## ISACA Certified in Risk and Information Systems Control Sample Questions (Q1699-Q1704):

### NEW QUESTION # 1699

Which of the following is true for risk evaluation?

- A. Risk evaluation is done every four to six months for critical business processes.
- B. Risk evaluation is done only when there is significant change.
- **C. Risk evaluation is done annually or when there is significant change.**
- D. Risk evaluation is done once a year for every business processes.

**Answer: C**

Explanation:

Section: Volume B

Explanation:

Due to the reason that risk is constantly changing, it is being evaluated annually or when there is significant change. This gives best alternative as it takes into consideration a reasonable time frame of one year, and meanwhile it also addresses significant changes (if any).

Incorrect Answers:

A: Evaluating risk only when there are significant changes do not take into consideration the effect of time. As the risk is changing constantly, small changes do occur with time that would affect the overall risk. Hence risk evaluation should be done annually too.

B: Evaluating risk once a year is not sufficient in the case when some significant change takes place. This significant change should be taken into account as it affects the overall risk.

D: Risk evaluation need not to be done every four to six months for critical processes, as it does not address important changes in timely manner.

#### NEW QUESTION # 1700

Which of the following are the common mistakes while implementing KRIs?

Each correct answer represents a complete solution. Choose three.

- A. Choosing KRIs that has high correlation with the risk
- B. Choosing KRIs that are difficult to measure
- C. Choosing KRIs that are not linked to specific risk
- D. Choosing KRIs that are incomplete or inaccurate due to unclear specifications

**Answer: B,C,D**

Explanation:

Explanation/Reference:

Explanation:

A common mistake when implementing KRIs other than selecting too many KRIs includes choosing KRIs that are:

Not linked to specific risk

□ Incomplete or inaccurate due to unclear specifications

□ Too generic

□ Difficult to aggregate, compare and interpret

□ Difficult to measure

□ Incorrect Answers:

B: For ensuring high reliability of the KRI, The indicator must possess a high correlation with the risk and be a good predictor or outcome measure. Hence KRIs are chosen that has high correlation with the risk.

#### NEW QUESTION # 1701

Who is PRIMARILY accountable for risk treatment decisions?

- A. Risk manager
- B. Risk owner
- C. Data owner
- D. Business manager

**Answer: B**

#### NEW QUESTION # 1702

Which of the following BEST confirms the existence and operating effectiveness of information systems controls?
