### **As for the tasks that you should be able to perform, they include the following:**

- Effectively manage risks and determine whether information security controls are appropriate or not;
- Determine the risk factors to ensure proper management;
- To enable a consistent and precise information risk management program, it should be integrated into the business and IT processes.

The Certified Information Security Manager (CISM) certification exam is designed for professionals in the field of information security management. CISM Exam is offered by ISACA, a global association that provides IT governance, security, and assurance professionals with knowledge, standards, and certifications. The CISM certification is highly sought after by organizations and businesses worldwide, as it demonstrates a professional's ability to manage and oversee an organization's information security program.

### **ISACA Certified Information Security Manager Sample Questions (Q728-Q733):**

#### **NEW QUESTION # 728**

Temporarily deactivating some monitoring processes, even if supported by an acceptance of operational risk, may not be acceptable to the information security manager if:

- A. short-term impact cannot be determined.
- B. it violates industry security practices.
- **C. it implies compliance risks.**
- D. changes in the roles matrix cannot be detected.

**Answer: C**

Explanation:

Explanation

Monitoring processes are also required to guarantee fulfillment of laws and regulations of the organization and, therefore, the information security manager will be obligated to comply with the law. Choices B and C are evaluated as part of the operational risk. Choice D is unlikely to be as critical a breach of regulatory legislation. The acceptance of operational risks overrides choices B, C and D.

#### **NEW QUESTION # 729**

A business unit handles sensitive personally identifiable information (PII), which presents a significant financial liability to the organization should a breach occur.

Which of the following is the BEST way to mitigate the risk to the organization?

- A. Implementing audit logging on systems
- B. Contracting the process to a third party
- C. Including indemnification into customer contracts
- **D. Purchasing insurance**

**Answer: D**

#### **NEW QUESTION # 730**

Which of the following is a key area of the ISO 27001 framework?

- A. Capacity management
- B. Financial crime metrics
- C. Operational risk assessment
- **D. Business continuity management**

**Answer: D**

Explanation:

Explanation/Reference:

Explanation:

Operational risk assessment, financial crime metrics and capacity management can complement the information security framework, but only business continuity management is a key component.

#### NEW QUESTION # 731

An information security manager is advised by contacts in law enforcement that there is evidence that his/ her company is being targeted by a skilled gang of hackers known to use a variety of techniques, including social engineering and network penetration. The FIRST step that the security manager should take is to:

- A. initiate awareness training to counter social engineering.
- B. increase monitoring activities to provide early detection of intrusion.
- C. immediately advise senior management of the elevated risk.
- D. perform a comprehensive assessment of the organization's exposure to the hacker's techniques.

**Answer: C**

Explanation:

Explanation/Reference:

Explanation:

Information about possible significant new risks from credible sources should be provided to management along with advice on steps that need to be taken to counter the threat. The security manager should assess the risk, but senior management should be immediately advised. It may be prudent to initiate an awareness campaign subsequent to sounding the alarm if awareness training is not current. Monitoring activities should also be increased.

#### NEW QUESTION # 732

Which of the following would help to change an organization's security culture?

- A. Obtain strong management support
- B. Periodically audit compliance with the information security policy
- C. Implement strict technical security controls
- D. Develop procedures to enforce the information security policy

**Answer: A**

Explanation:

Explanation

Management support and pressure will help to change an organization's culture. Procedures will support an information security policy, but cannot change the culture of the organization. Technical controls will provide more security to an information system and staff; however, this does not mean the culture will be changed.

Auditing will help to ensure the effectiveness of the information security policy; however, auditing is not effective in changing the culture of the company.
