサービスを提供します。私たちのCITMテストガイドの完璧なワンストップサービスは、あなたが選択を後悔することはないと信じており、あなたの時間、完全な勉強、効率的にCITM試験に合格することができると思います。

## EXIN EPI Certified Information Technology Manager 認定 CITM 試験問題 (Q11-Q16):

### 質問 # 11

Your organization considers a job rotation program. What is the main objective?

- A. Support the long-term continuity of the organization
- B. Allow staff a diversity in their daily responsibilities
- C. Increase staff job satisfaction
- D. Train staff on a range of activities common in daily operations

正解: A

解説:

The main objective of a job rotation program in an IT organization is to support the long-term continuity of the organization (A). Job rotation ensures that multiple staff members are trained across various roles and tasks, reducing dependency on specific individuals and mitigating risks associated with staff turnover or absences. This approach enhances organizational resilience by creating a flexible, cross-trained workforce capable of maintaining operations, aligning with IT organization principles for workforce planning and business continuity.

\* Train staff on a range of activities (B): While training is a benefit, it is a means to achieve continuity, not the primary objective.

\* Increase staff job satisfaction (C): Job satisfaction may be a secondary benefit, but it's not the main goal in an IT context.

\* Allow staff a diversity in responsibilities (D): Diversity in tasks is a byproduct, not the primary focus, which is organizational continuity.

According to human resource management frameworks, job rotation is a strategic tool for ensuring operational stability, particularly in IT environments where specialized skills are critical.

Reference: EPI CITM study guide, under IT Organization, likely discusses workforce planning and job rotation for continuity. Check sections on human resource management or organizational resilience.

### 質問 # 12

One of the company's assets is valued at \$200,000.00. Based on historical data, the exposure factor is 25%, and the Annual Loss Expectancy (ALE) is calculated at \$100,000.00. What is the Annualized Rate of Occurrence (ARO)?

- A. 0
- B. 1
- C. 0.4

正解: A

解説:

In risk management, the Annual Loss Expectancy (ALE) is calculated as:

$ALE = \text{Single Loss Expectancy (SLE)} \times \text{Annualized Rate of Occurrence (ARO)}$ , where  $SLE = \text{Asset Value} \times \text{Exposure Factor (EF)}$ .

Given:

\* Asset Value = \$200,000

\* Exposure Factor (EF) = 25% = 0.25

\* ALE = \$100,000

Calculate SLE:

$SLE = \text{Asset Value} \times EF = \$200,000 \times 0.25 = \$50,000$

Calculate ARO:

$ALE = SLE \times ARO$

$\$100,000 = \$50,000 \times ARO$

$ARO = \$100,000 \div \$50,000 = 2$

Thus, the Annualized Rate of Occurrence (ARO) is 2 (C), meaning the incident is expected to occur twice per year.

\* 0.4 (A): Incorrect; implies a lower frequency (0.4 times per year).

\* 1 (B): Incorrect; would yield an ALE of \$50,000, not \$100,000.

Reference: EPI CITM study guide, under Risk Management, likely covers quantitative risk analysis, including ALE, SLE, and ARO calculations. Check sections on risk assessment or quantitative analysis.

### 質問 # 13

Little to no budget is available for hiring new staff for the IT service desk. What is the ideal method of sourcing knowing that little time is available?

- A. Internal IT staff based on a SWOT analysis
- B. Internet job board
- C. Recruitment agency
- D. Word of mouth

正解: B

解説:

Given the constraints of little to no budget and limited time, internet job boards are the ideal sourcing method. They are cost-effective (often free or low-cost), allow quick posting of job openings, and reach a wide pool of candidates, enabling rapid hiring.

Word of mouth (A) is informal and may not yield qualified candidates quickly. Internal IT staff based on SWOT analysis (B) is not a standard recruitment method and takes time to analyze. Recruitment agencies (D) are expensive and slower due to their processes, making them unsuitable for low-budget, urgent hiring.

Reference: EPI CITM study guide, under IT Organization, likely discusses recruitment strategies for IT staff, emphasizing cost-effective methods like job boards. Check sections on human resource management or staffing.

#### 質問 # 14

Being part of service management, business relationship management follows the principles of the service lifecycle. Which of the below is not part of activities defined in service operation?

- A. Define service strategy
- B. Communicate scheduled outages
- C. Escalation
- D. Report service performance

正解: A

解説:

In ITIL, the service operation phase focuses on delivering and managing services, including activities like communicating scheduled outages (A), reporting service performance (B), and handling escalations (C).

Defining service strategy (D) is part of the service strategy phase, not service operation, as it involves planning and aligning services with business goals.

Reference: EPI CITM study guide, under Service Management, likely references ITIL's service lifecycle, specifically distinguishing service operation from service strategy. Check sections on ITIL service operation or business relationship management.

#### 質問 # 15

During financial year closing, a processing error in a critical financial system occurs. Senior management demands a change to be implemented in order to not further delay the business processes. Which sort of change is applied?

- A. Normal
- B. Exceptional
- C. Standard
- D. Emergency

正解: D

解説:

In ITIL (Information Technology Infrastructure Library), an emergency change is implemented to address urgent issues that significantly impact business operations, such as a processing error during financial year closing. Emergency changes are fast-tracked to restore service or prevent further disruption, bypassing some standard change management processes while still requiring approval.

Normal changes (A) follow the full change management process, standard changes (B) are pre-approved and routine, and exceptional (C) is not a standard ITIL term. Emergency change (D) fits the scenario of urgent action to avoid business delays.

Reference: EPI CITM study guide, under Service Management, likely references ITIL's change management processes, specifically emergency changes. Refer to the section on ITIL change management or service operation.
