

# 2026 Professional Oracle New 1z0-1093-25 Test Review

BTW, DOWNLOAD part of ITExamDownload 1z0-1093-25 dumps from Cloud Storage: [https://drive.google.com/open?id=1C1LLDn\\_zPlq085ecQQ1yCq36fXMTxjA4](https://drive.google.com/open?id=1C1LLDn_zPlq085ecQQ1yCq36fXMTxjA4)

Whether you prefer web-based practice exam, desktop-based exam, or PDF real questions, we've got you covered. We believe that variety is key when it comes to Oracle 1z0-1093-25 Exam Preparation, and that's why we offer three formats that cater to different learning styles and preferences.

## Oracle 1z0-1093-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>MySQL HeatWave Technical Overview: This section of the exam measures the skills of a MySQL Cloud Specialist and introduces MySQL HeatWave, Oracle's high-performance analytics engine for MySQL. It includes provisioning, migrating existing MySQL databases to HeatWave, and working with its analytical and machine-learning capabilities. It also covers day-to-day operational activities within the MySQL HeatWave environment.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Oracle Cloud Infrastructure Database Management Service: This section of the exam measures the skills of a Cloud Operations Analyst and provides insight into Oracle's Database Management Service on OCI. It focuses on enabling the service for databases, monitoring their performance, and performing diagnostic and tuning activities. It also covers tasks related to the administration of databases running on Oracle Cloud Infrastructure.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Exadata Database Service (ExaDB): This section of the exam measures the skills of a Database Infrastructure Engineer and focuses on the advanced Exadata Database Service. It includes the provisioning of Exadata systems, management of Exadata Cloud Infrastructure, and VM Cluster administration. It also evaluates knowledge of lifecycle management tasks and how to interact with various Exadata management utilities and interfaces.</li></ul>

Topic 4	<ul style="list-style-type: none"> <li>NoSQL Database Service Technical Overview: This section of the exam measures the skills of a NoSQL Developer and explores Oracle's NoSQL Database Service. It includes understanding the basics of NoSQL architecture, handling table-level security, rate limiting, and data modeling. It also covers concepts like provisioned throughput and the usage of language SDKs for interacting with NoSQL services on Oracle Cloud.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Base Database Service - VM (BaseDB): This section of the exam measures the skills of a Cloud Database Administrator and covers the foundational elements of Oracle's Base Database Service. It includes understanding what the BaseDB service is, how to provision and manage it, and lifecycle operations such as backups, recovery, patching, and upgrades. It also tests familiarity with monitoring and management interfaces used to control and observe the BaseDB environment.</li> </ul>

## New 1z0-1093-25 Test Review Exam Pass For Sure | Oracle 1z0-1093-25 Reliable Braindumps Ebook

Are you staying up for the 1z0-1093-25 exam day and night? Do you have no free time to contact with your friends and families because of preparing for the exam? Are you tired of preparing for different kinds of exams? If your answer is yes, please buy our 1z0-1093-25 Exam Questions, which is equipped with a high quality. We can make sure that our products have the ability to help you pass the exam and get the according 1z0-1093-25 certification.

### Oracle Cloud Database Services 2025 Professional Sample Questions (Q47-Q52):

#### NEW QUESTION # 47

Which two statements are accurate regarding the placement of VM Clusters within an Exadata Cloud Infrastructure?

- A. VM Clusters within the same Exadata Infrastructure can share a single VCN, simplifying network management.
- B. Each VM Cluster must be associated with its own dedicated VCN, isolating network traffic between clusters.
- C. VM Clusters can span multiple Exadata Cloud Infrastructures, providing a single, unified database environment.
- D. Only one VM Cluster can exist within an Exadata Cloud Infrastructure.
- E. Multiple VM Clusters can be created within a single Exadata Cloud Infrastructure, allowing for workload isolation.

**Answer: A,E**

Explanation:

B: Multiple VM Clusters within a single Exadata Infrastructure:

\* Multiple clusters can coexist, each isolated for specific workloads.

\* Supports resource optimization and isolation.

E: Sharing a single VCN:

\* VM Clusters within the same Exadata Infrastructure can be configured to use the same Virtual Cloud Network (VCN), streamlining network management.

Why the other options are incorrect:

\* A. Only one VM Cluster: Incorrect as multiple clusters are supported.

\* C. Spanning multiple infrastructures: VM Clusters do not span Exadata Infrastructures; they are confined to a single infrastructure.

\* D. Dedicated VCN for each cluster: Unnecessary, as clusters can share a VCN.

#### NEW QUESTION # 48

Which two tools can you use to create a HeatWave MySQL Database Service System?

- A. OCI Bastion Server
- B. OCI SQL Developer
- C. OCI Console
- D. OCI Command Line Interface
- E. MySQL Shell on OCI Compute

**Answer: C,D**

Explanation:

OCI Console:

The Oracle Cloud Infrastructure Console is the primary graphical interface for creating and managing MySQL HeatWave Database Service Systems. It provides a user-friendly environment for configuring database instances and integrating HeatWave.

OCI CLI:

The OCI Command Line Interface allows for automation and scripting of database service creation. It is useful when managing multiple instances or performing bulk operations.

Why the other options are incorrect:

- \* C:OCI Bastion Server is used for secure SSH access, not for database creation.
- \* D:MySQL Shell is a client tool for interacting with databases, not for provisioning them
- \* EOCI SQL Developer is a database management tool, not a service provisioning tool.

**NEW QUESTION # 49**

Which database lifecycle management operation in BaseDB requires the creation of a new database home and is non-reversible after completion?

- A. Enabling Automatic Storage Management (ASM).
- B. Scaling the compute shape of the VM.
- C. Applying an operating system patch.
- D. **Upgrading the Oracle Database software version.**
- E. Upgrading the Oracle Grid Infrastructure.

**Answer: D**

Explanation:

Database Software Upgrade:

When upgrading the Oracle Database software version on a BaseDB VM, a new Oracle Home is created to house the upgraded software. Once the database is moved to this new home, the process is not easily reversible.

- \* Rolling back would require downgrading, which is a complex and risky process.
- \* The new Oracle Home ensures that the upgraded database environment is isolated from the previous version, preventing compatibility conflicts.

Why the other options are incorrect:

- \* A: Grid Infrastructure upgrades can be managed independently of the database upgrade.
- \* B: Scaling VMs is a reversible operation.
- \* C: OS patches do not impact the Oracle Home directly.
- \* E: ASM configuration changes are reversible.

**NEW QUESTION # 50**

Oracle NoSQL Database Cloud Service's key-value model is well-suited for certain types of applications.

Which of the following application scenarios would most directly benefit from the key-value data model's characteristics?

- A. An application requiring complex analytical queries and joins across multiple related datasets.
- B. An enterprise resource planning (ERP) system managing intricate relationships between various business entities.
- C. A content management system needing to enforce a rigid schema for all documents and their metadata.
- D. A financial system requiring strict transactional integrity and complex relationships between accounts and transactions.
- E. **A social media platform needing to store and retrieve individual user profiles and their associated data quickly.**

**Answer: E**

Explanation:

B: Social Media Platform:

- \* Social media applications require quick retrieval of user profiles based on unique IDs.
- \* The key-value model supports fast lookups and simple data associations, ideal for user-centric data.
- \* The flexibility of storing user attributes in a single document enhances performance and scalability.

Why the other options are incorrect:

- \* A. Complex analytical queries: Relational or analytical databases are better suited.

- \* C. Financial systems: Require ACID compliance and complex joins, not suitable for key-value models.
- \* D. Content management: Typically requires a more structured approach, better handled by document databases.
- \* E. ERP systems: Need relational integrity and complex schema support.

### NEW QUESTION # 51

When a new security patch is released for the Oracle Database software on a BaseDB VM system, what is the recommended approach for applying it in a production environment?

- A. Download the patch and apply it to a non-production environment that mirrors the production environment for testing before applying it to production.
- B. Wait for Oracle Cloud Infrastructure to automatically apply the security patch to all BaseDB VM systems.
- C. Apply the patch to a production standby database (if one exists) and then failover to the patched standby.
- D. Immediately apply the patch directly to the production database during off-peak hours to minimize potential security vulnerabilities.

#### Answer: A

Explanation:

B: Testing patches in a non-production environment:

- \* Critical to ensure that the patch does not introduce performance issues or compatibility problems.
- \* Best Practice: Apply the patch to a staging environment that mirrors production, validate stability, and then proceed to production.
- \* Minimizes the risk of unplanned downtime or disruptions.

Why the other options are incorrect:

- \* A. Immediate application in production: Risky as untested patches might cause outages.
- \* C. Automatic patching by OCI: OCI does not automatically apply database patches; the customer must manage this.
- \* D. Patching the standby and failing over: While a good strategy when applicable, it still requires prior testing.

### NEW QUESTION # 52

.....

Many people are afraid of walking out of their comfortable zones. So it is difficult for them to try new things. But you will never grow up if you reject new attempt. Now, our 1z0-1093-25 study materials can help you have a positive change. It is important for you to keep a positive mind. Our 1z0-1093-25 Study Materials can become your new attempt. It is not difficult for you. We have simplified all difficult knowledge. So you will enjoy learning our 1z0-1093-25 study materials. During your practice of our 1z0-1093-25 study materials, you will find that it is easy to make changes.
