여러분은 우리 DumpTOP의 Microsoft GH-900 시험자료 즉 덤프의 문제와 답만 있으시면 Microsoft GH-900 인증시험을 아주 간단하게 패스하실 수 있습니다. 그리고 관련 업계에서 여러분의 지위상승은 자연적 이로 이루어집니다. DumpTOP의 덤프를 장바구니에 넣으세요. 그리고 DumpTOP에서는 무료로 24시간 온라인상담이 있습니다.

Microsoft GH-900 시험요강:

| 주제 | 소개 |
|------|--|
| 주제 1 | <ul style="list-style-type: none">• Introduction to Git and GitHub: This section of the exam measures skills of Junior Developers and Platform Support Specialists and covers the basic understanding of Git and GitHub. It explains what Git is and why it is used, the fundamental Git workflow, and concepts related to repositories including their local and remote distinctions. Candidates learn essential Git commands such as initializing and cloning repositories, adding and committing changes, pushing and pulling updates, and branching and merging. It also covers navigating GitHub by creating accounts, managing repositories, understanding its interface, and working with issues and pull requests. |
| 주제 2 | <ul style="list-style-type: none">• Working with GitHub Repositories: This domain targets Repository Administrators and Content Managers, focusing on managing repository settings and permissions. Candidates learn to configure repositories, use templates, and effectively manage files by adding, editing, and deleting. The domain also addresses versioning of files and the use of GitHub Desktop for streamlined file management tasks within repositories. |
| 주제 3 | <ul style="list-style-type: none">• Modern Development: This domain assesses abilities of DevOps Engineers and Continuous Integration Specialists in implementing modern development practices. It emphasizes understanding DevOps principles and leveraging GitHub Actions for automation and CI• CD pipeline implementation. Candidates also learn GitHub's tools and best practices for conducting and managing code reviews. |

Microsoft GH-900최신버전 덤프샘플문제, GH-900시험대비 덤프샘플 다운

자기한테 딱 맞는 시험준비공부자료 마련은 아주 중요한 것입니다. DumpTOP는 GH-900업계에 많이 알려져있는 덤프제공 사이트입니다. DumpTOP덤프자료가 여러분의 시험준비자료로 부족한 부분이 있는지는 구매사이트에서 무

료 샘플을 다운로드하여 덤프의 일부 문제들을 우선 체험해보시면 됩니다. DumpTOP에서 GH-900제공해드리는 퍼펙트한 덤프는 여러분이 한방에 시험에서 통과하도록 최선을 다해 도와드립니다.

최신 GitHub Administrator GH-900 무료 샘플문제 (Q117-Q122):

질문 # 117

You've made changes in a branch called feature-update and now want to merge it into the main branch of the same repository. What is the correct base and compare setup when opening a pull request?

- A. Base: main, Compare: feature-updateright
- B. Base: develop, Compare: main
- C. Base: main, Compare: main
- D. Base: feature-update, Compare: main

정답: A

설명:

The base branch is where the changes will be merged into (usually main), and the compare branch is where the changes are coming from (feature-update).

Option A is CORRECT because when creating a pull request, the base branch is the one you want to merge your changes into (in this case, main), and the compare branch is the one that contains the new changes (in this case, feature-update).

질문 # 118

What is defined as software that can be freely used, modified, and shared by anyone?

- A. Innersource
- B. open source
- C. free source
- D. proprietary

정답: B

질문 # 119

How can a user create a repository template, and what permissions are required?

- A. With Admin permissions, navigate to Organization settings, select the repository, and choose Template Repository.
- B. With Maintain permissions, navigate to Organization settings, select the repository, and choose Template Repository.
- C. With Maintain permissions, navigate to Repository settings and select Template Repository.
- D. With Admin permissions, navigate to Repository settings and select Template Repository.

정답: D

설명:

Creating a repository template in GitHub requires specific steps and permissions:

Creating a Repository Template:

Option A is correct because a user with Admin permissions can navigate to the repository's settings and enable the "Template Repository" option. This allows other users to generate new repositories from this template, which includes all branches, tags, and file history.

Other Options:

Option B is incorrect because "Maintain" permissions do not allow the creation of repository templates, and the option is not found in Organization settings but in the repository settings.

Option C is incorrect because the "Template Repository" option is in the repository settings, not in Organization settings.

Option D is incorrect because "Maintain" permissions do not grant the ability to create a repository template.

질문 # 120

The difference between GitHub Desktop and github.com is that Desktop:

- A. Is only available on Windows operating systems.
- B. Enables integration with office suite applications.
- C. Is a self-hosted version of GitHub.
- D. Is a standalone software application.
- E. Offers a graphical user interface.

정답: E

설명:

GitHub Desktop is a standalone application that provides a graphical user interface (GUI) for interacting with GitHub repositories, as opposed to the command-line or web-based interfaces available on github.com.

* Graphical User Interface:

* Option D is correct because GitHub Desktop offers a GUI, making it easier for users to manage repositories, perform commits, and handle other Git-related tasks without needing to use the command line.

* Incorrect Options:

* Option A is partially correct in that GitHub Desktop is a standalone application, but the key difference is the GUI.

* Option B is incorrect because GitHub Desktop does not specifically enable integration with office suite applications.

* Option C is incorrect because GitHub Desktop is available on both Windows and macOS.

* Option E is incorrect because GitHub Desktop is not a self-hosted version of GitHub; it is a client application for accessing GitHub repositories.

질문 # 121

Which of the following features does GitHub provide to enhance collaboration within teams?

- A. code review and discussion through issues and pull requests
- B. automated testing and code quality analysis
- C. real-time collaboration through pair programming
- D. git repositories hosting and sharing capabilities

정답: A

설명:

GitHub enhances collaboration by offering features such as pull requests, issue tracking, and discussions, making it easier for remote teams to work together.

Collaborating with pull requests

Track and discuss changes in issues, then propose and review changes in pull requests.
