

OGEA-103 Examcollection Dumps Torrent, Relevant OGEA-103 Exam Dumps

2026 Latest PDFVCE OGEA-103 PDF Dumps and OGEA-103 Exam Engine Free Share: <https://drive.google.com/open?id=1C6nkOIs0SzvWJJvkOgEz-FoqCW1nxXPH>

Actual The Open Group OGEA-103 exam questions in our PDF format are ideal for restrictions-free quick preparation for the test. The Open Group OGEA-103 Real exam questions which are available for download in PDF format can be printed and studied in a hard copy format. Our TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam (OGEA-103) PDF file of updated exam questions is compatible with smartphones, laptops, and tablets. Therefore, you can use this TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam PDF to prepare for the test without limits of time and place.

Our OGEA-103 study materials can come today. With so many loyal users, our good reputation is not for nothing. To buy our OGEA-103 exam braindumps, you don't have to worry about information leakage. Selecting a brand like OGEA-103 learning guide is really the most secure. And we are responsible and professional to protect your message as well. At the same time, if you have any problem when you buy or download our OGEA-103 Practice Engine, just contact us and we will help you in a minute.

Relevant OGEA-103 Exam Dumps | OGEA-103 Test Questions Pdf

Desktop TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam (OGEA-103) practice test software is the first format available at PDFVCE. This format can be easily used on Windows PCs and laptops. The The Open Group OGEA-103 practice exam software works without an internet connection, with the exception of license verification. One of the excellent features of this TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam (OGEA-103) desktop-based practice test software is that it includes multiple mock tests that have The Open Group OGEA-103 practice questions identical to the actual exam, providing users

with a chance to get TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam (OGEA-103) real exam experience before even attempting it.

The Open Group TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam Sample Questions (Q77-Q82):

NEW QUESTION # 77

Consider the following ADM phases objectives.

Which phase does each objective match?

- A. 1F-2G-3F-4F
- B. 1F-2F-3E-4G
- C. 1G-2E-3F-4E
- D. 1E-2F-3E-4G

Answer: D

Explanation:

1E: To identify delivery vehicles (projects programs portfolios) that will deliver the Target Architecture 2F:

To confirm readiness and ability to undergo change 3E: To determine whether an incremental approach is required and if so identify Transition Architectures that will deliver continuous business value 4G: To perform appropriate governance functions while the solution is being implemented Reference: The TOGAF Standard | The Open Group Website, Section 3.2 ADM Phases.

NEW QUESTION # 78

Consider the following ADM phase objectives.

Objective

1 Determine whether an incremental approach is required, and if so identify Transition Architectures that will deliver continuous business value

2 Generate the initial complete version of the Architecture Roadmap, based upon the gap analysis and candidate Architecture Roadmap components from Phases B, C, and D

3 Finalize the Architecture Roadmap and the supporting Implementation and Migration Plan

4 Ensure that the business value and cost of work packages and Transition Architectures is understood by key stakeholders Which two are objectives of ADM Phase F?

- A. 1 & 2
- B. 1 & 3
- C. 2 & 3
- D. 3 & 4

Answer: D

Explanation:

Comprehensive and Detailed In-Depth Explanation from Expert in Enterprise Architecture, guiding in TOGAF and ArchiMate: ADM Phase F (Migration Planning) focuses on finalizing the Architecture Roadmap and Implementation and Migration Plan and ensuring they are viable, cost-effective, and clearly understood by decision-makers.

Phase F key objectives include:

Finalizing the Architecture Roadmap

Finalizing the Implementation and Migration Plan

Ensuring costs, benefits, risks, and dependencies of work packages and Transition Architectures are understood Gaining approval for implementation sequencing and priorities Why Option A is correct:

Objective 3 directly states the finalization of the Architecture Roadmap and supporting Implementation and Migration Plan, which is a core Phase F responsibility.

Objective 4 aligns with Phase F's requirement to ensure that business value, cost, and trade-offs are understood by stakeholders prior to implementation approval.

Why the other options are incorrect:

Objective 1 belongs primarily to Phase E (Opportunities and Solutions), where incremental delivery and Transition Architectures are identified.

Objective 2 also belongs to Phase E, where the initial complete Architecture Roadmap is generated from Phases B, C, and D outputs.

Authoritative TOGAF

TOGAF Architecture Roadmap and Implementation and Migration Plan

NEW QUESTION # 79

Refer to the table below:

Which ADM Phase does this describe?

- **A. Phase B**
- B. Phase A
- C. Phase C
- D. Preliminary Phase

Answer: A

Explanation:

Phase B of the ADM cycle is the Business Architecture phase. It describes the development of a Business Architecture to support an agreed Architecture Vision. The objectives of this phase are to describe the baseline and target Business Architecture, identify candidate Architecture Roadmap components based on gaps between the baseline and target, and determine whether an incremental approach is required. Reference:

The TOGAF Standard | The Open Group Website, Section 3.2.2 Phase B: Business Architecture.

NEW QUESTION # 80

Consider the image showing basic architectural concepts.

What are items A and B?

- A. A-Architecture Board, B-Architecture Capability
- B. A-Candidate Architecture, B-Trade-off
- C. A-Requirement, B-Candidate Architecture
- **D. A-Architecture Viewpoint, B-Architecture View**

Answer: D

Explanation:

The image shows a diagram that illustrates the basic concepts of architecture description as defined by the ISO/IEC/IEEE 42010:2011 standard¹, which is also adopted by the TOGAF standard².

According to the ISO/IEC/IEEE 42010:2011 standard, an architecture description is a work product used to express an architecture, and it consists of one or more architecture views¹.

An architecture view is a representation of a system from the perspective of a related set of concerns, and it conforms to an architecture viewpoint¹.

An architecture viewpoint is a specification of the conventions for constructing and using an architecture view to address specific stakeholder concerns¹.

Therefore, the correct answer is option A, which identifies the items labeled as "A" and "B" in the image as an architecture viewpoint and an architecture view, respectively. References:

1: ISO/IEC/IEEE 42010:2011 - Systems and software engineering - Architecture description¹

2: TOGAF Standard, Version 9.2 - Part IV: Architecture Content Framework - 31. Architectural Artifacts²

NEW QUESTION # 81

Consider the following ADM phases objectives.

Which phase does each objective match?

- A. 1C-2D-3B-4A
- B. 1B-2D-3A-4C
- **C. 1C-2B-3A-4C**
- D. 1A-2B-3C-4D

Answer: C

Explanation:

The objectives listed in the question correspond to the objectives of different phases of the TOGAF ADM (Architecture Development Method), which is a method for developing and managing an enterprise architecture1.

The ADM consists of nine phases, each with a specific purpose and output. The phases are1:

Preliminary Phase: To prepare and initiate the architecture development cycle, including defining the architecture framework, principles, and governance.

Phase A: Architecture Vision: To define the scope, vision, and stakeholders of the architecture initiative, and to obtain approval to proceed.

Phase B: Business Architecture: To describe the baseline and target business architecture, and to identify the gaps between them.

Phase C: Information Systems Architectures: To describe the baseline and target data and application architectures, and to identify the gaps between them.

Phase D: Technology Architecture: To describe the baseline and target technology architecture, and to identify the gaps between them.

Phase E: Opportunities and Solutions: To identify and evaluate the opportunities and solutions for implementing the target architecture, and to define the work packages and transition architectures.

Phase F: Migration Planning: To finalize the implementation and migration plan, and to ensure alignment with the enterprise portfolio and project management.

Phase G: Implementation Governance: To provide architecture oversight and guidance for the implementation projects, and to manage any architecture change requests.

Phase H: Architecture Change Management: To monitor the changes in the business and technology environment, and to assess the impact and performance of the architecture.

Based on the above definitions, we can match each objective with the corresponding phase as follows:

Objective 1: Develop the Target Data Architecture that enables the Business Architecture and the Architecture Vision. This objective is achieved in Phase C: Information Systems Architectures, where the data architecture is defined as a subset of the information systems architecture2.

Objective 2: Develop the Target Business Architecture that describes how the enterprise needs to operate to achieve the business goals. This objective is achieved in Phase B: Business Architecture, where the business architecture is defined as a subset of the enterprise architecture3.

Objective 3: Develop a high-level aspirational vision of the capabilities and business value to be delivered as a result of the proposed Enterprise Architecture. This objective is achieved in Phase A: Architecture Vision, where the architecture vision is defined as a high-level description of the target architecture and its benefits4.

Objective 4: Develop the Target Application Architecture that enables the Business Architecture and the Architecture Vision, in a way that addresses the Statement of Architecture Work and stakeholder concerns. This objective is achieved in Phase C: Information Systems Architectures, where the application architecture is defined as a subset of the information systems architecture2.

2: The TOGAF Standard, Version 9.2, Chapter 9: Phase C: Information Systems Architectures

3: The TOGAF Standard, Version 9.2, Chapter 8: Phase B: Business Architecture

4: The TOGAF Standard, Version 9.2, Chapter 7: Phase A: Architecture Vision

NEW QUESTION # 82

.....

We take so much pride in the high pass rate of our OGEA-103 study questions because according to the statistics from the feedbacks of all of our customers, under the guidance of our OGEA-103 exam materials the pass rate has reached as high as 98% to 100%, which marks the highest pass rate in the field. So if you really want to pass the OGEA-103 Exam as well as getting the certification with no danger of anything going wrong, just feel rest assured to buy our OGEA-103 learning guide.
