Arch-303 Mock Exam, Test Arch-303 Online

The Salesforce - Salesforce Certified B2C Commerce Architect Arch-303 PDF file we have introduced is ideal for quick exam preparation. If you are working in a company, studying, or busy with your daily activities, our Salesforce Arch-303 dumps PDF format is the best option for you. Since this format works on laptops, tablets, and smartphones, you can open it and read Salesforce Arch-303 Questions without place and time restrictions.

Salesforce Certified B2C Commerce Architect Sample Questions (Q45-Q50):

NEW QUESTION # 45
The Architect has been presented with a requirement from the business to implement a new LINK cartridge.
The current site is built on the Storefront Reference Architecture, and the LINK cartridge is certified for Pipelines and Controllers.
On review, the Architect notes that the Jobs are all created in Pipelines.
How should the Architect implement that cartridge to make sure the required jobs runs property?

- A. The job Pipelines must be updated to useSFRA Controllers.
- B. The job Pipelines must be updated to work as custom job steps.
- C. The job Pipelines must be removed and recreated with scripts.
- D. The Job Pipelines must be updated to use SiteGenesis Controllers.

Answer: B

Explanation:
For integrating a LINK cartridge that is certified for pipelines and controllers into a system using the Storefront Reference Architecture (SFRA), which primarily uses scripts instead of the older pipeline technology, the architect should update the job pipelines to work as custom job steps. This approach allows the existing LINK cartridge functionalities to be maintained while making them compatible with the SFRA framework. Custom job steps enable more flexibility and the ability to leverage the full capabilities of SFRA, ensuring that the jobs run correctly within the newer architecture.

NEW QUESTION # 46
A new project for a Client will involve a few different Integrations to their middleware system resulting in four different web services. All will use the same credentials to the middleware. Each will have the same timeout, but will require a separate log file prefix.
How should the Architect set this up with the Service framework using a minimal set of configuration?

- A. One Service Configuration, Four Service Profiles, One Service Credential.
- B. Four Service Configurations. Four Service Profiles, Four Service Credentials
- C. Four Service Configurations. Four Service Profiles, One Service Credential
- D. Four Service Configurations. One Service Profile, One Service Credential.

Answer: D

Explanation:
For setting up multiple integrations that require the same credentials and timeout settings but need separate log file prefixes:
* Four Service Configurations are needed to specify the unique endpoint and other specifics for each of the four web services.
* One Service Profile can be used for all these configurations because they share the same timeout and other settings, optimizing the configuration process.
* One Service Credential is sufficient since all services authenticate with the same credentials, simplifying credential management and security handling.
This setup reduces redundancy and complexity in the service framework, ensuring a streamlined and efficient integration process while meeting all specified requirements.

NEW QUESTION # 47
The storefront integrates with a REST based Address verification service (AVS) that uses token based security. The sequence of calls in the API documentation for this AVS looks like the following
1. Client authentication call, which contains the merchantId and secret in a GET request and returns a token in the response.
2. Address verification call, which contains the token and the address to verify in a POST request.
Once the token is obtained, it is valid for hours and it is not needed to request a new one for subsequent address verification calls, the AVS charges for every request made no matter if it is client authentication call or address verificationcall.
Which three strategies could be applied to allow for efficient use of the service without compromising security? Choose 3 answers

- A. Use HTTPService caching for the client authentication call.
- B. Obtain the token from local storage of the browser and update it once It expires.
- C. Obtain the token from a custom cache before making the client authentication call.
- D. Apply page caching to the client authentication controller that is used with AJAX.
- E. Use a job to store and update the token in a customobject that is used from the storefront code

Answer: A,C,E

Explanation:
To efficiently use the REST-based Address Verification Service (AVS) while maintaining security, it is crucial to manage token usage and refresh effectively. Using a custom cache to store the token (Answer C) prevents unnecessary authentication calls by reusing the valid token, thus reducing the number of chargeable requests. Implementing HTTPService caching for the client authentication call (Answer D) optimizes the performance by caching the response, thereby avoiding repetitive and unnecessary calls. Lastly, employing a scheduled job to regularly update and store the token in a custom object (Answer E) ensures that the token is always up-to-date and available for use without repeated authentication, thus optimizing the cost and efficiency of using the AVS.

NEW QUESTION # 48

An existing B2C Commerce site has the following aliases configuration:

Which statement related to this configuration is incorrect?

- A. Site supports multiple hostnames and locates.
- B. Hostname www.example.co.uk will redirect to www.example.com/uk.
- C. Hostname www.example.de will redirect to www.example.com/de.
- D. Hostnamewww.example.comwill redirect to www example com/us

Answer: D

Explanation:

In the provided configuration, the incorrect statement is B. While it appears that the hostname www.example.
com should redirect to www.example.com/us based on the "if-site-path": "us" entry, this assumes that the default path or redirect isn't overridden by other configurations within the hostname alias file not visible in the snapshot provided. Typically, in Salesforce B2C Commerce, such a direct statement about redirection should align with explicit mapping rules that include hostname and path directives, which are not detailed for www.
example.com to www.example.com/us in the snippet provided. This absence suggests that the statement may be incorrect unless corroborated by additional detailed mappings in the full configuration file.

NEW QUESTION # 49

There Is an Issue with the site when the domain Is opened from Google search results. After researching the problem. It turns out that the site returns * 404 page error when accessedwith a parameter in the URL.
What should the Architect recommend to fix that issue?

- A. Add dynamic catch-all rule to redirect to home page.
- B. Add this snippet to the aliases configuration for the domain:
- C. Add dynamic redirect if the URL contains parameter to Home Show.Add this snippet to the aliases configuration for the domain
- D. Add this snippet to the aliases configurationfor the domain

Answer: A

Explanation:

To address the issue of the site returning a 404 error when accessed with a parameter from Google search results, a dynamic catch-all rule to redirect such requests to the homepage is an effective solution (Answer A).
This approach ensures that users landing from external links with appended parameters, which might not match any configured route or alias, are redirected to a valid page instead of seeing an error page. This improves the user experience and minimizes potential bounce rates caused by broken links or outdated URLs.

NEW QUESTION # 50

......

Authoritative Latest Arch-303 Test Cost, Arch-303 Mock Exam

You will have a deep understanding of the Arch-303 Exam files from our company, and then you will find that the study materials from our company will very useful and suitable for you to prepare for you Arch-303 exam.

We sincerely hope we can help you solve your problem, Now, we will provide you the easiest and quickest way to get the Arch-303 certification without headache.

For more textual content about practicing exam questions, you can download our Arch-303 training materials with reasonable prices and get your practice begin within 5 minutes.

We offer money back guarantee if anyone fails but that doesn't happen if one uses our Arch-303 dumps.
