## New AP-219 Test Tutorial - 2026 Salesforce First-grade Complete AP-219 Exam Dumps Pass Guaranteed

It's crucial to have reliable Salesforce AP-219 exam questions and practice test to prepare for the AP-219 Exam. Pass4sures offers real Salesforce AP-219 exam questions with accurate answers in our AP-219 practice exam format. Our AP-219 Practice Questions and answers resemble the actual Salesforce AP-219 questions, and they have been verified by experts to ensure your success in the Salesforce Order Management Administrator Accredited Professional Exam with ease.

## Salesforce Order Management Administrator Accredited Professional Sample Questions (Q53-Q58):

### NEW QUESTION # 53

An administrator has created a new currency field on the Fulfillment Order object and wants to roll up the total to the Order Summary

object. When creating a rollup field on the Order Summary object, Fulfillment Order does not appear as an option. Why is this?

- A. The Order Summary field on the Fulfillment Order object is a Lookup
- B. The Order Summary object has reached the limit of Rollup Summary fields
- C. Rollup Fields cannot sum Currency Fields
- D. The Rollup Summary field must be created on the Fulfillment Order object with the Order Summary object as the parent

**Answer: A**

Explanation:

The reason why Fulfillment Order does not appear as an option when creating a rollup field on the Order Summary object is that the Order Summary field on the Fulfillment Order object is a Lookup. A Lookup field is a type of custom field that creates a relationship between two objects, but does not support rollup summary fields. To create a rollup summary field, the relationship between the objects must be master-detail, which means that the child record cannot exist without its parent record. Verified Reference: [https://help.salesforce.com/s/articleView?id=sf.custom\\_field\\_types.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.custom_field_types.htm&type=5)[https://help.salesforce.com/s/articleView?id=sf.fields\\_about\\_roll\\_up\\_summary\\_fields.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.fields_about_roll_up_summary_fields.htm&type=5)

#### NEW QUESTION # 54

How can an administrator add visibility rules for the buttons in the Highlights Panel on the Order Summary record page?

- A. Navigate to the Order Summary object in Setup and modify the Highlights Panel visibility rules
- B. Create a custom Highlights Panel component
- C. Modify the Lightning Record Page Highlights Panel using Dynamic Actions
- D. Modify the visibility rules of the Highlights Panel Actions in the page layout

**Answer: C**

Explanation:

Dynamic Actions allow an administrator to add visibility rules for the buttons in the Highlights Panel on the Lightning Record Page. Dynamic Actions let you configure when and where actions appear on a record page based on criteria such as record field values, user permissions, or device type.

#### NEW QUESTION # 55

Which three statements are true about change sets?

- A. Changes can be deployed to any instance of Salesforce as long as the destination has approved it
- B. Sending a change set between two orgs requires a deployment connection
- C. A change request should be created when the admin wants to send customizations from the current org to another org
- D. Change sets can only be sent between orgs that are affiliated with a production org
- E. Change sets can contain only modifications made through the Setup menu

**Answer: B,D,E**

Explanation:

Three statements that are true about change sets are:

Sending a change set between two orgs requires a deployment connection. A deployment connection is a link between two orgs that allows one org to send change sets to another org.

Change sets can only be sent between orgs that are affiliated with a production org. A production org is an org that is used for live operations and data, and it can have one or more sandbox orgs that are used for development and testing. Change sets can only be sent from a sandbox org to its associated production org, or from one sandbox org to another sandbox org that shares the same production org.

Change sets can contain only modifications made through the Setup menu. A change set is a collection of metadata components that can be deployed from one org to another. Metadata components are customizations that are made through the Setup menu, such as custom objects, fields, workflows, etc.

#### NEW QUESTION # 56

An administrator is attempting to export the data stored in a custom field on a standard object using Data Loader. However, after exporting the records neither the field header nor any of the field data appear in the CSV file. What could be the cause of this issue?

- A. A mapping file was not used when the data was loaded in
- B. The user has rights to the field but there are no values in it
- **C. The user does not have access to the field**
- D. The user needs to install a specific Zulu JDK that is recommended by Salesforce.

**Answer: C**

#### NEW QUESTION # 57

What does a summary object represent?

- A. A discount to underlying data
- **B. A dynamic view of underlying data**
- C. An individual change to financial data
- D. A change to an underlying record.

**Answer: B**

Explanation:

A summary object represents a dynamic view of underlying data. A summary object is a type of object that aggregates data from related records and displays it in a single record. For example, an Order Summary object represents the financial summary of an order that is received from an external system, such as B2C Commerce or B2B Commerce. An Order Summary object aggregates data from related Order Item Summary records and displays it in fields such as total amount, tax amount, discount amount, etc.
